It gives me a great pleasure and satisfaction to present this book “FINANCE AND ACCOUNTING”. The main characteristics of the book are simple understanding and key concepts. The following important highlights in this book will make the users to read this book. i. I have illustrated Accounting cycle steps by creating 42 transactions, given the journal entries for these 42 transactions, prepared all the various ledger accounts from these journal entries, preparation of Trial balance has done with these ledger account balances and finally, prepared the final accounts (Trading, Profit and loss account and Balance sheet) based on the Trial balance. Hence, I conclude that the end-to-end process of Accounting cycle with data interpretation has done in this book which will help the readers to understand that “where can we get the amounts which are appear in trial balance). ii. I have evaluated 45 ratios based on latest financial statements of a leading manufacturing company for the financial year ended December 2019. iii. Clear presentation of financial statements analysis have done in this book. iv.

associated with accounting or non-accounting jobs. Considering the fundamentals and the practical implication of accounting procedures and methods, the Third Edition of the book has been enlarged further by adding three more chapters on Fund Flow Statement, Cash Flow Statement Analysis and Accounts of Non-trading Concerns. In view of the need of the current business scenario, these topics are introduced to help students learn new dimensions of the subject and to apply it to workplace scenario. The book is especially designed for the undergraduate students of computer application (BCA) and business administration (BBA). It is also useful for the postgraduate students of business administration (MBA).

Decision-making is a pivotal function of any manager. A knowledge of Accounting, insofar as it affects decision-making, is very important for a manager. And very often, students find Accounting as one of the 'tough' subjects to handle. This book strives to make Accounting intelligible and easily comprehensible to students. The text gives a comprehensive coverage of the three branches of Accounting – Financial Accounting, Management Accounting, and Cost Accounting. It focuses on the various methods and techniques followed in the Management Reporting System. The text deals, in detail, with various accounting transaction procedures, methods of costing, ratio analysis, budgeting, forecasting, accounting errors, funds flow and cash flow statements, trial balance and balance sheet, and so on. It equips the students with the knowledge in the preparation, analysis, evaluation, and interpretation of financial statements, which will enrich their managerial competence and decision-making skills. KEY FEATURES ? Emphasises the various accounting and decision-making techniques. ? Provides a number of problems and their solutions, besides giving notes, working notes, and exercises, to help the students understand the concepts better. This book is intended as a text for the

postgraduate students of Management (MBA/MIB), financial courses (MFC), and undergraduate and postgraduate students of Commerce and those pursuing MCA. In addition, the book will be very useful to practising managers who wish to develop effective and result-oriented decision-making skills.

Financial Accounting for Managers is a popular book in the subject domain that enables the readers to understand the basics of accounting in a clearer and better perspective. The book is written in a 'learn through example' approach to provide conceptual clarity and to bring accounting in practice. This new edition is thoroughly updated as per provisions of latest Companies Act, Indian Accounting Standards (Ind AS), and International Financial Reporting Standards. It also provides new and updated cases and MS Excel templates to build the concepts in financial accounting from a decision-making perspective. With the help of updated text, problems, illustrations and examples, the book will be equally useful for graduate students of management, practicing managers, as well as for a novice dealing with management and investments. Salient Features: (a) Follows a 'learning through examples' approach throughout the book (b) All chapters and teacher notes have been carefully revised and updated by the author with the help of two practicing Chartered Accountants, thus bringing their practical expertise in subject (c) Over 100 real life corporate cases, to bridge the gap between theory and application part of the subject. (d) Over 55 QR code enabled study material embedded with the text throughout the book for additional learning (e) Each chapter is further supplemented with exhaustive web resources that include various annexures, additional reading material, auxiliary test material, etc.

Willard J. Graham (1897-1966) was an important contributor to both accounting thought and

education and he pioneered life-long education for executive business that is still emulated today. This volume collects 25 of his key writings which shed light on his contributions to management accounting and business education as well as the accounting profession. Financial accounting is the branch of accounting thought and practice concerned with preparing and providing information for external users of financial statements. This textbook helps students to understand the concepts that underpin the application of accounting theory to solve accounting problems. This international edition includes extracts from financial statements, definitions of key terms and exam examples. Unlike other textbooks, the author provides analysis of why accountants do what they do, and not just how. With such a wealth of accounting models and diagrams intertwined with this analysis, this book guides the reader through all the practicalities and concepts of financial accounting. Additional online questions, exercises and problems provide an opportunity to put this new-found knowledge into practice along the way. This book is an essential guide for students new to accountancy, and an equally useful tool for more experienced students and researchers.

of the accounting function as a significant and integral requirement of each organization and institution as well as its purpose in the current society we live in today. This entails the analysis of the users of accounting information, the various branches of accounting and the relevance of this information to various stakeholders in the society that surround and support organizations and institutions. Accounting, in itself is a fundamental part of the information systems of organizations today. This is because there are various parties in the society that need this information apart from the managers and owners of the organizations and institutions. Furthermore, accounting is now regarded as a service function of organizations and the society in general. This is because as an informative function of organizations, it enables various users to make relevant and valid decisions of an economic and financial viewpoint.
