Prosody: Models and Measurements is the fruit of a three-day workshop held in Paris in April, 1982. The workshop was one of a series which is sponsored by the Maison des Sciences de l'Homme under the auspices of the European Psycho linguistics Association, and which aims to bring together workers in a particular field from different European laboratories and to encourage future collaboration across regional, national and disciplinary boundaries. Thus the topic of the workshop - "Prosody" - was fairly liberally interpreted in the invitations, and the participants were drawn from a variety of background- linguistics, phonetics, psychology. Despite this diversity, however, there was a surprising degree of congruence in the topics discussed and points of view adopted. We have attempted in the introduction to the present volume to as well as to account for the draw out the similarities between approaches, differences and to set the individual contributions against the background of current research in the field. The book is not merely a transcript of what was said during the sessions. All of the papers have been rewritten by the participants - in some cases extensively - to reflect the comments that were made in discussion and the points of contact and disagreement that became evident during the three days.

Frog is not content to be just a plain green frog, he wants to do the things his friends can do. He tries to fly like Duck, to bake cakes like Pig and to read like Hare. But all his attempts are doomed to failure, and Frog is disconsolate, until Hare points out that his friends love him just the way he is. And in any case, he can swim and leap better than any of them! 'Frog is an inspired creation - a masterpiece of graphic simplicity.' - Guardian

In the study of bilingualism, the lexical level of language is of prime importance because, in practical terms, vocabulary acquisition is an essential prerequisite for the development of skill in language use; from a theoretical point of view, the mental lexicon, as a bridge between form and meaning, plays a crucial role in any model of language processing. A central issue in this volume is at which level of the bilingual speaker's lexicon languages share representations and how language-specific representations may be linked. The contributors favor a dynamic, developmental perspective on bilingualism, which takes account of the change of the mental lexicon over time and pays considerable attention to the acquisition phase. Several papers deal with the level of proficiency and its consequences for bilingual lexical processing, as well as the effects of practice. This discussion raises numerous questions about the notion of (lexical) proficiency and how this can be established by objective standards, an area of study that invites collaboration between researchers working from a theoretical and from a practical background.

This book offers 150 12-lead ECGs and rhythm strips, each with a clinical case history and question. The full ECG is reproduced and a study of it with the case history should be enough to give an answer. On the back the case is examined, with a description of the main features of the ECG along with a clinical interpretation and a "what to do" section. The cases are graded in difficulty. The unique page size allows presentation of all 12-lead ECGs across a single page for clarity. Several of the cases incorporate chest X-rays and coronary angiograms illustrating the appearances that are associated with various cardiac conditions. All the cases are graded in difficulty and are cross-referenced to the new editions of ECG Made Easy and ECG in Practice for further information. For this Fourth Edition over 30 new ECGs have been included, mainly to provide clearer examples, though the book deliberately retains some technically poor records to maintain a 'real-world' perspective.

This compelling narrative goes behind the scenes with the world's most important living artists to humanize and demystify contemporary art. The best-selling author of *Seven Days in the Art*

World now tells the story of the artists themselves—how they move through the world, command credibility, and create iconic works. *33 Artists in 3 Acts* offers unprecedented access to a dazzling range of artists, from international superstars to unheralded art teachers. Sarah Thornton's beautifully paced, fly-on-the-wall narratives include visits with Ai Weiwei before and after his imprisonment and Jeff Koons as he woos new customers in London, Frankfurt, and Abu Dhabi. Thornton meets Yayoi Kusama in her studio around the corner from the Tokyo asylum that she calls home. She snoops in Cindy Sherman's closet, hears about Andrea Fraser's psychotherapist, and spends quality time with Laurie Simmons, Carroll Dunham, and their daughters Lena and Grace. Through these intimate scenes, *33 Artists in 3 Acts* explores what it means to be a real artist in the real world. Divided into three cinematic "acts"—politics, kinship, and craft—it investigates artists' psyches, personas, politics, and social networks. Witnessing their crises and triumphs, Thornton turns a wry, analytical eye on their different answers to the question "What is an artist?" *33 Artists in 3 Acts* reveals the habits and attributes of successful artists, offering insight into the way these driven and inventive people play their game. In a time when more and more artists oversee the production of their work, rather than make it themselves, Thornton shows how an artist's radical vision and personal confidence can create audiences for their work, and examines the elevated role that artists occupy as essential figures in our culture.

The contributions to this volume by H.W. Dechert, A.K. Fathman, F. Grosjean, D.C. O'Connell, M. Raupach, K. Sajavaara/J. Lehtonen, H.W. Seliger and R. Wiese all deal with speech data from native speakers of different languages, or native speakers and language learners of the same language, or speakers in their native and their second languages. They are the results of

various methodological attempts to assess speech using a cross-linguistic approach and represent an area of research which may be called «Contrastive Psycholinguistics».
