"You can be lonely anywhere, but there is a particular flavor to the loneliness that comes from living in a city, surrounded by thousands of strangers. The Lonely City is a roving cultural history of urban loneliness, centered on the ultimate city: Manhattan, that teeming island of gneiss, concrete, and glass. What does it mean to be lonely? How do we live, if we're not intimately involved with another human being? How do we connect with other people, particularly if our sexuality or physical body is considered deviant or damaged? Does technology draw us closer together or trap us behind screens? Olivia Laing explores these questions by travelling deep into the work and lives of some of the century's most original artists, among them Andy Warhol, David Wojnarowicz, Edward Hopper, Henry Darger and Klaus Nomi. Part memoir, part biography, part dazzling work of cultural criticism, The Lonely City is not just a map, but a celebration of the state of loneliness. It's a voyage out to a strange and sometimes lovely island, adrift from the larger continent of human experience, but visited by many - millions, say - of souls"--

God Is Love glorifies a loving and wonderful God who sent his only Son to live, die, and conquer death for our eternal salvation. This entire work was scribed by a non-poet (me, the author) listening to secular music dictate these words of honor and praise to our God. Since these were all written listening to music they can be sung to music. This book begins with the title poem "God is Love," an all-out joyous praise of our God, and continues with "My God Called to Me," a heartfelt prayer of thanksgiving for a God that never stopped loving me. "Angels in Three Parts" experiences the angels' reactions to Christ's birth, life, and crucifixion and the future as foretold in Revelations. "In the Fullness of Time" takes the reader to a dark and sobering reflection of reality without Christ. Throughout this collection the poems explore the emotions of praise, thanksgiving, joy, hope, and peace. God Is Love is a cherished collection praising God and giving peace and comfort to the reader.

All phases of road development—from construction and use by vehicles to maintenance—affect physical and chemical soil conditions, water flow, and air and water quality, as well as plants and animals. Roads and traffic can alter wildlife habitat, cause vehicle-related mortality, impede animal migration, and disperse nonnative pest species of plants and animals. Integrating environmental considerations into all phases of transportation is an important, evolving process. The increasing awareness of environmental issues has made road development more complex and controversial. Over the past two decades, the Federal Highway Administration and state transportation agencies have increasingly recognized the importance of the effects of transportation on the natural environment. This report provides guidance on ways to reconcile the different goals of road development and environmental conservation. It identifies the ecological effects of roads that can be evaluated in the planning, design, construction, and maintenance of roads and offers several recommendations to help better understand and manage ecological impacts of paved roads.

The first thing you can count on in any collection from Mark Schultz is a kind of subject matter, featuring outre situations involving daring men and women, and, often, fearsome beasts. The second thing you can count on is his allegiance to certain graphic medium—generally brush and ink, and graphite and charcoal, but sometimes watercolor too. The third thing you can count on is that, although the subject matter and media stay consistent, his design, draftsmanship and control of his presentation are always evolving and growing. Here, in "Carbon 2," his work has become noticeably bolder—more viscerally engaging. "Carbon 2" follows its predecessor by three years, and in those years Mark's work has become something more solid, and at times almost sculptural, as he continues to refine his attempts to put to paper the visions he sees in his head. Featuring conceptual studies as well as finishes, "Carbon 2" gives us a look into that process. Of course there are plenty of lovely warrior women, including more in the Pulpette series, as well as portraits of his "Xenozoic" characters, Hannah Dundee and Jack Tenrec, negotiating dire straits. There is also sword and sorcery, ancient mythic tableaux, and otherworldly science fiction to satisfy the most diverse tastes. And there are preliminaries and rejected pieces from "Storms at Sea," and, (spoiler alert) design work and character studies from Mark's new in-progress "Xenozoic" graphic novel. Qua hoon! The large-format "Carbon 2" will feature over 50 of Mark's newest works across its pages."

Anita Lahey's second collection, *Spinning Side Kick*, is a hard-knuckled look at the other half. These lively poems mix a girl-about-town cockiness with an all-too-rare emotional honesty about men, love, and relationships. Whether the subject is a one-man chimney demolition, the lifelong fidelity of seahorses, a lover at war in Afghanistan or a kickboxing match, Lahey confronts the enduring disconnect between the sexes in a language that is slangy and quick, punctuated with jabs. She eyes those moments—in a day, in a life—when the normal clues we rely on disappear, shifting the line between domesticity and danger. In *Spinning Side Kick*, a talented poet returns with sharper aim.

An unprecedented examination of the impact of fashion on society in France throughout the Great War This fascinating exploration of French women's fashion during World War I is the first in-depth consideration of the role that fashion played in the upheaval of French society between 1914 and 1918. As the fashion industry--the second largest industry in the country--mobilized to help the war effort, Parisian couture houses introduced new styles, aggressively disseminated information through magazines, and strengthened their propaganda efforts overseas. Women of

all social classes adapted their garments to the wartime lifestyle, and practicality was increasingly introduced in the form of pockets and "sportswear" textiles like jersey. While women were heralded for contributing to the war effort, the clothes they wore while doing so often provoked debates, particularly when their attire was seen as too masculine or militaristic. With focused studies of wartime garments such as skirt suits, nurse's uniforms, work overalls, and mourning clothes, this volume brings to life the passionate debates that roiled the French fashion industry and reveals the extent to which fashion was a hotly contested topic and a barometer for social tensions throughout this tumultuous era.

This study examines the crucial issue of alternatives in commercial and public support of broadcasting in the U.S. and Europe.

Biography of Soe Hok Gie, an Indonesian political activist.

This open access book deals with imaging of the abdomen and pelvis, an area that has seen considerable advances over the past several years, driven by clinical as well as technological developments. The respective chapters, written by internationally respected experts in their fields, focus on imaging diagnosis and interventional therapies in abdominal and pelvic disease; they cover all relevant imaging modalities, including magnetic resonance imaging, computed tomography, and positron emission tomography. As such, the book offers a comprehensive review of the state of the art in imaging of the abdomen and pelvis. It will be of interest to general radiologists, radiology residents, interventional radiologists, and clinicians from other specialties who want to update their knowledge in this area.

It is the age of the Pre-Raphaelite Brotherhood, when Europe burns with a passion for long, flowing locks. And when seven Irish sisters, penniless and fatherless, grow up with hair cascading down their backs, to their ankles, and beyond, men are not slow to recognise their potential. It begins with a singing and dancing septet, but this is not what fills the seats: it is the torrents of hair they let loose at the end of each show. Their hair is a rich offering and will take the sisters out of poverty, through the dance halls of Ireland, to the salons of Dublin and the palazzi of Venice. It will bring them suitors and obsessive admirers, it will bring some of them love, and each of them loss. For their past trails behind the sisters like the tresses on their heads and their fame and fortune will come at a terrible price...

Emphasizing fundamental mathematical ideas rather than proofs, Introduction to Stochastic Processes, Second Edition provides quick access to important foundations of probability theory applicable to problems in many fields. Assuming that you have a reasonable level of computer literacy, the ability to write simple programs, and the access to software for linear algebra computations, the author approaches the problems and theorems with a focus on stochastic processes evolving with time, rather than a particular emphasis on measure theory. For those lacking in exposure to linear differential and difference equations, the author begins with a brief introduction to these concepts. He proceeds to discuss Markov chains, optimal stopping, martingales, and Brownian motion. The book concludes with a chapter on stochastic integration. The author supplies many basic, general examples and provides exercises at the end of each chapter. New to the Second Edition: Expanded chapter on stochastic integration that introduces modern mathematical finance Introduction of Girsanov transformation and the Feynman-Kac formula Expanded discussion of Itô's formula and the Black-Scholes formula for pricing options New topics such as Doob's maximal inequality and a discussion on self similarity in the chapter on Brownian motion Applicable to the fields of mathematics, statistics, and engineering as well as computer science, economics, business, biological science, psychology, and engineering, this concise introduction is an excellent resource both for students and professionals.

This set reissues two volumes entitled A Book of Broadsheets and A Second Book of Broadsheets, both with introductions by Geoffrey Dawson, a former editor of The Times. Together, the books make up an anthology of the 1915 broadsheets distributed by The Times to members of H.M. Forces serving in the trenches of World War I. The volumes contain a wide variety of rich literature from before the war.

"This book is the first of its kind to study the impact that the Great War had on fashion, the fashion industry and civilians in a transnational context"--

The United States imports and exports more merchandise than any other country. This book covers the "nuts and bolts" of laws administered by U.S. Customs and Border Protection (CBP), the agency charged with regulating imports into the U.S. and collecting duties, import fees, and related taxes. The book also covers the entry and record-keeping process for imports; intellectual property protection; CBP's penalty regime; the use of preferential trade programs; marking requirements; and the relationship of income tax transfer pricing rules in determining how inter-company pricing impacts declared customs values and, thus, global corporate income taxes. The system of judicial review by the U.S. Court of International Trade and U.S. Court of Appeals for the Federal Circuit is also covered. Finally, the book summarizes the requirements of 47 other federal agencies that CBP is charged with administering and enforcing with respect to imported merchandise.
