

Australia Accounting Principles

Success in Corporate Accounting starts here The first Pearson edition of Corporate Accounting in Australia provides comprehensive coverage of the latest company accounting principles, practices and issues in a very accessible manner, while delivering enhanced pedagogy and lecturer support. The aim is to ensure that students don't feel daunted by the technical detail, but at the same time develop an understanding of the core principles that underpin contemporary professional practice. It has been written to help students succeed in what is traditionally a very demanding subject.

"The 5th edition of Management Accounting: Principles and Applications helps students master the complexity of cost and management accounting. Using a clear, concise writing style, logical structure and current accounting standards, the text focuses on the information students need to complete their course."--Publisher's website.

Issues in Financial Accounting addresses the controversial issues in financial accounting that have been debated by the preparers, users, auditors and regulators of financial statements. Henderson provides the best balance of technical and theoretical coverage in any Financial Accounting text on the market today, with its presentation of real-world examples, current debates and the underlying rationale for the accounting concepts demonstrated. Throughout the text, academic studies and professional accounting research are referenced to also provide a critical understanding of historical debates in financial accounting. The new 15th edition covers significant recent developments to the accounting standards in Australia and is based on the AASB standards and interpretations that have been issued up to the end of 2012. This includes the Australian Accounting Standard Board's (AASB) program of changes to make accounting standards equivalent to International Financial Reporting Standards.

The Australian Practical Accounting Guide introduces fundamental accounting principles for decision makers. The aim of the book is to make readers aware of the role and importance of financial information within an organisation, and to set the platform for understanding financial implications of business decisions. The main purpose of accounting is to provide financial information for users inside an organisation (usually various levels of management) and those external to the organisation (often shareholders, creditors and the government) to assist these stakeholders in making sound economic decisions. Many people with limited knowledge of accounting must interpret financial data. Accounting plays a significant role in society and, in a broad sense, everyone is affected by accounting information. The book has been deliberately written using simple, easy-to-understand language, so that readers with a non-accounting background will find it easy to understand. The book is practical in nature and contains numerous worked examples, diagrams, flowcharts and commonly asked questions at the end of each chapter. Extracts are taken from listed Australian companies, such as JB Hi-Fi, Qantas, Virgin Australia, Wesfarmers, Myer Holdings, Woolworths, Flight Centre and The Reject Shop to bring to life the accounting concepts discussed throughout the book and to provide a practical application of the accountancy principles contained in each chapter. Also included is a list of useful websites, a year-end checklist for bookkeepers and accountants and a comprehensive glossary of commonly used accounting and tax terms. This guide will be useful, interesting and informative for students completing an accounting unit.

The Global Accounting History four volume set aims to establish a benchmark reference source that covers the evolution of accounting, financial reporting and related institutions for all major economies in the world in a comparable way. Volume Three considers six nations from Asia and Oceania, including Australia, China, India, Indonesia, Japan, and the Republic of Korea. The volume is informed by the knowledge of various regional specialists, who act as authors for each chapter.

Understanding Australian Accounting Standards reflects the reporting and disclosure

requirements under a number of Australian Accounting Standards, providing detailed illustration on how publicly listed companies report in accordance with Australian Accounting Standards. This textbook offers students a comprehensive and well written introduction to the scope and financial reporting disclosures of Australian accounting standards issued by the Australian Accounting Standards Board. The text incorporates extracts from the 2011 annual report of Billabong International, as well as media articles profiling its recent corporate events, in all chapters to illustrate how a corporate entity measures, recognises, reports and discloses financial information required under Australian accounting standards. The integration of the Billabong International annual report will enable students to look beyond the numbers to develop interpretative and critical evaluation skills of accounting information. The integration of the Billabong 2011 annual report, with its disclosure notes, will provide students with a deep understanding of the financial reporting and business activity associated with the financial performance of a well-known company.

This book provides a clear outline of the key principles underlying property valuation and the current techniques and issues in the practice of valuation for the major sectors of the Australian real estate market. Formerly titled Valuation Principles and Practice, this entirely new third edition comprises Australia's leading advanced valuation textbook. The first part of the book, Principles of valuation, comprises chapters written by globally recognised academics and specialists on the principles of law, economics, planning, policy and finance, all in the context of property valuation. The second part of the book, Practice of valuation, comprises chapters written by acknowledged expert valuers on the practice of valuation for key property sectors including residential, retail, commercial, industrial, leisure and rural. Further, chapters also cover valuations for purposes including lending, insurance, rating, taxation and financial reporting. The most

up to date valuation text for the Australian market, this book will appeal to both valuation practitioners and undergraduate/postgraduate students as well as to accountants, lawyers and professionals dealing with property valuation issues. This title, first published in 1972, examines five countries that have experience with programs designed to improve the quality of financial reporting. Zeff devotes separate chapters to the historical evolution of the program, and then goes on to compare and analyse the various trends. This book presents an important piece of research to those concerned with the development of accounting principles.
