In addition, this chapter discusses the behavior of these costs with changes in activity as well as the effect of cost behavior on managerial decisions. Cost Accumulation. Chapters 3 through 5 illustrate the process through which the organization accumulates costs with its products and services. In Chapter 3, we focus on production and service processes that require different levels of effort across individual jobs (job-order costing). Chapter 4 illustrates the cost accumulation process for manufacturing environments characterized by the production of a large number of similar products (process costing).
