With the aim to write the history of Christianity in Scandinavia with Jerusalem as a lens, this book investigates the image – or rather the imagination – of Jerusalem in the religious, political, and artistic cultures of Scandinavia through most of the second millennium. Jerusalem is conceived as a code to Christian cultures in Scandinavia. The first volume is dealing with the different notions of Jerusalem in the Middle Ages. Tracing the Jerusalem Code in three volumes Volume 1: The Holy City Christian Cultures in Medieval Scandinavia (ca. 1100–1536) Volume 2: The Chosen People Christian Cultures in Early Modern Scandinavia (1536–ca. 1750) Volume 3: The Promised Land Christian Cultures in Modern Scandinavia (ca. 1750–ca. 1920)

Maurice Blanchot (1907–2003) was one of the most important writers of the twentieth century. His novels, shorter narratives, literary criticism, and fragmentary texts exercised enormous influence over several generations of writers, artists, and philosophers. In works such as *Thomas the Obscure*, *The Instant of my Death*, *The Writing of the Disaster*, *The Unavowable Community*, Blanchot produced some of the most incisive statements of what it meant to experience the traumas and turmoils of the twentieth century. As a journalist and political activist, Blanchot had a public side that coexisted uneasily with an inclination to secrecy, a refusal of interviews and photographs, and a reputation for mysteriousness and seclusion. These public and private Blanchots came together in complicated ways at some of the twentieth century's most momentous occasions. He was among the public intellectuals participating in the May '68 revolution in Paris and helped organize opposition to the Algerian war. During World War II, he found himself moments away from being executed by the Nazis. More controversially, he had been active in far-right circles in the '30s. Now translated into English, Christophe Bident's magisterial, scrupulous, much-praised critical biography provides the first full-length account of Blanchot's itinerary, drawing on unpublished letters and on interviews with the writer's close friends. But the book is both a biography and far more. Beyond filling out a life famous for its obscurity, Bident's book will transform the way readers of Blanchot respond to this major intellectual figure by offering a genealogy of his thought, a distinctive trajectory that is at once imaginative and speculative, at once aligned with literary modernity and a close companion and friend to philosophy. The book is also a historical work, unpacking the 'transformation of convictions' of an author who moved from the far-right in the 1930s to the far-left in the 1950s and after. Bident's extensive archival research explores the complex ways that Blanchot's work enters into engagement with his contemporaries, making the book also a portrait of the circles in which he moved, which included friends such as Georges Bataille, Marguerite Duras, Emmanuel Levinas, Michel Foucault, and Jacques Derrida. Finally, the book traces the strong links between Blanchot's life and an oeuvre that nonetheless aspires to anonymity. Ultimately, Bident shows how Blanchot's life itself becomes an oeuvre—becomes a literature that bears the traces of that life secretly. In its even-handed appraisal, Bident's sophisticated reading of Blanchot's life together with his work offers a much-needed corrective to the range of cruder accounts, whether from Blanchot's detractors or from his champions, of a life too easily sensationalized. This definitive biography of a seminal figure of our time will be essential reading for anyone concerned with twentieth-century literature, thought, culture, and politics.

The Middle East in Modern World History focuses on the history of this region over the past 200 years. It examines how global trends during this period shaped the Middle East and how these trends were affected by the region's development. Three trends from the past two centuries are highlighted: The region as a strategic conduit between East and West The development of the region's natural resources, especially oil The impact of a rapidly globalizing world economy on the Middle East

Inspired by non-fiction volumes of essays, this volume is a compilation not of scholarly text, but instructional vignettes of educators from all sectors sharing the greatest lesson they learned from their mentor that was never taught, but was rather observed.

A leader in the field presents a cohesive narrative of world history that effectively addresses the main challenge of the introductory survey: how to navigate beginning students through the vast detail of the subject. McNeill uses connective webs—along which trade, religious beliefs, technologies, pathogens, and much else traveled—to organize details and

keep the big picture in view. Students emerge with clear takeaways and a strong sense of the basic dynamics of world history. Together with digital resources that amplify the webs approach and highlight diverse types of evidence, John McNeill's *The Webs of Humankind* offers a clear and effective teaching tool for the world history survey course. *History of the Akkadian Language* offers a detailed chronological survey of the oldest known Semitic language and one of history's longest written records. The outcome is presented in 26 chapters written by 25 leading authors.

In this major scholarly study of the life of Joseph A. Schumpeter, one of the great intellectual figures of the twentieth century, the distinguished economist Wolfgang Stolper delves into the mind of his former teacher, exploring the development of his ideas and, especially, their influence on politics and public policy. After reflecting briefly on Schumpeter the man, Stolper explains the evolution of Schumpeter's work, particularly his insights during the 1920s on public finance, his contributions to monetary theory and the study of business cycles, and his writings on socialism. Stolper goes on to describe and evaluate Schumpeter's public activities following World War I and his role as a finance minister, placing the development of his thought in the turbulence political context of his times. Drawing on a vast array of new and exciting sources, Stolper paints a portrait of his mentor as a decent, ambitious, and complex man whose many insights into economy and society found their way outside of the academy and into the practical world of economic policy. All readers interested in the history of economic thought and twentieth-century political and intellectual history will find this book invaluable. Wolfgang Stolper is Professor Emeritus of Economics at the University of Michigan. He is author of *The Structure of the East German Economy and Planning Without Facts* and has made seminal contributions to international economics. Originally published in 1994. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. A critical reading of both literary and non-literary German texts published between 1490 and 1540 exposes a populist backlash against perceived social and political disruptions, the dramatic expansion of spatial and epistemological horizons, and the growth of global trade networks. These texts opposed the twin phenomena of pluralization and secularization, which promoted a Humanist tolerance for ambiguity, boosted globalization and spatial expansion around 1500, and promoted new ways of imagining the world. Part I considers threats to the political order and the protestations against them, above all a vigorous defense of the common good. Part II traces the intellectual and epistemological upheaval triggered by the spatial discoveries and the new methods of visual and verbal representation of space. Part III examines the nationalistic backlash triggered by the rising global trade and related abusive trading practices and by

perceived undue foreign influences. It is the basic premise of this book that the texts examined here protested the observed disruptions of the status quo and sought to reestablish a stable imperial order in the face of political and social upheaval and of the felt cultural decline of the German nation.

Traditions & Encounters offers an inclusive vision of the global past—one that is meaningful and appropriate for the interdependent world of contemporary times. Given the diversity of human societies, gathering and organizing the sheer mass of information in a meaningful way is a daunting challenge for any world history survey course. The seven-part chronological organization enables students to understand the development of the world through time, while also exploring broader, big-picture thematic issues in world history. Through new and revised chapter-level and part-level features, the hallmark twin themes of traditions and encounters emerge in greater clarity than ever before in this sixth edition. As a result, students have resources that enable them to move beyond the facts of history and examine the past critically, analyze causes and effects, and recognize similarities and differences across world regions and time periods. By digging deeper into the implications of world history's stories—not just the who, the what, and the where, but also the why and the how—students can make sense of the human past. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective.

Two major dividing lines have formed the megastructure of Eurasia, determining the historical epochs of the continent's peoples. The first, vertical (longitudinal) line has separated East and West since the Paleolithic Age. The East was dominated by Mongol peoples speaking Sino-Tibetan, Manchu-Tungus, and Altaic languages. The Caucasoid peoples of the West spoke mostly Indo-European, Semite, and Finno-Ugric languages. The second line divided the continent horizontally (by latitude) into North and South. This division was closely connected with the Eurasian Steppe Belt. To the north of it lay the world of hunter-gatherers and fishermen. To the south, settled agriculture was dominant. The Steppe Belt itself was the domain of pastoralists, the nomadic and semi-nomadic herders. These lines converged at the entrance to the Great Silk Road. With the swift development of horse domestication and horseback riding, the nomads

moved--from the Early Metal Age (500-400 BCE) to Genghis Khan's and the Genghisid's Great Empire (1200-1400 CE)--to the forefront of Eurasian history as their world became increasingly involved in dramatic and sometimes tragic relationships with their southern neighbors. This book focuses on the tangle of problems in these nomadic peoples' history.

Where would we be without conversation? Throughout history, conversations have allowed us to see different perspectives, build ideas, and solve problems. Conversations, particularly academic conversations ... push students to think and learn in lasting ways. Academic conversations are back-and-forth dialogues in which students focus on a topic and explore it by building, challenging, and negotiating relevant ideas. [The] authors ... have identified five core communication skills to help students hold productive academic conversations across content areas. These skills are: elaborating and clarifying, supporting ideas with evidence, building on and/or challenging ideas, paraphrasing and synthesizing. This books shows teachers how to weave the cultivation of academic conversation skills and conversations into current teaching approaches.

E. H. Gombrich's Little History of the World, though written in 1935, has become one of the treasures of historical writing since its first publication in English in 2005. The Yale edition alone has now sold over half a million copies, and the book is available worldwide in almost thirty languages. Gombrich was of course the best-known art historian of his time, and his text suggests illustrations on every page. This illustrated edition of the Little History brings together the pellucid humanity of his narrative with the images that may well have been in his mind's eye as he wrote the book. The two hundred illustrations—most of them in full color—are not simple embellishments, though they are beautiful. They emerge from the text, enrich the author's intention, and deepen the pleasure of reading this remarkable work. For this edition the text is reset in a spacious format, flowing around illustrations that range from paintings to line drawings, emblems, motifs, and symbols. The book incorporates freshly drawn maps, a revised preface, and a new index. Blending high-grade design, fine paper, and classic binding, this is both a sumptuous gift book and an enhanced edition of a timeless account of human history.

These guidelines have been approved by the four organizations that make up the Cooperating Parties for the ICD-10-CM: the American Hospital Association (AHA), the American Health Information Management Association (AHIMA), CMS, and NCHS. These guidelines are a set of rules that have been developed to accompany and complement the official conventions and instructions provided within the ICD-10-CM itself. The instructions and conventions of the classification take precedence over guidelines. These guidelines are based on the coding and sequencing instructions in the Tabular List and Alphabetic Index of ICD-10-CM, but provide additional instruction. Adherence to these guidelines when assigning ICD-10-CM diagnosis codes is required under the Health Insurance Portability and Accountability Act (HIPAA). The diagnosis codes (Tabular List and Alphabetic Index) have been adopted under HIPAA for all healthcare settings. A joint effort between the healthcare provider and the coder is essential to achieve complete and accurate documentation, code assignment, and reporting of diagnoses and procedures. These guidelines have been developed to assist both the healthcare provider and the coder in identifying those diagnoses that are to be reported. The importance of consistent, complete documentation in the medical record cannot be overemphasized. Without such documentation accurate coding cannot be achieved. The entire record should be reviewed to determine the specific reason for the encounter and the conditions treated.

A Tale of Two Cities (1859) is a historical novel by Charles Dickens, set in London and Paris before and during the French Revolution. The novel tells the story of the French Doctor Manette, his 18-year-long imprisonment in the Bastille in Paris and his release to live in London with his daughter Lucie, whom he had never met. The story is set against the conditions that led up to the French Revolution and the Reign of Terror.

While world history materials date back to prehistoric times, the field itself is relatively young. Indeed, when the first edition of Peter Stearns's best-selling World History in Documents was published in 1998, world history was poised for explosive growth, with the College Board approving the AP world history curriculum in 2000, and the exam shortly thereafter. At the university level, survey world history courses are increasingly required for history majors, and graduate programs in world history are multiplying in the U.S. and overseas. World events have changed as rapidly as the field of world history itself, making the long-awaited second edition of World History in Documents especially timely. In addition to including a new preface, focusing on current trends in the field, Stearns has updated forty percent of the textbook, paying particular attention to global processes throughout history. The book also covers key events that have altered world history since the publication of the first edition, including terrorism, global consumerism, and environmental issues.
