A study of America's changing attitude toward wilderness, discussing efforts to protect the Alaskan wilderness, trends in wilderness management, and the international perspective.

"Whether fulfilling subsistence needs or featured in stories of grand adventure, hunting loomed large in the material and the imagined landscape of the nineteenth-century West. Epiphany in the Wilderness explores the social, political, economic, and environmental dynamics of hunting on the frontier in three "acts," using performance as a trail guide and focusing on the production of a "cultural ecology of the chase" in literature, art, photography, and taxidermy. Using the metaphor of the theater, Jones argues that the West was a crucial stage that framed the performance of the American character as an independent, resourceful, resilient, and rugged individual. The leading actor was the all-conquering masculine hunter hero, the sharpshooting man of the wilderness who tamed and claimed the West with each provident step. Women were also a significant part of the story, treading the game trails as plucky adventurers and resilient homesteaders and acting out their exploits in autobiographical accounts and stage shows. Epiphany in the Wilderness informs various academic debates surrounding the frontier period, including the construction of nature as a site of personal challenge, gun culture, gender adaptations and the crafting of the masculine wilderness hero figure, wildlife management and consumption, memorializing and trophy-taking, and the juxtaposition of a closing frontier with an emerging conservation movement."

The nature writing of Gary Ferguson arises out of intimate experience. He trekked 500 miles through Yellowstone to write *Walking Down the Wild* and spent a season in the field at a wilderness therapy program for *Shouting at the Sky*. He journeyed 250 miles on foot for *Hawks Rest* and followed through the seasons the first fourteen wolves released into Yellowstone National Park for *The Yellowstone Wolves*. But nothing could prepare him for the experience he details in his new book. *The Carry Home* is both a moving celebration of the outdoor life shared between Ferguson and his wife Jane, who died tragically in a canoeing accident in northern Ontario in 2005, and a chronicle of the mending, uplifting power of nature. Confronting his unthinkable loss, Ferguson set out to fulfill Jane's final wish: the scattering of her ashes in five remote, wild locations they loved and shared. The act of the carry home allows Ferguson the opportunity to ruminate on their life together as well as explore deeply the impactful presence of nature in all of our lives. Theirs was a love borne of wild places, and *The Carry Home* offers a powerful glimpse into how the natural world can be a critical prompt for moving through cycles of immeasurable grief, how bereavement can turn to wonder, and how one man rediscovered himself in the process of saying goodbye.

Just 5 miles southwest of Aspen, the rugged peaks, broad valleys, and high passes of the Maroon Bells-Snowmass Wilderness draw throngs of visitors each year. This guide covers the vast network of trails in the fourth largest wilderness in Colorado. With detailed trails descriptions, accurate maps, and elevation profiles, this guide will show you the popular spots as well as the less-frequented ones. Veteran author Erik Molvar discovered backpacking while working on a volunteer trails crew in the North Cascades of Washington. Erik is the author of trail guides for Glacier, the Bob Marshall Wilderness, Olympic National park, and other areas, as well as *Alaska on Foot: Wilderness Techniques for the Far North*.

The Grand Canyon has been saved from dams three times in the last century. Unthinkable as it may seem today, many people promoted damming the Colorado River in the canyon during the early twentieth century as the most feasible solution to the water and power needs of the Pacific Southwest. These efforts reached their climax during the 1960s when the federal government tried to build two massive hydroelectric dams in the Grand Canyon. Although not located within the Grand Canyon National Park or Monument, they would have flooded lengthy, unprotected reaches of the canyon and along thirteen miles of the park boundary. *Saving Grand Canyon* tells the remarkable true story of the attempts to build dams in one of America's most spectacular natural wonders. Based on twenty-five years of research, this fascinating ride through history chronicles a hundred years of Colorado River water development, demonstrates how the National Environmental Policy Act came to be, and challenges the myth that the Sierra Club saved the Grand Canyon. It also shows how the Sierra Club parlayed public perception as the canyon's savior into the leadership of the modern environmental movement after the National Environmental Policy Act became law. The tale of the Sierra Club stopping the dams has become so entrenched—and so embellished—that many historians, popular writers, and filmmakers have ignored the documented historical record. This epic story puts the events from 1963–1968 into the broader context of Colorado River water development and debunks fifty years of Colorado River and Grand Canyon myths.

#1 NEW YORK TIMES BESTSELLER • Brené Brown has taught us what it means to dare greatly, rise strong, and brave the wilderness. Now, based on new research conducted with leaders, change makers, and culture shifters, she's showing us how to put those ideas into practice so we can step up and lead. Look for Brené Brown's new podcast, *Dare to Lead*, as well as her ongoing podcast *Unlocking Us!* **NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG Leadership** is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share it with others. We don't avoid difficult conversations and situations; we lean into vulnerability when it's necessary to do good work. But daring leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the exact same time as we're scrambling to figure out what we have to offer that machines and AI can't do better and faster. What can we do better? Empathy, connection, and courage, to start. Four-time #1 New York Times bestselling author Brené Brown has spent the past two decades studying the emotions and experiences that give meaning to our lives, and the past seven years working with transformative leaders and teams spanning the globe. She found that leaders in organizations ranging from small entrepreneurial startups and family-owned businesses to nonprofits, civic organizations, and Fortune 50 companies all ask the same question: How do you cultivate braver, more daring leaders, and how do you embed the value of courage in your culture? In this new book, Brown uses research, stories, and examples to answer these questions in the no-BS style that millions of readers have come to expect and love. Brown writes, "One of the most important findings of my career is that daring leadership is a collection of four skill sets that are 100 percent teachable, observable, and measurable. It's learning and unlearning that requires brave work, tough conversations, and showing up with your whole heart. Easy? No. Because choosing courage over comfort is not always our default. Worth it? Always. We want to be brave with our lives and our work. It's why we're here." Whether you've read *Daring Greatly* and *Rising Strong* or you're new to Brené Brown's work, this book is for anyone who wants to step up and into brave leadership.

Rethinking Wilderness and the Wild: Conflict, Conservation and Co-existence examines the complexities surrounding the concept of wilderness. Contemporary wilderness scholarship has tended to fall into two categories: the so-called 'fortress conservation' and 'co-existence' schools of thought. This book, contending that this polarisation has led to a silencing and concealment of alternative perspectives and lines of enquiry, extends beyond these confines and in particular steers away from the dilemmas of paradise or paradox in order to advance an intellectual and policy agenda of plurality and diversity rather than of prescription and definition. Drawing on case studies from Australia, Aotearoa/New Zealand, the United States and Iceland, and explorations of embodied experience, creative practice, philosophy, and First Nations land management approaches, the assembled chapters examine wilderness ideals, conflicts and human-nature dualities afresh, and examine co-existence and conservation in the Anthropocene in diverse ontological and multidisciplinary ways. By demonstrating a strong commitment to respecting the knowledge and perspectives of Indigenous peoples, this work delivers a more nuanced, ethical and decolonising approach to issues arising from relationships with wilderness. Such a collection is immediately appropriate given the political challenges and social complexities of our time, and the mounting threats to life across the globe. The abiding and uniting logic of the book is to offer a unique and innovative contribution to engender transformations of wilderness scholarship, activism and conservation policy. This text refutes the inherent privileging and exclusionary tactics of dominant modes of enquiry that too often serve to silence non-human and contrary positions. It reveals a multi-faceted and contingent wilderness alive with agency, diversity and possibility. This

book will be of great interest to students and scholars of conservation, environmental and natural resource management, Indigenous studies and environmental policy and planning. It will also be of interest to practitioners, policymakers and NGOs involved in conservation, protected environments and environmental governance.

How conflicting ideas of nature threaten to fracture America's identity. Amber waves of grain, purple mountain majesties: American invest much of their national identity in sites of natural beauty. And yet American lands today are torn by conflicts over science, religion, identity, and politics. Creationists believe that the Biblical flood carved landscapes less than 10,000 years ago; environmentalists protest pipelines; Western states argue that the federal government's land policies throttle free enterprise; Native Americans demand protection for sacred sites. In this book, David Nye looks at Americans' irreconcilably conflicting ideas about nature. A landscape is conflicted when different groups have different uses for the same location—for example, when some want to open mining sites that others want to preserve or when suburban development impinges on agriculture. Some landscapes are so degraded from careless use that they become toxic “anti-landscapes.” Nye traces these conflicts to clashing conceptions of nature—ranging from pastoral to Native American to military—industrial—that cannot be averaged into a compromise. Nye argues that today's environmental crisis is rooted in these conflicting ideas about land. Depending on your politics, global warming is either an inconvenient truth or fake news. America's contradictory conceptions of nature are at the heart of a broken national consensus.
