

11th Maharashtra Board Maths 2 Sequence Solution

Kautilya, also known as Chanakya, is India's most illustrious political economist of all time. He regarded economic activity as the driving force behind the functioning of any political dispensation. In fact, he went to the extent of saying that revenue should take priority over the army because sustaining the army was possible out of a well-managed revenue system. Kautilya advocated limiting the taxation power of the State, having low rates of taxation, maintaining a gradual increase in taxation and most importantly devising a tax structure that ensured compliance. He strongly encouraged foreign trade, basing it on the premise that for a successful trade contract to be established, it had to be beneficial to all. He emphasised State control and investment in land, water and mining. Kautilya was a true statesman who bridged the gap between experience and vision. For Kautilya, good governance was paramount. He suggested built-in checks and balances in systems and procedures for the containment of malpractices. Many postulates of Kautilya's philosophy of political economy are applicable to contemporary times.

Lakhmir Singh's Science is a series of books which conforms to the NCERT syllabus. The main aim of writing this series is to help students understand difficult scientific concepts in a simple manner in easy language. The ebook version does not contain CD.

As the global economy turns more and more service oriented, Information Technology-Enabled Services (ITeS) require greater understanding. Increasing numbers and varieties of services are provided through IT. Furthermore, IT enables the creation of new services in diverse fields previously untouched. Because of the catalyzing nature of internet technology, ITeS today has become more than "Outsourcing" of services. This book illustrates the enabling nature of ITeS with its entailment of IT, thus contributing to the betterment of humanity. The scope of this book is not only for academia but also for business persons, government practitioners and readers from daily lives. Authors from a variety of nations and regions with various backgrounds provide insightful theories, research, findings and practices in various fields such as commerce, finance, medical services, government and education. This book opens up a new horizon with the application of Internet-based practices in business, government and in daily lives. Information Technology-Enabled Services works as a navigator for those who sail to the new horizon of service oriented economies.

Children are naturally inquisitive and eager to explore and learn about the world around them. It is important for their guardians, both Parents and Teachers, to satisfy their queries, and that too, in such a way that the children are able to understand and comprehend the concepts as well as learn from them. Also, there exists a gap in the level of information and knowledge provided to the children by the Parents vs. that provided by their Teachers. Discrepancies might also exist in the methodology(ies) through which the information and knowledge is relayed. This increases the possibility that the children might either not understand the concept clearly or become confused about the correct interpretation of the concepts. With these objectives in mind, and to build connectivity between the teaching methodologies by Parents and Teachers, we at Oswaal Books, have come up with this Manual for Teachers and Parents. Some benefits of using this manual are:

- It aims to aid the Teachers and Parents in simplifying the concepts studied by children as a part of their curriculum
- It equips the parents and teachers to enable the children to understand the subjects, and also evaluate their measure of understanding and creativity.
- It includes Learning and Understanding Aids along with a Lesson Plan for each Chapter
- It demonstrates Effective Teaching Techniques
- It also gives various Propositions for Step-wise Learning and Building up of Concepts

IMPORTANT FEATURES OF THE BOOK: Strictly based on latest NCERT Textbook The manual is based on the latest NCERT Textbook 6 Exploratory Learning objectives These provide explicit instructions to parents and teachers to teach their wards Effective Teaching Techniques The manual has tried and tested teaching techniques for higher success rate

WHAT THIS BOOK HAS FOR YOU: Lesson Plan for each Chapter This provides clarity and direction to the users Tabulated and Categorised information This helps in creating and effectively executing the lesson plan

5Es of Learning This Manual is based on the 5 Es of Learning: Engage, Explore, Explain, Elaborate & Evaluate

About Oswaal Books: We feel extremely happy to announce that Oswaal Books has been awarded as 'The Most Promising Brand 2019' by The Economic Times. This has been possible only because of your trust and love for us. Oswaal Books strongly believes in Making Learning Simple. To ensure student-friendly, yet highly exam-oriented content, we take due care in developing our Panel of Experts. Accomplished teachers with 100+ years of combined experience, Subject Matter Experts with unmatched subject knowledge, dynamic educationists, professionals with a keen interest in education

Rev. ed. of: Mathematics in our world / Allan G. Bluman. c2005.

From the publisher VK global publications Pvt. limited Is a household name now. Established in 1979, with more than three decades of leadership in the area of economics and commerce, we take pride in claiming that we continue with the unstirred readership in the country. Specialising in the area of economics and commerce, we are not averse to the idea of diversification. Keeping this in view, more than a decade ago, a series of 'exam idea' Was launched in all the subjects For classes IX -XII however, success of our publication is admittedly due to prudent prolific writers. We have resource-pool of reputed authors, who leave no stone unturned in bringing out the best of study material, which makes our readers versatile in their thought processes and equips them with the exam-oriented acumen. Thousands of acknowledgment and accolades that we receive every year from our readers are a good testimony to the efforts and trustworthy endeavours of our authors the book has been designed topic and subtopic-wise, keeping the students' needs in mind.

Heterogeneous catalysis plays a central role in the global energy paradigm, with practically all energy-related process relying on a catalyst at a certain point. The application of

heterogeneous catalysts will be of paramount importance to achieve the transition towards low carbon and sustainable societies. This book provides an overview of the design, limitations and challenges of heterogeneous catalysts for energy applications. In an attempt to cover a broad spectrum of scenarios, the book considers traditional processes linked to fossil fuels such as reforming and hydrocracking, as well as catalysis for sustainable energy applications such as hydrogen production, photocatalysis, biomass upgrading and conversion of CO₂ to clean fuels. Novel approaches in catalysts design are covered, including microchannel reactors and structured catalysts, catalytic membranes and ionic liquids. With contributions from leaders in the field, Heterogeneous Catalysis for Energy Applications will be an essential toolkit for chemists, physicists, chemical engineers and industrials working on energy.

The NCERT Practice Books are designed to provide additional practice to the users of the NCERT.

Rakesh plants a cherry seedling in his garden and watches it grow. As seasons go by, the small tree survives heavy monsoon showers, a hungry goat that eats most of the leaves and a grass cutter who splits it into two with one sweep. At last, on his ninth birthday, Rakesh is rewarded with a miraculous sight—the first pink blossoms of his precious cherry tree! This beautifully illustrated edition brings alive the magical charm of one of Ruskin Bond's most unforgettable tales.

Original and unabridged text of Rudyard Kipling's timeless classic. With refreshingly new illustrations. If you have ever asked, "how did the camel get his hump?" If you have ever wondered, "how did the leopard get his spots?" Then you are a very special kind of curious person who will love the answers in these books.

This Text and Atlas provides ophthalmic surgeons with the latest advances in phaco surgery. Divided into ten sections, the books guides clinicians through incision, instruments, and eyeball position for surgery, to numerous different surgical procedures including intraocular lens implantation. The text is further enhanced by high quality photographs and illustrations. The book aims to help surgeons record and analyse their own cases and learn from experience.

We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

For a number of years, the healthy and environment-friendly building material earth, in common use for thousands of years, has been enjoying increasing popularity, including in industrialized nations. In hot dry and temperate climate zones, earth offers numerous advantages over other materials. Its particular texture and composition also holds great aesthetic appeal. The author's presentation reflects the rich and varied experiences gained over thirty years of building earth structures all over the world. Numerous photographs of construction sites and drawings show the concrete execution of earth architecture. The book has been designed topic and subtopic-wise, keeping the students' needs in mind. The current edition has certain unique features: This book is strictly as per the latest CBSE syllabus and covers complete matter as per the NCERT book. After every topic, objective type questions and case studies are given based on the latest CBSE Sample Paper (2020). (Hints of their answers are given at the end of each chapter.) At the end of each chapter, 40 objective type questions (20 MCQs + 10 Fill in the blanks + 10 True/False) are given along with answers at the end. Keywords of each topic are given at the end of each topic, to help students to solve case studies. A flow chart of each chapter is given at the end to recap the topics covered in that chapter. Quick revision is given to revise all the topics in short time. At the end of each chapter, questions asked in last 7 years' board exam are given, so that the student may get an idea of what types of questions are expected from this chapter. (Hints of answers of these questions are also given). Case Studies are framed by using words strictly from the NCERT. A solved sample paper of CBSE 2020 is also given. Guidelines for project are also given. A sample project on Marketing Management is also given. The Subject Matter is presented in simple language, in points, and along with diagrams, so that the student may find it easy to understand.

Geometric constructions have been a popular part of mathematics throughout history. The first chapter here is informal and starts from scratch, introducing all the geometric constructions from high school that have been forgotten or were never learned. The second chapter formalises Plato's game, and examines problems from antiquity such as the

impossibility of trisecting an arbitrary angle. After that, variations on Plato's theme are explored: using only a ruler, a compass, toothpicks, a ruler and dividers, a marked rule, or a tomahawk, ending in a chapter on geometric constructions by paperfolding. The author writes in a charming style and nicely intersperses history and philosophy within the mathematics, teaching a little geometry and a little algebra along the way. This is as much an algebra book as it is a geometry book, yet since all the algebra and geometry needed is developed within the text, very little mathematical background is required. This text has been class tested for several semesters with a master's level class for secondary teachers.

This book arises out of Hannah Pitkin's doctoral dissertation and is considered by political scientists to be the gold standard in terms of a philosophical treatment of the subject. Pitkin covers the historical evolution of thinking about representation from the Greeks through the founding of the American republic highlighting diverse thinkers and politicians like Edmund Burke, Jeremy Bentham, and James Madison as well as more contemporary scholars like Robert Dahl and Charles Lindblom.
