Bruno Schulz has foreseen catastrophe and is almost paralysed by fear. His last chance of survival is to leave the home town to which, despite being in his late forties, he clings as if to a comforting blanket. So he retreats into his cellar (and sometimes hides under his desk) to write a letter to Thomas Mann: appealing to the literary giant to help him find a foreign publisher, in order that the reasons to leave Drohobych will finally outweigh the reasons to stay. Evoking Bulgakov and Singer, Biller takes us on an astounding, burlesque journey into Schulz's world, which vacillates between shining dreams and unbearable nightmares - a world which, like Schulz's own stories, prophesies the apocalyptic events to come. Includes two stories by Bruno Schulz: 'Birds' and 'The Cinnamon Shops', from The Street of Crocodiles. From the Trade Paperback edition.

The new edition of this innovative text employs insights from contemporary linguistic theories but builds them into a practical and coherent system that stays firmly rooted within traditional models. Its down-to-earth explanations about how language works are illustrated at every step with diagrams and other visual models. The examples and exercises consist of provocative and intelligent sentences, not desiccated grammar-book examples. Each chapter includes a sentence-analysis exercise with fifty problems. Answers are provided for ten sentences per chapter. A new chapter on how grammar functions in literature and how it is used to improve writing extends the applications of Doing Grammar in this second edition, which also includes new introductory chapter outlines and thoroughly revised chapter summaries. The new edition was class tested for over a year. Every page has been re-thought and redefined to make grammatical analysis clear, understandable, useful, and interesting. It will be an invaluable guide for students in introductory and advanced grammar and composition courses and for all readers seeking to discover how language works.

The economy has an increasingly powerful role in the contemporary global world. Academic scholars who study names have recognised this, and, as such, onomastic research has expanded from personal and place names towards names that reflect the new commercial culture. Companies are aware of the significance of naming. Brand, product and company names play an important role in business. Culture produces names and names produce culture. Commercial names shape cultures, on the one hand, and changes in cultures may affect commercial names on the other. The world of the economy and business has created its own culture of names, but this naming culture may also affect other names; even place names and personal names are influenced by it. Names in the Economy: Cultural Prospects is composed of 20 articles that were produced from a collection of papers presented in 2012 at the fourth Names in the Economy symposium in Turku, Finland. These articles will equally be of interest to both academics and professionals. The goal of this book is multidisciplinary and theoretically diverse: it contemplates commercial-bound names from the viewpoints of linguistics and onomastics, as well as marketing and branding research. In addition to traditional onomastic standpoints, there are newer linguistic theories, sociological and communicational views, multimodality theory, and branding theories. The authors are scholars from three continents and from ten different countries.

When Kerry McGrath- a smart, relentless prosecutor- takes her daughter to see a plastic surgeon following a car accident, she sees a woman in the surgery with a beautiful, hauntingly familiar face. On a subsequent visit, she sees the same face again- on a different woman. . . Suddenly she remembers: both woman look startlingly like Suzanne Reardon, the "Sweetheart Murder" victim whose husband, Skip, is now serving a life sentence for that murder. When Kerry starts asking questions, she discovers that just about everyone wants the case kept closed. Still she persists- but what she doesn't know is that it is already too late.

Her puzzled queries have triggered a response and she is in great, growing danger.

Python 3 is the best version of the language yet: It is more powerful, convenient, consistent, and expressive than ever before. Now, leading Python programmer Mark Summerfield demonstrates how to write code that takes full advantage of Python 3's features and idioms. The first book written from a completely "Python 3" viewpoint, Programming in Python 3 brings together all the knowledge you need to write any program, use any standard or third-party Python 3 library, and create new library modules of your own. Summerfield draws on his many years of Python experience to share deep insights into Python 3 development you won't find anywhere else. He begins by illuminating Python's "beautiful heart": the eight key elements of Python you need to write robust, high-performance programs. Building on these core elements, he introduces new topics designed to strengthen your practical expertise—one concept and hands-on example at a time. This book's coverage includes Developing in Python using procedural, object-oriented, and functional programming paradigms Creating custom packages and modules Writing and reading binary, text, and XML files, including optional compression, random access, and text and XML parsing Leveraging advanced data types, collections, control structures, and functions Spreading program workloads across multiple processes and threads Programming SQL databases and key-value DBM files Utilizing Python's regular expression mini-language and module Building usable, efficient, GUI-based applications Advanced programming techniques, including generators, function and class decorators, context managers, descriptors, abstract base classes, metaclasses, and more Programming in Python 3 serves as both tutorial and language reference, and it is accompanied by extensive downloadable example code—all of it tested with the final version of Python 3 on Windows, Linux, and Mac OS X.

This book is a straightforward introduction to linguistics for those approaching this fascinating and fast-expanding field of study for the first time.

This book offers a methodological framework for constructing and validating large-scale testing systems and fills this framework through an account of the construction and validation of one specific testing system, which relies on the construct of communicative language ability in the specific context of classroom teaching. The test is called the Test of English for Teaching Purposes (TETP) and it has been developed to assess the engagement of test takers' language proficiency in test tasks which they are likely to encounter outside the testing situation. The book handles prominent issues of the construction and validation of this test. The content is organized into three main parts. Part One presents the results of a baseline study whose focal point is the identification through empirical research of the domain in which EFL teachers use the language when they are at work. This description provides the basis for the definition of the construct of English for Teaching Purposes and, ther

Unconventional Anthroponyms: Formation Patterns and Discursive Function continues a series of collective volumes comprising studies on onomastics, edited by Oliviu Felecan with Cambridge Scholars Publishing. Previous titles in this series include Name and Naming: Synchronic and Diachronic Perspectives (2012) and Onomastics in Contemporary Public Space (2013, co-edited with Alina Bughe?iu). In contemporary naming practice, one can distinguish two verbal (linguistic) means of nominal referential identification: a "natural" one, which occurs in the process of conventional, official, canonical, standard naming and results in conventional/official/canonical/standard anthroponyms; a "motivated" one, which occurs in the process of unconventional, unofficial, uncanonical, non-standard naming and results in unconventional/unofficial/uncanonical/non-standard anthroponyms. The significance of an official name is arbitrary, conventional, unmotivated, occasional and circumstantial, as names are not likely to carry any intrinsic meaning; names are given by third parties (parents, godparents, other relatives and so on) with the intention to individualise (to differentiate from other individuals). Any meaning with which a name might be endowed should be credited to the name giver: s/he assigns several potential interpretations to

the phonetic form of choice, based on his/her aesthetic and cultural options and other kinds of tastes, which are manifested at a certain time. Unconventional anthroponyms (nicknames, bynames, user names, pseudonyms, hypocoristics, individual and group appellatives that undergo anthroponymisation) are nominal "derivatives" that result from a name giver's wish to attach a specifying/defining verbal (linguistic) tag to a certain individual. An unconventional anthroponym is a person's singular signum, which may convey a practical necessity (to avoid anthroponymic homonymy: the existence of several bearers for a particular name) or the intention to qualify a certain human type (to underline specific difference – in this case, the unconventional anthroponym has an over-individualising role – or, on the contrary, to mark an individual's belonging to a class, his/her association with other individuals with whom s/he is typologically related – see the case of generic unconventional anthroponyms).
