

100 African Americans Who Shaped American History 100 Series

The book does not attempt to tell the complete history of all the accomplishments of African American men and women featured in the book. But it is my hope that the book will become a starting point for further study of the contributions and achievements that a lot of African Americans have made in the past that helped shape American history. Many significant events and personalities in the African American's history and life portrayed in the book are respectfully highlighted as they pursued th

This comprehensive and entertaining account of African-American history is presented in a fun, engaging, and intelligent way. Significant information in six broad sections includes Great Migrations; Civil Rights and Politics; Science, Inventions, and Medicine; Sports; Military; Culture and Religion.

Meet the black inventors who lived their dreams--from the early years to modern times Benjamin Banneker Andrew Jackson Beard George E. Carruthers, Ph.D. George Washington Carver Michael Croslin, Ph.D. David Nelson Crosthwait Jr. Charles Richard Drew, M.D. Meredith Gourdine, Ph.D. Claude Harvard Shirley Ann Jackson, Ph.D. Frederick McKinley Jones Percy Lavon Julian, Ph.D. Ernest Everett Just, Ph.D. Lewis Howard Latimer Jan Earnst Matzeliger Elijah McCoy Benjamin Montgomery John P. Moon Garrett Augustus Morgan Norbert Rillieux Earl D. Shaw, Ph.D. Madame C. J. Walker Daniel Hale Williams, M.D. Granville T. Woods Jane Cooke Wright, M.D. For more than three centuries, African American inventors have been coming up with ingenious ideas. In fact, it is impossible to really know American history without also learning about the contributions of black discoverers. This collection brings their stories to life. In every era, black inventors have made people's lives safer, more comfortable, more convenient, and more profitable. This inspiring, comprehensive collection shines history's spotlight on these courageous inventors and discoverers. One by one, they persevered, despite prejudice and obstacles to education and training. These stories show you how: Benjamin Montgomery, born a slave, invented a propeller that improved steamboat navigation. Jan Earnst Matzeliger, the son of a Dutch engineer, invented a machine that revolutionized the shoe manufacturing industry. Madame C. J. Walker, born two years after the Civil War emancipated her parents, invented a product that helped make her a millionaire. Dr. George E. Carruthers, an astrophysicist, invented the lunar surface ultraviolet camera/spectrograph for Apollo 16. Dr. Jane Cooke Wright, a third-generation physician and pioneer in the field of cancer research discovered a method for testing which drugs to use to fight specific cancers. Dr. Wright became the first woman elected president of the New York Cancer Society and the first African American woman to serve as dean of a medical college. This outstanding collection brings to light these and dozens of other exciting and surprising tales of inventors and discoverers who lived their dreams.

A galvanizing history of how jazz and jazz musicians flourished despite rampant cultural exploitation The music we call "jazz" arose in late nineteenth century North America—most likely in New Orleans—based on the musical traditions of Africans, newly freed from slavery. Grounded in the music known as the "blues," which expressed the pain, sufferings, and hopes of Black folk then pulverized by Jim Crow, this new music entered the world via the instruments that had been abandoned by departing military bands after the Civil War. Jazz and Justice examines the economic, social, and political forces that shaped this music into a phenomenal US—and Black American—contribution to global arts and culture. Horne assembles a galvanic story depicting what may have been the era's most virulent economic—and racist—exploitation, as jazz musicians battled organized crime, the Ku Klux Klan, and other variously malignant forces dominating the nightclub scene where jazz became known. Horne pays particular attention to women artists, such as pianist Mary Lou Williams and trombonist Melba Liston, and limns the contributions of musicians with Native American roots. This is the story of a beautiful lotus, growing from the filth of the crassest form of human immiseration.

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways.

Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

The deliberate devaluation of Blacks and their communities has had very real, far-reaching, and negative economic and social effects. An enduring white supremacist myth claims brutal conditions in Black communities are mainly the result of Black people's collective choices and moral failings. "That's just how they are" or "there's really no excuse": we've all heard those not so subtle digs. But there is nothing wrong with Black people that ending racism can't solve. We haven't known how much the country will gain by properly valuing homes and businesses, family structures, voters, and school districts in Black neighborhoods. And we need to know. Noted educator, journalist, and scholar Andre Perry takes readers on a tour of six Black-majority cities whose assets and strengths are undervalued. Perry begins in his hometown of Wilksburg, a small city east of Pittsburgh that, unlike its much larger neighbor, is struggling and failing to attract new jobs and industry. Bringing his own personal story of growing up in Black-majority Wilksburg, Perry also spotlights five others where he has deep connections: Detroit, Birmingham, New Orleans, Atlanta, and Washington, D.C. He provides an intimate look at the assets that should be of greater value to residents—and that can be if they demand it. Perry provides a new means of determining the value of Black communities.

Rejecting policies shaped by flawed perspectives of the past and present, it gives fresh insights on the historical effects of racism and provides a new value paradigm to limit them in the future. Know Your Price demonstrates the worth of Black people's intrinsic personal strengths, real property, and traditional institutions. These assets are a means of empowerment and, as Perry argues in this provocative and very personal book, are what we need to know and understand to build Black prosperity.

"Fascinating.... Lays a foundation for understanding human history."—Bill Gates In this "artful, informative, and delightful" (William H. McNeill, New York Review of Books) book, Jared Diamond convincingly argues that geographical and environmental factors shaped the modern world. Societies that had had a head start in food production advanced beyond the hunter-gatherer stage, and then developed religion --as well as nasty germs and potent weapons of war --and ventured on sea and land to conquer and decimate preliterate cultures. A major advance in our understanding of human societies, *Guns, Germs, and Steel* chronicles the way that the modern world came to be and stunningly dismantles racially based theories of human history. Winner of the Pulitzer Prize, the Phi Beta Kappa Award in Science, the Rhone-Poulenc Prize, and the Commonwealth club of California's Gold Medal.

Since 1619, when Africans first came ashore in the swampy Chesapeake region of Virginia, there have been many individuals whose achievements or strength of character in the face of monumental hardships have called attention to the genius of the African American people. This book attempts to distill from many wonderful possibilities the 100 most outstanding examples of greatness. Pioneering scholar of African American Studies Molefi Kete Asante has used four criteria in his selection: the individual's significance in the general progress of African Americans toward full equality in the American social and political system; self-sacrifice and the demonstration of risk for the collective good; unusual will and determination in the face of the greatest danger or against the most stubborn odds; and personal achievement that reveals the best qualities of the African American people. In adopting these criteria Professor Asante has sought to steer away from the usual standards of popular culture, which often elevates the most popular, the wealthiest, or the most photogenic to the cult of celebrity. The individuals in this book - examples of lasting greatness as opposed to the ephemeral glare of celebrity fame - come from four centuries of African American history. Each entry includes brief biographical information, relevant dates, an assessment of the individual's place in African American history with particular reference to a historical timeline, and a discussion of his or her unique impact on American society.

Numerous pictures and illustrations will accompany the articles. This superb reference work will complement any library and be of special interest to students and scholars of American and African American history.

The first people of African descent to live in what is now South Carolina, enslaved people living in the sixteenth century Spanish settlements of San Miguel de Gualdape and Santa Elena, arrived even before the first permanent English settlement was established in 1670. For more than 350 years South Carolina's African American population has had a significant influence on the state's cultural, economic, and political development. *101 African Americans Who Shaped South Carolina* depicts the long presence and profound influence people of African descent have had on the Palmetto State. Each entry offers a brief description of an individual with ties to South Carolina who played a significant role in the history of the state, nation, and, in some cases, world. Drawing upon the landmark text *The South Carolina Encyclopedia*, edited by Walter Edgar, the combined entries offer a concise and approachable history of the state and the African Americans who have shaped it. A foreword is provided by Walter Edgar, Neuffer Professor of Southern Studies Emeritus and Distinguished Professor Emeritus of History at the University of South Carolina.

This richly illustrated packet vividly details African Americans' quest for civil rights in twentieth century America. Students will learn about the role of African Americans in the nation's wars, the Harlem Renaissance, the beginnings of the civil rights era, and more. Lively portraits of key cultural and political figures such as W. E. B. Du Bois and Booker T. Washington make clear the enormous contributions of blacks in America. Tests, answer key, and bibliography are included.

Paintings and brief accounts present the accomplishments of twenty leading African Americans from Frederick Douglass to the present, including reformers, athletes, artists, and remarkable individuals in other fields.

In this landmark effort to understand African American people in the New World, Gunnar Myrdal provides deep insight into the contradictions of American democracy as well as a study of a people within a people. The title of the book, 'An American Dilemma', refers to the moral contradiction of a nation torn between allegiance to its highest ideals and awareness of the base realities of racial discrimination. The touchstone of this classic is the jarring discrepancy between the American creed of respect for the inalienable rights to freedom, justice, and opportunity for all and the pervasive violations of the dignity of blacks. The appendices are a gold mine of information, theory, and methodology. Indeed, two of the appendices were issued as a separate work given their importance for systematic theory in social research. The new introduction by Sissela Bok offers a remarkably intimate yet rigorously objective appraisal of Myrdal—a social scientist who wanted to see himself as an analytic intellectual, yet had an unbending desire to bring about change. 'An American Dilemma' is testimonial to the man as well as the ideas he espoused. When it first appeared 'An American Dilemma' was called "the most penetrating and important book on contemporary American civilization" by Robert S. Lynd; "One of the best political commentaries on American life that has ever been written" in *The American Political Science Review*; and a book with "a novelty and a courage seldom found in American discussions either of our total society or of the part which the Negro plays in it" in *The American Sociological Review*. It is a foundation work for all those concerned with the history and current status of race relations in the United States.

NATIONAL BOOK CRITICS CIRCLE AWARD WINNER • The first full history of Black America's shocking mistreatment as unwilling and unwitting experimental subjects at the hands of the medical establishment. No one concerned with issues of public health and racial justice can afford not to read this masterful book. "[Washington] has unearthed a shocking amount of information and shaped it into a riveting, carefully documented book." —New York Times From the era of slavery to the present day, starting

with the earliest encounters between Black Americans and Western medical researchers and the racist pseudoscience that resulted, *Medical Apartheid* details the ways both slaves and freedmen were used in hospitals for experiments conducted without their knowledge—a tradition that continues today within some black populations. It reveals how Blacks have historically been prey to grave-robbing as well as unauthorized autopsies and dissections. Moving into the twentieth century, it shows how the pseudoscience of eugenics and social Darwinism was used to justify experimental exploitation and shoddy medical treatment of Blacks. Shocking new details about the government's notorious Tuskegee experiment are revealed, as are similar, less-well-known medical atrocities conducted by the government, the armed forces, prisons, and private institutions. The product of years of prodigious research into medical journals and experimental reports long undisturbed, *Medical Apartheid* reveals the hidden underbelly of scientific research and makes possible, for the first time, an understanding of the roots of the African American health deficit. At last, it provides the fullest possible context for comprehending the behavioral fallout that has caused Black Americans to view researchers—and indeed the whole medical establishment—with such deep distrust.

#1 New Release in Cultural Heritage ? Making a Better America Black Americans who have shaped their country and beyond: We are familiar with a handful of African Americans who are mentioned in American history books, but there are also countless others who do not get recognized in mainstream media. Their actions may not have appeared to shake the world, but their contributions to shifting American culture were just as groundbreaking. There's more than one way to make a difference: The achievements of the Black Americans included in this book range from athletic to artistic, literary to scientific. Their biographies vary greatly, but each one contributes to the course of Black history and its influence on the greater world. Their stories encourage readers, especially teenage boys and girls, to find their own path to change. Celebrate the successes made possible by diversity: African Americans have made history by challenging and changing the American landscape. This was accomplished not by shedding layers of originality, but by wearing their colors proudly and openly in the world. Growth has been made possible by a resistance to conformity and a fusing of cultures, African and American alike. Monique L. Jones's *The Book of Awesome Black Americans* is more than a Black history book. It's a celebration of Black people. In this book, you will find: • Amazing role models who brought on change by using their gifts and passions to overcome societal barriers • Stories mainstream media failed to mention that are sure to inspire, motivate, and educate readers of all backgrounds • Testimonies that demonstrate how American culture thrives when it celebrates diversity and promotes inclusiveness If you enjoyed books such as *100 African-Americans Who Shaped American History*, *Bedtime Inspirational Stories*, or Becca Anderson's *The Book of Awesome Women*, then *The Book of Awesome Black Americans* should be your next read!

"*American Black History*" is a concise yet thorough treatment of 500 years of African American history from its origins in the civilizations of Africa through the grim early years in America and the quest for freedom and civil rights. Richly illustrated, the book vividly details the rise of slavery, the abolitionist movement, the Civil War, Reconstruction, the role of blacks in the nation's wars, the Harlem Renaissance, the emergence of the civil rights era, and the arduous struggle for the full claims of citizenship. Lively portraits of key cultural and political figures such as Harriet Tubman, Sojourner Truth, Frederick Douglass, W. E. B. Du Bois, Martin Luther King, Jr., Malcolm X, and countless others make clear the enormous contributions of blacks in America. Tests, answer key, and bibliography are included.

Yes, you're familiar with Harriet Tubman and Frederick Douglass. But what about William Carney, Charlotte Forten, Francis Dumas, and 15 other African-Americans who played key roles during the War Between the States? *African-American Heroes of the Civil War* brings to light the stories and contributions of 20 individuals who made a difference during America's bloodiest conflict. Six in-depth biographies cover: Andre Cailloux William Carney Robert Smalls Frederick Douglass Harriet Tubman Charlotte Forten Fourteen additional mini-biographies capture the stories of other African-Americans who fought or worked for victory during the war. Extensive teacher materials include worksheets for building comprehension skills, suggestions for a culminating assessment project, and more. Photos, puzzles, and graphics throughout the text make *African-American Heroes of the Civil War* a complete compendium of this often overlooked facet of American history. A perfect supplement to history, ELA, and even life skills classes. See other *Heroes of the Civil War* titles

When the images of desperate, hungry, thirsty, sick, mostly black people circulated in the aftermath of Hurricane Katrina, it became apparent to the whole country that race did indeed matter when it came to government assistance. In *The Wrong Complexion for Protection*, Robert D. Bullard and Beverly Wright place the government response to natural and human-induced disasters in historical context over the past eight decades. They compare and contrast how the government responded to emergencies, including environmental and public health emergencies, toxic contamination, industrial accidents, bioterrorism threats and show that African Americans are disproportionately affected. Bullard and Wright argue that uncovering and eliminating disparate disaster response can mean the difference between life and death for those most vulnerable in disastrous times.

What do all these people have in common: the first man to die in the American Revolution, a onetime chief of the Crow Nation, the inventors of peanut butter and the portable X-ray machine, and the first person to make a wooden clock in this country? They were all great African Americans. For parents and teachers interested in fostering cultural awareness among children of all races, this book includes more than 70 hands-on activities, songs, and games that teach kids about the people, experiences, and events that shaped African American history. This expanded edition contains new material throughout, including additional information and biographies. Children will have fun designing an African mask, making a medallion like those worn by early abolitionists, playing the rhyming game "Juba," inventing Brer Rabbit riddles, and creating a unity cup for Kwanzaa. Along the way they will learn about inspiring African American artists, inventors, and heroes like Harriet Tubman, Benjamin Banneker, Rosa Parks, Langston Hughes, and Louis Armstrong, to name a few.

A comprehensive, entertaining look at heroes, heroines, and critical moments from African American history -- from the slave trade to the Black Lives Matter movement -- by award-winning author Jabari Asim. Jabari Asim goes beyond what's taught in the classroom to reveal a fact-filled history of African American history through politics, activism, sports, entertainment, music, and much more. You'll follow the road to freedom beginning with the slave trade and the middle passage through the abolitionist movement and the Civil War where many African Americans fought as soldiers. You'll learn how slave songs often contained hidden messages and how a 15-year-old Jamaican-born young man named Clive Campbell helped to create hip-hop in the early 1970's. You'll experience the passionate speeches, marches, and movements of the Civil Rights era along with and the sacrifices of Martin Luther King, Rosa Parks, Medgar Evers, and many others. Along the way there are dozens of profiles of political trailblazers like Shirley Chisholm, the first black woman elected to Congress in 1968; dominant athletes like Tiger Woods who, in 1995, was only the second African American to play in a Master's Golf Tournament which he went on to win in 1997; popular musicians like Miles Davis, one of the most influential artists of the twentieth century; and inspiring writers like Toni Morrison, the first African American to win the Nobel Prize in literature. Filled with beautiful illustrations by Lynn Gaines that bring these figures and events to life, plus a removable historical timeline poster, A Child's Introduction to African American History is a fascinating and comprehensive guide to this often overlooked yet immensely important part of American history.

The colorful charts, graphs, and maps presented at the 1900 Paris Exposition by famed sociologist and black rights activist W. E. B. Du Bois offered a view into the lives of black Americans, conveying a literal and figurative representation of "the color line." From advances in education to the lingering effects of slavery, these prophetic infographics —beautiful in design and powerful in content—make visible a wide spectrum of black experience. W. E. B. Du Bois's Data Portraits collects the complete set of graphics in full color for the first time, making their insights and innovations available to a contemporary imagination. As Maria Popova wrote, these data portraits shaped how "Du Bois himself thought about sociology, informing the ideas with which he set the world ablaze three years later in *The Souls of Black Folk*."

The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.
