History and the speculative collide with the modern world when a group of high school girls form a secret society after discovering they can communicate with boys from the past, in this powerful look at female desire, jealousy, and the shifting lines between friendship and rivalry. After her life is upended by divorce and a cross-country move, 16-year-old Saskia Brown feels like an outsider at her new school—not only is she a transplant, but she’s also biracial in a population of mostly white students. One day while visiting her only friend at her part-time library job, Saskia encounters a vial of liquid mercury, then touches an old daguerreotype—the precursor of the modern-day photograph—and makes a startling discovery. She is somehow able to visit the man in the portrait: Robert Cornelius, a brilliant young inventor from the nineteenth century. The hitch: she can see him only in her dreams. Saskia shares her revelation with some classmates, hoping to find connection and friendship among strangers. Under her guidance, the other girls steal portraits of young men from a local college’s daguerreotype collection and try the dangerous experiment for themselves. Soon, they each form a bond with their own “Mercury Boy,” from an injured Union soldier to a charming pickpocket in New York City. At night, the girls visit the boys in their dreams. During the day, they hold clandestine meetings of their new secret society. At first, the Mercury Boys Club is a

thrilling diversion from their troubled everyday lives, but it's not long before jealousy, violence and secrets threaten everything the girls hold dear.

51 BC. In the aftermath of the dreadful siege of Alesia the tribes of Gaul lie broken and sparse, and yet the fires of rebellion still burn in the hearts of a few. As Caesar and his army continue to pacify the land wherever revolt can be found, a new conspiracy is rising. Lucterius of the Cadurci, survivor of Alesia, seeks to raise a new great revolt, building an army in his homeland while a small group of dangerous warriors embark upon a secret and dangerous mission to rebuild all that was lost in that great siege. Meanwhile, Marcus Falerius Fronto tries to adjust to life as a wine merchant in Massilia, little suspecting that old friends and new will soon be fighting alongside him as the last great threat from Gaul is brought right to his door. The final battle for Gaul is about to begin.

This book investigates China's emergence as an outside player in SSA over the last several decades and the current understanding of the impact of Beijing's growing presence on the continent, including several case studies focused on specific SSA countries. China's accelerating economic and political engagement with sub-Saharan Africa (SSA) has gained growing attention in political and academic circles as a topic of both praise and derision. China has become the standard bearer of rising powers emerging from the developing world, and has begun to make inroads in its effort to secure strategic natural resources in a region traditionally dominated by the status quo powers of the West. Publications concerning Sino-African relations have increased rapidly over the last decade. Instead of asking whether or not China's role in SSA is a positive for the continent's political, economic and social development, this book focuses on often overlooked African publics and how they perceive China's engagement.

Moreover, instead of constructing a uniform “China meets Africa” narrative, this work examines China’s presence in sub-Saharan Africa on a country-by-country basis, accounting for the intensity of Chinese engagement, the country’s domestic political institutions, and the way in which political entrepreneurs within these systems choose to utilize Chinese involvement as an instrument of political mobilization. It will be of interest to scholars and policy-makers concerned with Africa and China's development and international relations. ?

On an otherwise serene 1989, June night, FBI agents are hustling to load up two large tractor-trailers. Their cargo is unusual. It consists of heavy filing cabinets, laboratory equipment, and chattering chimpanzees. Their motivation is far from altruistic. Their target of the operation is Doctor Cyrus Markum, a brilliant microbiologist. With the fortune bequeathed by his former life-partner, he's

funded the research project that has created Formula Thirteen, the vaccine that will thwart the virus causing AIDS. The Feds are far from enthused with his initiative. They dispatch their agents to eradicate any trace of the lifesaving antibodies and emasculate its creator. The pompous autocrats have gravely miscalculated. They've unleashed a ravenous lion. Doctor Markum chooses Daniel Dundee, a televangelist, as the pivot point in his blueprint of retribution and convinces the Bavarian Illuminati that the time has arrived for their all-encompassing revolution. The TV broadcast of the "New Age Messiah's" assassination will be the tipping point for the scheme, which will cause a chain reaction that will lead to the New World Order's absolute planetary domination. The Doctor's enterprise is expansive and ingenious, but the Illuminati's Trilateral Commission has a strategy of their own.

But with time and prayer, that tragedy will become a testimony of how great God can be, if we just believe.
