Life, for most of us, feels like a movie we've arrived to forty minutes late. Sure, good things happen, sometimes beautiful things. But tragic things happen too. What does it mean? We find ourselves in the middle of a story that is sometimes wonderful, sometimes awful, usually a confusing mixture of both, and we haven't a clue how to make sense of it all. No wonder we keep losing heart. We need to know the rest of the story. For when we were born, we were born into the midst of a great story begun before the dawn of time. A story of adventure, of risk and loss, heroism . . . and betrayal. A story where good is warring against evil, danger lurks around every corner, and glorious deeds wait to be done. Think of all those stories you've ever loved--there's a reason they stirred your heart. They've been trying to tell you about the true Epic ever since you were young. There is a larger story And you have a crucial role to play.

This book focuses on central themes related to the conservation of bats. It details their response to land-use change and management practices, intensified urbanization and roost disturbance and loss. Increasing interactions between humans and bats as a result of hunting, disease relationships, occupation of human dwellings, and conflict over fruit crops are explored in depth. Finally, contributors highlight the roles that taxonomy, conservation networks and conservation psychology have to play in conserving this imperilled but vital taxon. With over 1300 species, bats are the second largest order of mammals, yet as the Anthropocene dawns, bat populations around the world are in decline. Greater understanding of the anthropogenic drivers of this decline and exploration of possible mitigation measures are urgently needed if we are to retain global bat diversity in the coming decades. This book brings together teams of international experts to provide a global review of current understanding and recommend directions for future research and mitigation.

This reference book is intended to help teachers, teacher administrators, policy makers and others deal with the important issue of religious diversity in Europe's schools. The religious dimension of intercultural education is an issue that affects all schools, whether they are religiously diverse or not, because their pupils live and will work in increasingly diverse societies. The book is the main outcome of the project 'The Challenge of intercultural education today: religious diversity and dialogue in Europe', developed by the Council of Europe between 2002 and 2005. It is in four parts: theoretical and conceptual basis for religious diversity and intercultural education; educational conditions and methodological approaches; religious diversity in schools in different settings; examples of current practice in some member states of the Council of Europe.

This book is about reactions to interpersonal conflict such as avoiding, negotiating, and fighting. It breaks away from the prevailing assumption that conflict behaviours are mutually isolated reactions having mutually isolated effects. Instead, reactions are viewed as components of complex conflict behaviour that influence each other's impact on the substantive and relational outcomes. The simultaneous and sequential occurrence of, for example, problem solving and fighting should therefore be studied together and not separately. The author presents a ladder of stepwise increases in theoretical quality, and designs the sequence of chapters in such a way that the theoretical value increases step by step. The lower steps lead to the description of behavioural components and to a model of integrative and distributive dimensions. The upper steps lead to the dimensions of dual concern for one's own and the other's goals and to complexity explanations in terms of the novel paradigm of conglomerated conflict behaviour. The chapters are summarised into thirty-four interrelated propositions. Six empirical studies demonstrate the validity of crucial propositions at each level of the theoretical framework. This monograph primarily reaches

out to an academic readership. However, due to its clear structure, its comprehensive propositions, its frequent use of figures, and its glossary, the book will also provide an invaluable resource for any student and practitioner interested in conflict management and negotiation. With the end of the early Islamic period, Muslim scholars came to sense that a rift had begun to emerge between the teachings and principles of Islam and Muslims' daily reality and practices. The most important means by which scholars sought to restore the intimate contact between Muslims and the Qur'an was to study the objectives of Islam, the causes behind Islamic legal rulings and the intentions and goals underlying the Shari'ah, or Islamic Law. They made it clear that every legal ruling in Islam has a function which it performs, an aim which it realizes, a cause, be it explicit or implicit, and an intention which it seeks to fulfill, and all of this in order to realize benefit to human beings or to ward off harm or corruption. They showed how these intentions, and higher objectives might at times be contained explicitly in the texts of the Qur'an and the Sunnah, while at other times, scholars might bring them to light by means of independent reasoning based on their understanding of the Qur'an and the Sunnah within a framework of time and space. This book represents a pioneering contribution presenting a comprehensive theory of the objectives of Islamic law in its various aspects, as well as a painstaking study of objectives-based thought as pioneered by the father of objectives-based jurisprudence, Imam Abu Ishaq al-Shatibi; in addition, the author presents us with an important study of al-Shatibi himself which offers a wealth of new, beneficial information about the life, thought and method of this venerable man.

Using essential oils to influence your energetic make-up and karmic patterns • Details how to identify which tattvas--the Five Great Elements--are dominant in your energetic make-up • Explores the energetic signatures of the essential oils associated with each tattva and chakra, including their archetypes, sacred geometry, sacred sounds, and colors • Explains how to identify your personal vibrational signature, purify your energy body, impart vibrational properties to jewelry, and work with yantras and mantras The tattvas, the Five Great Elements--earth, water, fire, air/wind, and ether/space--create and sustain not only the universe but also all of its inhabitants. Each of us has a unique combination of these elemental energies behind our personal characteristics--everything from the color of our eyes to our behaviors and emotional temperament. What tattvas are dominant in your make-up can also be influenced by your surroundings and by karma. Essential oils, in addition to working biologically and chemically, also work at the energetic level, making them ideal for working with the tattvas. Teaching you how to use essential oils to affect the very fabric of your being, Candice Covington details how the Tattvas Method of essential oils allow you to access the deepest, most hidden aspects of Self, those beyond the reach of the mind, the very energetic causation patterns that set all behaviors and thoughts into motion. She reveals how the tattvas are the energy that animate each chakra and how we can use their archetypal energy to shape our inner life and align with our greater soul purpose. The author provides energetic profiles of each tattva, chakra, and essential oil, explains their relationships to one another, and details how to identify what tattva or chakra is dominant at any given time. Exploring the energetic signatures of the tattvic essential oils, she details their elemental make-up, animal and deity archetypes, sacred geometry symbols, sacred syllables, and colors. She reveals how to discover the energy patterns responsible for directing unhealthy life patterns and explains how to identify your personal vibrational signature, purify your energy body, and craft your own unique ritual practice with essential oils. Showing how essential oils are powerful vibrational tools for effecting change, the author reveals how they allow each of us to deliberately steer our own destiny, fulfill our personal dharma, and be all that our souls intended us to be. This document is a collection of Logia, a harvesting of about 114 "Sayings of Jesus" together with a prologue which stresses the esoteric character of the sayings and attributes their recording and preservation to the apostle Didymus Jude Thomas. Many of the sentences are identical with the Logia of the Synoptic Gospels or are closely related to them. Nevertheless, there are differences of detail which merit discussion and can often be elucidated as due to a particular source or tradition. The other sayings on the contrary are "extra-canonical". Among these are certain "agrapha" which are already known or can now be recognised in ancient or mediaeval literature from patristic, gnostic, Manichean or even Catharist sources. In particular the sayings written in Greek, which are found in more or less mutilated form in three papyri from Oxyrhynchus appear with certain variations but assembled and arranged in similar manner in three different parts of "The Gospel according to Thomas". It is probable that extracts from apocryphal gospels such as the "Gospel according to the Hebrews" and the "Gospel according to the Egyptians" are also preserved in it. Besides this, the collection comprises many Logia which are quite new and have never before been seen. The first major publication in English on the bamboo slips excavated from a late fourth century B.C. Chu-state tomb at Guodian, Hubei, in 1993. The slip texts include both Daoist and Confucian works, many previously unknown. This monograph is a full account of the international conference held on these texts, at which leading scholars from China, the United States, Europe, and Japan analyzed the Laozi materials and a previously unknown cosmological text. In addition, the contents include nine essays on topics such as the archaeological background of the discovery, conservation of the slip-texts, and the relation of the Guodian Laozi materials to the received Laozi text. An annotated edition of the Guodian Laozi materials and the cosmological text are included, as well as a critical bibliography with summary of Chinese scholarship on the Guodian texts in the year following the conference. Traduceri de Corina Popescu si Dan Petrescu. Studiile eseurile si articolele consacrate de Ioan Petru Culianu literaturii si culturii romane in general vor constitui materia a doua volume. Acest prim volum grupeaza in principal sase eseuri ale lui Culianu despre Eminescu impreuna cu alte cateva „exercitii de mitanaliza“ in sectiunea intai a cartii intitulata Fantasmele nihilismului. Sectiunea a doua Secretul doctorului Eliade cuprinde pagini despre Mircea Eliade in special despre creatia literara eliadiana. Studii romanesti I ofera astfel o sectiune tematica unitara din opera lui Culianu cuprinsa cronologic intre perioada cea mai timpurie („Vasile Voiculescu romancier al iluziei si al sperantei“ „Mit si simbol in opera lui V. Voiculescu“ sunt rasarite pe urmele unei lucrari din perioada studentiei bucurestene dintre 1967 si 1972) si 1989 („Arborele cunoasterii. Invitatie la lectura lui Mircea Eliade“ a fost publicat in revista italiana Abstracta in martie 1989). Al doilea volum de Studii romanesti va fi axat indeosebi pe studii si eseuri de istoria religiilor – cu referire bineinteles la cultura traditionala romaneasca.

"Give me Liberty, or give me Death!" is a famous quotation attributed to Patrick Henry from a speech he made to the Virginia Convention. It was given March 23, 1775, at St. John's Church in Richmond, Virginia, ...

Cuvânt înainte de Gabriel Liiceanu „Noi ne acceptăm eroii abia atunci când și-au luat locul într-un trecut care nu ne obligă. Când sunt vii, preferăm să le împrumutăm urâtenia noastră decât să imitam frumusețea lor. Adevărul e că, de peste două decenii, Doina Cornea n-a mai existat pentru noi. N-a devenit un model, așa cum s-ar fi convenit. Nu i s-a mai cerut părerea, pentru a acompania cu rectitudinea spiritului ei toate strămbătățile care au pus treptat stăpânire pe noi. Cei care fac opinia publică în țara asta au uitat-o repede și și-au amintit, scurt, de ea abia când a plecat dintre noi. Făcând ce a făcut, Doina Cornea n-a atepstat nimic de la nimeni. Dialogul ei cu libertatea l-a purtat în absoluta lui gratuitate: fără punerea în scenă a unei parade etice și fără gândul de a prezenta vreodată nota finală societății care beneficiase de pe urma îndrăznelii ei. Disidența Doinei Cornea n-a fost, până la urmă, decât expresia publică pe care a căpătat-o, în chip firesc, o devenire interioară.“ – Gabriel Liiceanu

A synthesis of current approaches to adapting engineering tools to the study of neurobiological systems.

A bold account of the development of human consciousness and spirituality over the ages and an examination of the dynamic global transformation of attitudes about healing. For more than fifteen years, Caroline Myss has studied why some people heal, while others do not. In her previous book, *Anatomy of the Spirit*, Dr. Myss illuminated the hidden

interactions of belief and body, soul and cell to show how, as she inimitably puts it, "your biography becomes your biology." In *Why People Don't Heal and How They Can*, she builds on her earlier teachings of the seven different energy centers of the body to provide a vital self-healing program for physical and spiritual disorders. With her characteristic no-nonsense style and high-voltage storytelling, she exposes and explodes the five myths about healing, explains the cultural and individual contexts in which people become physically and spiritually ill and invested in "woundology," and teaches new methods of working with the challenges that the seven energy centers embody. To help you get and stay on the path to wellness, Dr. Myss provides rituals and prayers for gaining a symbolic perspective on your life issues; for bolstering your personal power; and for connecting with a universal divine energy. Dr. Myss's breakthrough views on energy medicine and her active approach to healing life issues and physical illness will help you overcome the mental blocks that keep you from becoming well.

When funding agencies and policy organizations consider the role of modeling and simulation in modern biology, the question is often posed, what has been accomplished? This book will be organized around a symposium on the 20 year history of the CNS meetings, to be held as part of CNS 2010 in San Antonio Texas in July 2010. The book, like the symposium is intended to summarize progress made in Computational Neuroscience over the last 20 years while also considering current challenges in the field. As described in the table of contents, the chapter's authors have been selected to provide wide coverage of the applications of computational techniques to a broad range of questions and model systems in neuroscience. The proposed book will include several features that establish the history of the field. For each article, its author will select an article originally appearing in a CNS conference proceedings from 15 – 20 years ago. These short (less than 6 page) articles will provide illustrations of the state of the field 20 years ago. The new articles will describe what has been learned about the subject in the following 20 years, and pose specific challenges for the next 20 years. The second historical mechanism will be the reproduction of the first 12 years of posters from the CNS meeting. These posters in and of themselves have become famous in the field (they hang in the halls of the NIH in Bethesda Maryland) and were constructed as allegories for the state and development of computational neuroscience. The posters were designed by the book's editor, who will, for the first time, provide a written description of each poster.

"Everything have started by some few dreams, which not just that I would neverforget my entire life but more than that, I don't think it was just dreams in the rightsense of the notion"dream". I was conscious during the rest that I was sleeping. What itcould be said that I was dreaming is nothing else than a real experience in a space fromwhere I can come back anytime in the world where I am sleeping.I was at the beginning somewhere on the fringe of an unknown town, in the night.While I have looked at the multicolored lights from any distance, I started tobecome easier, so easy that I felt in a

moment I could fly." Sorin Cerin

Since the publication of Samuel Huntington's "The Clash of Civilizations" concern about civilization has been reintroduced into the debate on the world order. Malek Bennabi (1905–1973), prominent Algerian thinker and great Muslim intellectual, intently focused on unraveling the causes of Muslim decline and the success of Western civilization and culture. The key problem he theorized lay not in the Qur'an or Islamic faith but in Muslims themselves. The author investigates Bennabi's approach to civilization and the fundamental principles drawn, using metatheorizing methodology. In doing so he sheds further light on perhaps one of the more intriguing elements of Bennabi's theory, that civilization is governed by internal-external and social-intellectual factors and that an equation can be generated for civilization itself. This equation of Man+Soil+Time = Civilization and of which religion, according to Bennabi, forms the all-important catalyst, is explained and its significance in terms of the reversal of Muslim decline evaluated. What is clearly apparent is that for Bennabi, Man is the central force in any civilizing process and without him the other two elements are of no value. With regard to outcomes, Bennabi's unerring conviction that unless Muslims changed their spiritual condition, they could not affect any far-reaching, meaningful change in society is echoed in the Qur'anic verse: "Verily, never will Allah change the condition of a people until they change what is in themselves" (13:11).

Employee disengagement is one of the most pressing problems plaguing managers today hampering the innovation capacities of countless organizations. According to recent polls, some 20 percent of workers report feeling disconnected from their jobs, in an environment of stagnating wages, massive layoffs, rising health care costs, and other factors that contribute to alienation, distrust, and apathy. In *The Organizational Sweet Spot*, Dr. Charles Ehin takes a refreshing new look at what it will take to reengage disaffected workers and boost their resolve to advance novel ideas. Applying the latest research from such fields as evolutionary psychology, social neuroscience, organizational behavior, anthropology, and social network analysis, Ehin demonstrates how employee disengagement is rooted in a fundamental misalignment between people's instinctive drive to develop their personal and group identities through informal or "emergent" relationships and the ways in which organizational goals and profit motives are executed through formal bureaucracy. The challenge for today's organizations—which operate under constantly changing conditions—is to narrow this gap, that is, to find the "sweet spot", where the formal and informal elements of the organization overlap. Ehin provides practical tools for leaders to support this "shared access domain" to improve productivity, catalyze innovation, and inspire exceptional performance. His new model is likely to reverberate throughout current management thinking as we move toward creating more vital and meaningful workplaces.

In this important prose work, one of our major poets explores, through autobiography and argument, a woman's life in Ireland together with a poet's work. Eavan Boland beautifully uncovers the powerful drama of how these lives affect one another; how the tradition of womanhood and the historic vocation of the poet act as revealing illuminations of the other.

Why are prominent doctors and medical researchers all over the world interested in the extraordinary healings reported by the patients of Dr. Eric Pearl? What does it mean when these patients report the sudden disappearance of afflictions

such as cancers, AIDS-related diseases, and cerebral palsy? And what does it mean when people who interact with Dr. Pearl report a sudden ability to access this healing energy not just for themselves, but for others, too? What is this phenomenon? Well, you might have to reconsider everything you've read up until now about conventional healing. The "new" frequencies of healing described by Dr. Pearl transcend "technique" entirely and bring you to levels beyond those previously accessible to anyone, anywhere. This book takes you on Dr. Pearl's journey from the discovery of his ability to facilitate healings, to his well-deserved reputation as the instrument through which this process is being introduced to the world. But most important, *The Reconnection* reveals methods you can use to personally master these new healing energies.

*The American Crisis* is a collection of articles by Thomas Paine, originally published from December 1776 to December 1783, that focus on rallying Americans during the worst years of the Revolutionary War. Paine used his deistic beliefs to galvanize the revolutionaries, for example by claiming that the British are trying to assume the powers of God and that God would support the American colonists. These articles were so influential that others began to adopt some of their more stirring phrases, catapulting them into the cultural consciousness; for example, the opening line of the first *Crisis*, which reads "These are the times that try men's souls." This book is part of the Standard Ebooks project, which produces free public domain ebooks.

În corpul nostru pot exista tensiune și durere. Dacă le reprimăm sau le ignorăm, tensiunea și durerea vor crește cu fiecare zi și ne vor împiedica să cunoaștem fericirea pe care ar trebui să o putem cunoaște. Când avem tensiune în corp, nu putem să dormim bine sau să mâncăm bine. Conștiența cu privire la respirație ne poate ajuta să ne relaxăm și să aducem pacea în corpul nostru. Ne îngrijim mai întâi de corpul nostru. Apoi putem să ne îngrijim de mintea noastră. [...] Eliminarea tuturor tensiunilor și readucerea

calmului în corp reprezintă primul pas către restabilirea stării de bine. Nu poți să vindec corpul dacă nu îți acorzi atenție. Aducându-ți mintea acasă în corpul tău, te stabilești în aici și acum. Ai șansa să fii conștient, fărâșă judeci, de orice durere, tensiune sau suferință din corp. Acesta este începutul vindecării.” Thich Nhat Hanh

What would it mean to discover an ancient language—a literal message—hidden within the DNA of life itself? What we once believed of our past is about to change. . . . A coded message has been found within the molecules of life, deep within the DNA in each cell of our bodies. Through a remarkable discovery linking Biblical alphabets to our genetic code, the "language of life" may now be read as the ancient letters of a timeless message. Regardless of race, religion, heritage, or lifestyle, the message is the same in each cell of every woman, child, and man, past and present. Sharing all-new, fascinating research, Gregg Braden discusses the life-changing discovery that led him from a successful career in the aerospace and defense industries to an extensive 12-year study of the most sacred and honored traditions of humankind.

Known as the door between this world and invisible realms, Shambhala is earth's central chakra, where bodhisattva and ascended masters watch over humanity's future evolution. Roerich's classic account, written following a harrowing 5-year exploration of Central Asia and Tibet, explains "the reality of this indescribable realm on earth."

'The introductory account of Mr. Brunton's pony-back journey up the mountainside has real charm. One of his most interesting chapters gives a practical-minded consideration to the probable future of Tibet.' New York Times Paul Brunton was one of a very small number of his generation to travel in India and Tibet so extensively at a time when very few were doing so with such insight and discernment. His journalistic skills produced magnificent descriptions of the snowy peaks and high-desert landscapes of the Himalayan region, but it was the lessons he learned from the holy men he met on his journey that transformed him into one of the great interpreters of the East. In this magnificent spirituality classic, he explains that we all need 'oases of calm in a world of storm', no matter what era we are living in, and that to retreat from our everyday lives for a while is not weakness but strength. By taking the trouble to discover the deep silence within us we will find the benefits of being linked to an 'infinite power, an infinite wisdom, an infinite goodness'. A Hermit In The Himalayas is a fascinating blend of travel writing and profound spiritual experience. As we accompany the author on his journey through the vast Himalayas ranges towards Mount Kailas in Tibet, he also shows us an even more remarkable - and timeless - inner path which will help us cope with the ups and downs of our contemporary world.
