

Crossroads A Meeting Of Nations Chapter 2

This book is open access under a CC BY-NC 2.5 license. This book offers a devastating look at deeply flawed development processes driven by international finance, African governments and the global consulting industry. It examines major river basin development underway in the semi-arid borderlands of Ethiopia, Kenya and South Sudan and its disastrous human rights consequences for a half-million indigenous people. The volume traces the historical origins of Gibe III megadam construction along the Omo River in Ethiopia—in turn, enabling irrigation for commercial-scale agricultural development and causing radical reduction of downstream Omo and (Kenya's) Lake Turkana waters. Presenting case studies of indigenous Dasanech and northernmost Turkana livelihood systems and Gibe III linked impacts on them, the author predicts agropastoral and fishing economic collapse, region-wide hunger with exposure to disease epidemics, irreversible natural resource destruction and cross-border interethnic armed conflict spilling into South Sudan. The book identifies fundamental failings of government and development bank impact assessments, including their distortion or omission of mandated transboundary assessment, cumulative effects of the Gibe III dam and its linked Ethiopia-Kenya energy transmission 'highway' project, key hydrologic and human ecological characteristics, major earthquake threat in the dam region and widespread expropriation and political repression. Violations of internationally recognized human rights, especially by the Ethiopian government but also the Kenyan government, are extensive and on the increase—with collaboration by the development banks, in breach of their own internal operational procedures. A policy crossroads has now emerged. The author presents the alternative to the present looming catastrophe—consideration of development suspension in order to undertake genuinely independent transboundary assessment and a plan for continued development action within a human rights framework—forging a sustainable future for the indigenous peoples now directly threatened and for their respective eastern Africa states. Claudia Carr's book is a treasure of detailed information gathered over many years concerning river basin development of the Omo River in Ethiopia and its impact on the peoples of the lower Omo Basin and the Lake Turkana region in Kenya. It contains numerous maps, charts, and photographs not previously available to the public. The book is highly critical of the environmental and human rights implications of the Omo River hydropower projects on both the local ethnic communities in Ethiopia and on the downstream Turkana in Kenya. David Shinn Former Ambassador to Ethiopia and to Burkina Faso Adjunct Professor of International Affairs, The George Washington University, Washington D.C.

Women in Early America, edited by Thomas A. Foster, tells the fascinating stories of the myriad women who shaped the early modern North American world from the colonial era through the first years of the Republic. This volume goes beyond the familiar stories of Pocahontas or Abigail Adams, recovering the lives and experiences of lesser-known women—both ordinary and elite, enslaved and free, Indigenous and immigrant—who lived and worked in not only British mainland America, but also New Spain, New France, New Netherlands, and the West Indies. In these essays we learn about the conditions that women faced during the Salem witchcraft panic and the Spanish Inquisition in New Mexico; as indentured servants in early Virginia and Maryland; caught up between warring British and Native Americans; as traders in New Netherlands and Detroit; as slave owners in Jamaica; as Loyalist women during the American Revolution; enslaved in the President's house; and as students and educators inspired by the air of equality in the young nation. Foster showcases the latest research of junior and senior historians, drawing from recent scholarship informed by women's and gender history—feminist theory, gender theory, new cultural history, social history, and literary criticism. Collectively, these essays address the need for scholarship on women's lives and experiences. Women in Early America heeds the call of feminist scholars

to not merely reproduce male-centered narratives, “add women, and stir,” but to rethink master narratives themselves so that we may better understand how women and men created and developed our historical past.

I congratulate Andebrhan Welde Giorgis on his high quality and extremely informative book that has not only the merit to be an update on the political situation in Eritrea but also asks the pertinent questions on the future of his marvelous country. He does it with tact and success, based on his long experience as freedom fighter, as senior public servant, as Ambassador and his rich experience of Africa. Each country in Africa must be able to determine its own future. Freedom, responsibility, control over its destiny, and solidarity, are the key ideas of the new vision for international cooperation that will help ensure the sustainability of the development process. The urgent need to create a democratic government resonates throughout the book. Good governance, respect for human rights, principles of democracy, and rule of law are essential universal values underpinning it. Andebrhan is one of those men, visionaries, and open to dialogue, reform and change. Eritrea at a Crossroads is key to understanding the challenges facing Eritrea and Africa. It is an eye opener on a complex and little understood crisis that is festering in Africa and holding the continent back. The book provides a solid intellectual foundation to understanding the region and will give anyone who wants to build a better future for Africa a great starting point. I congratulate him on this most valuable book which finds its place among all the lovers of Africa. Louis Michel Member of European Parliament, European Commissioner for Development and Humanitarian Aid (2004-2009) and Foreign Minister of Belgium (1999-2004) Freedom fighter, scholar, central banker, diplomat, and now unhappy exile, no-one could be better placed than Andebrhan Welde Giorgis to trace Eritrea's distressing slide from triumph to tragedy. It's a harrowing story, but the author tells it comprehensively, objectively and lucidly in this excellent study. The future can be rescued, as Andebrhan makes clear, but only if the past is understood, and the present confronted -- by decent, concerned Eritreans, acting with the moral, political and economic support of the wider international community. May his voice be heard. Gareth Evans Chancellor, Australian National University; President, International Crisis Group (2000-09) and Foreign Minister of Australia (1988-96)

Against the backdrop of China's mounting influence and North Korea's growing nuclear capability and expanding missile arsenal, South Korea faces a set of strategic choices that will shape its economic prospects and national security. In *South Korea at the Crossroads*, Scott A. Snyder examines the trajectory of fifty years of South Korean foreign policy and offers predictions—and a prescription—for the future. Pairing a historical perspective with a shrewd understanding of today's political landscape, Snyder contends that South Korea's best strategy remains investing in a robust alliance with the United States. Snyder begins with South Korea's effort in the 1960s to offset the risk of abandonment by the United States during the Vietnam War and the subsequent crisis in the alliance during the 1970s. A series of shifts in South Korean foreign relations followed: the “Nordpolitik” engagement with the Soviet Union and China at the end of the Cold War; Kim Dae Jung's “Sunshine Policy,” designed to bring North Korea into the international community; “trustpolitik,” which sought to foster diplomacy with North Korea and Japan; and changes in South Korea's relationship with the United States. Despite its rise as a leader in international financial, development, and climate-change forums, South Korea will likely still require the commitment of the United States to guarantee its security. Although China is a tempting option, Snyder argues that only the United States is both credible and capable in this role. South Korea remains vulnerable relative to other regional powers in northeast Asia despite its rising profile as a middle power, and it must balance the contradiction of desirable autonomy and necessary alliance.

Collects essays contributed by historians describing thirty-one specific days which altered American history, including the Great Awakening of 1740, the Seneca Falls Convention, and

San Francisco's "Human Be-in" gathering.

"In addition to assessing existing conditions and knowledge, the IAASTD uses a simple set of model projections to look at the future, based on knowledge from past events and existing trends such as population growth, rural/urban food and poverty dynamics, loss of agricultural land, water availability, and climate change effects. This set of volumes comprises the findings of the IAASTD. It consists of a Global Report, a brief Synthesis Report, and 5 subglobal reports. Taken as a whole, the IAASTD reports are an indispensable reference for anyone working in the field of agriculture and rural development, whether at the level of basic research, policy, or practice."--BOOK JACKET.

In order for the United States to maintain the global leadership and competitiveness in science and technology that are critical to achieving national goals, we must invest in research, encourage innovation, and grow a strong and talented science and technology workforce. Expanding Underrepresented Minority Participation explores the role of diversity in the science, technology, engineering and mathematics (STEM) workforce and its value in keeping America innovative and competitive. According to the book, the U.S. labor market is projected to grow faster in science and engineering than in any other sector in the coming years, making minority participation in STEM education at all levels a national priority. Expanding Underrepresented Minority Participation analyzes the rate of change and the challenges the nation currently faces in developing a strong and diverse workforce. Although minorities are the fastest growing segment of the population, they are underrepresented in the fields of science and engineering. Historically, there has been a strong connection between increasing educational attainment in the United States and the growth in and global leadership of the economy. Expanding Underrepresented Minority Participation suggests that the federal government, industry, and post-secondary institutions work collaboratively with K-12 schools and school systems to increase minority access to and demand for post-secondary STEM education and technical training. The book also identifies best practices and offers a comprehensive road map for increasing involvement of underrepresented minorities and improving the quality of their education. It offers recommendations that focus on academic and social support, institutional roles, teacher preparation, affordability and program development.

Having celebrated its 70th year of independence in 2018, Sri Lanka, a strategically-positioned island nation, now finds itself with the potential to be a super connector in fast-developing Asia. While carving out a place for itself in the international arena, Sri Lanka has simultaneously had to look inwards to recover and rebuild its potential, bruised by an era of colonial rule and nearly 30 years of a civil war, with two youth insurrections. This book examines these twin dimensions. First, how Sri Lanka is negotiating its international reach and the spheres of influence that extend from other Asian and world powers, and second, how the country is engaging in nation-building, from days of racial riots to ones of peace-building, reconciliation, more robust governance, and the development of cyber security. Written from the perspective of a Sri Lankan academic and the head of the national security think tank, this book offers insights into how the country has addressed its post-conflict as well as geopolitical challenges, navigated through domestic politics, and ramped up peace-building efforts, to now reach a junction where it can put its foot firmly on the road to prosperity in a new Asian world order.

Every society throughout history has defined what counts as work and what doesn't. And more often than not, those lines of demarcation are inextricable

from considerations of gender. *What Is Work?* offers a multi-disciplinary approach to understanding labor within the highly gendered realm of household economies. Drawing from scholarship on gender history, economic sociology, family history, civil law, and feminist economics, these essays explore the changing and often contested boundaries between what was and is considered work in different Euro-American contexts over several centuries, with an eye to the ambiguities and biases that have shaped mainstream conceptions of work across all social sectors.

On the eve of the Seven Years' War in North America, the British crown convened the Albany Congress, an Anglo-Iroquois treaty conference, in response to a crisis that threatened imperial expansion. British authorities hoped to address the impending collapse of Indian trade and diplomacy in the northern colonies, a problem exacerbated by uncooperative, resistant colonial governments. In the first book on the subject in more than forty-five years, Timothy J. Shannon definitively rewrites the historical record on the Albany Congress. Challenging the received wisdom that has equated the Congress and the plan of colonial union it produced with the origins of American independence, Shannon demonstrates conclusively the Congress's importance in the wider context of Britain's eighteenth-century Atlantic empire. In the process, the author poses a formidable challenge to the Iroquois Influence Thesis. The Six Nations, he writes, had nothing to do with the drafting of the Albany Plan, which borrowed its model of constitutional union not from the Iroquois but from the colonial delegates' British cousins. Far from serving as a dress rehearsal for the Constitutional Convention, the Albany Congress marked, for colonists and Iroquois alike, a passage from an independent, commercial pattern of intercultural relations to a hierarchical, bureaucratic imperialism wielded by a distant authority.

In *Pakistan at the Crossroads*, top international scholars assess Pakistan's politics and economics and the challenges faced by its civil and military leaders domestically and diplomatically. Contributors examine the state's handling of internal threats, tensions between civilians and the military, strategies of political parties, police and law enforcement reform, trends in judicial activism, the rise of border conflicts, economic challenges, financial entanglements with foreign powers, and diplomatic relations with India, China, Iran, Saudi Arabia, Afghanistan, and the United States. In addition to ethnic strife in Baluchistan and Karachi, terrorist violence in Pakistan in response to the American-led military intervention in Afghanistan and in the Federally Administered Tribal Areas by means of drones, as well as to Pakistani army operations in the Pashtun area, has reached an unprecedented level. There is a growing consensus among state leaders that the nation's main security threats may come not from India but from its spiraling internal conflicts, though this realization may not sufficiently dissuade the Pakistani army from targeting the country's largest neighbor. This volume is therefore critical to grasping the sophisticated interplay of internal and external

forces complicating the country's recent trajectory. Macau, New Orleans, St. Louis, Pittsburgh, and San Francisco. All of these metropolitan centers were once frontier cities, urban areas irrevocably shaped by cross-cultural borderland beginnings. Spanning a wide range of periods and locations, and including stories of eighteenth-century Detroit, nineteenth-century Seattle, and twentieth-century Los Angeles, *Frontier Cities* recovers the history of these urban places and shows how, from the start, natives and newcomers alike shared streets, buildings, and interwoven lives. Not only do frontier cities embody the earliest matrix of the American urban experience; they also testify to the intersections of colonial, urban, western, and global history. The twelve essays in this collection paint compelling portraits of frontier cities and their inhabitants: the French traders who bypassed imperial regulations by throwing casks of brandy over the wall to Indian customers in eighteenth-century Montreal; Isaac Friedlander, San Francisco's "Grain King"; and Adrien de Pauger, who designed the Vieux Carré in New Orleans. Exploring the economic and political networks, imperial ambitions, and personal intimacies of frontier city development, this collection demonstrates that these cities followed no mythic line of settlement, nor did they move lockstep through a certain pace or pattern of evolution. An introduction puts the collection in historical context, and the epilogue ponders the future of frontier cities in the midst of contemporary globalization. With innovative concepts and a rich selection of maps and images, *Frontier Cities* imparts a crucial untold chapter in the construction of urban history and place.

Crossroads is an English/Language Arts series for grades 7 to 10, developed by a team of educators from across Canada. This series provides a developmental approach to instruction over the four grades, and reflects congruence with all Canadian curricula, while meeting a wide range of student interests.

Benefits/Features: Organized thematically - 6 themes Alternate Table of Contents indicates genre and alternate themes, allowing organizational flexibility "Goals at a Glance" boxes focus students on the key expectations/outcomes "Strategy" boxes offer practical suggestions for activities that focus on writing, media studies, and literary analysis "Focus on Process" pages provide in-depth, how-to guides for the processes of writing and other language strands "Student Response" activities for each selection focus on writing, reading comprehension, and oral comprehension "End of Unit" activities provide a basis for formative evaluation covering all aspects of the curriculum

Divides North America into nine powers, and explains the cultural, ethnic, and geographic identities of each

In *Great Crossings: Indians, Settlers, and Slaves in the Age of Jackson*, prize-winning historian Christina Snyder reinterprets the history of Jacksonian America. Most often, this drama focuses on whites who turned west to conquer a continent, extending "liberty" as they went. *Great Crossings* also includes Native Americans from across the continent seeking new ways to assert anciently-held rights and people of African descent who challenged the United States to live up

to its ideals. These diverse groups met in an experimental community in central Kentucky called Great Crossings, home to the first federal Indian school and a famous interracial family. Great Crossings embodied monumental changes then transforming North America. The United States, within the span of a few decades, grew from an East Coast nation to a continental empire. The territorial growth of the United States forged a multicultural, multiracial society, but that diversity also sparked fierce debates over race, citizenship, and America's destiny. Great Crossings, a place of race-mixing and cultural exchange, emerged as a battleground. Its history provides an intimate view of the ambitions and struggles of Indians, settlers, and slaves who were trying to secure their place in a changing world. Through deep research and compelling prose, Snyder introduces us to a diverse range of historical actors: Richard Mentor Johnson, the politician who reportedly killed Tecumseh and then became schoolmaster to the sons of his former foes; Julia Chinn, Johnson's enslaved concubine, who fought for her children's freedom; and Peter Pitchlynn, a Choctaw intellectual who, even in the darkest days of Indian removal, argued for the future of Indian nations. Together, their stories demonstrate how this era transformed colonizers and the colonized alike, sowing the seeds of modern America.

Its opponents call it part of "the lunatic fringe," a justification for "black separateness," "the most embarrassing trend in American publishing." "It" is Critical Race Theory. But what is Critical Race Theory? How did it develop? Where does it stand now? Where should it go in the future? In this volume, thirty-one CRT scholars present their views on the ideas and methods of CRT, its role in academia and in the culture at large, and its past, present, and future. Critical race theorists assert that both the procedures and the substance of American law are structured to maintain white privilege. The neutrality and objectivity of the law are not just unattainable ideals; they are harmful actions that obscure the law's role in protecting white supremacy. This notion—so obvious to some, so unthinkable to others—has stimulated and divided legal thinking in this country and, increasingly, abroad. The essays in *Crossroads*, *Directions*, and *A New Critical Race Theory*—all original—address this notion in a variety of helpful and exciting ways. They use analysis, personal experience, historical narrative, and many other techniques to explain the importance of looking critically at how race permeates our national consciousness.

In *Empire's Crossroads*, Carrie Gibson offers readers a vivid, authoritative and action-packed history of the Caribbean. For Gibson, everything was created in the West Indies: the Europe of today, its financial foundations built with sugar money; the factories and mills built as a result of the work of slaves thousands of miles away; the idea of true equality as espoused in Saint Domingue in the 1790s; the slow progress to independence; and even globalization and migration, with the ships passing to and fro taking people and goods in all possible directions, hundreds of years before the term 'globalization' was coined. From Cuba to Haiti, from Dominica to Martinique, from Jamaica to Trinidad, the story of

the Caribbean is not simply the story of slaves and masters - but of fortune-seekers and pirates, scientists and servants, travellers and tourists. It is not only a story of imperial expansion - European and American - but of global connections, and also of life as it is lived in the islands, both in the past and today.

Crossroads of Cuisine offers history of food and cultural exchanges in and around Central Asia. It discusses geographical base, and offers historical and cultural overview. A photo essay binds it all together. The book offers new views of the past.

'Memoirs of such richness are rare . . . a joy' JAMES NAUGHTIE 'A remarkable personal journey, by one of the great political correspondents of our world - eloquent, enlightening, exhilarating' PHILIPPE SANDS A trailblazer for women in journalism, Hella Pick arrived in Britain in 1939 as a child refugee from Austria. Over nearly four decades she covered the volatile global scene, first in West Africa, followed by America and long periods in Europe. In her thirty-five years with the Guardian she reported on the end of Empire in West Africa, the assassination of President Kennedy, Martin Luther King's march from Selma to Montgomery, the Vietnam peace negotiation in Paris, the 1968 student revolt in France, the birth of the Solidarity movement in Poland, and the closing stages of the Cold War. A request for coffee on board a Soviet ship anchored in Malta led to a chat with Mikhail Gorbachev. A request for an interview with Willy Brandt led to a personal friendship that enabled her to come to terms with Germany's Nazi past. Her book is also a clarion call for preserving professionalism in journalism at a time when social media muddy the waters between fact and fiction, and between reporting and commentary. INVISIBLE WALLS tells the dramatic story of how a Kindertransport survivor won the trust and sometimes the friendship of world leaders, and with them a wide range of remarkable men and women. It speaks frankly of personal heartache and of a struggle over her Jewish identity. It is also the intensely touching story of how, despite a gift for friendship and international recognised achievements as a woman journalist, a continuing sense of personal insecurity has confronted her with a series of invisible walls.

Rich and diverse narratives of Indigenous Toronto, past and present Beneath many major North American cities rests a deep foundation of Indigenous history that has been colonized, paved over, and, too often, silenced. Few of its current inhabitants know that Toronto has seen twelve thousand years of uninterrupted Indigenous presence and nationhood in this region, along with a vibrant culture and history that thrives to this day. With contributions by Indigenous Elders, scholars, journalists, artists, and historians, this unique anthology explores the poles of cultural continuity and settler colonialism that have come to define Toronto as a significant cultural hub and intersection that was also known as a Meeting Place long before European settlers arrived. "This book is a reflection of endurance and a helpful corrective to settler fantasies. It tells a more balanced account of our communities, then and now. It offers the space for us to reclaim

our ancestors' language and legacy, rewriting ourselves back into a landscape from which non Indigenous historians have worked hard to erase us. But we are there in the skyline and throughout the GTA, along the coast and in all directions." -- from the introduction by Hayden King

Examines the political, economic, and social transformation Mexico has undergone in recent decades, and argues that the United States' antagonistic policy toward the nation is doing more harm than good.

This year marks the 30th anniversary of the United Nations Convention on the Rights of the Child. This report celebrates the achievements of the past three decades and highlights the critical work that remains. It presents data on several key issues where progress is stalling or reversing: child mortality, immunization, climate change, education participation, child marriage, and urbanization. The report also advocates for all stakeholders to recommit to the Convention, stepping up their efforts to fulfil its promise in the next 30 years.

Using the notion of 'crossroads' to provide a unique lens through which to examine the realities of rural crime, Crossroads of Rural Crime provides an understanding of the nature of rural life and ways in which transgression manifests itself in the context of a presumed rural-urban divide.

The U.S.-Mexico borderlands have long supported a web of relationships that transcend the U.S. and Mexican nations. While national histories have tended to overlook these complex connections, Continental Crossroads rewrites borderlands history by focusing on them. The contributors to this collection chronicle the transnational processes that bound Mexico and the United States together during the borderlands' formative era-from the early nineteenth century into the 1940s. Book jacket.

"Higher education in Latin America and the Caribbean has expanded dramatically in the past 15 years, as the average gross enrollment rate has more than doubled, and many new institutions and programs have been opened. Although higher education access has become more equitable, and higher education supply has become more varied, many of the 'new' students in the system are, on average, less academically ready than are their more advantaged counterparts. Furthermore, only half of higher education students, on average, complete their degree, and labor market returns to higher education vary greatly across institutions and programs. Thus, higher education is at a crossroads today. Given the region's urgency to raise productivity in a low-growth, fiscally constrained environment, going past this crossroads requires the formation of skilled human capital fast and efficiently. 'At a Crossroads: Higher Education in Latin America and the Caribbean' contributes to the discussion by studying quality, variety, and equity of higher education in Latin America and the Caribbean. The book presents comprehensive evidence on the recent higher education expansion and evolution of higher education labor market returns. Using novel data and state-of-the-art methods, it studies demand and supply drivers of the recent expansion. It investigates the behavior of institutions and students and explores the unintended consequences of large-scale higher education policies. Framing the analysis are the singular characteristics of the higher education market and the market segmentation induced by the variety of students and institutions in the system. At this crossroads, a role emerges for incentives, information, accountability, and choice."

International Education at the Crossroads captures the essence and complexity of international education in an interconnected and globalized world. Written by leading scholars, international educators, and policy makers, the 26 essays in this volume take stock of the unpredictable landscape of international education and demonstrate why international higher education is more essential now than ever before. Responding to a timely global moment where education and international engagement are being redefined and practiced in new ways, the authors call for a reconsideration of paradigms and critical reflection of the entire field of international education. At the same time, the authors show how international education is an imperative for the future of learning and the world, and also, crucially, that this work cannot be done in a silo. International Education at the Crossroads offers readers a chance to join in the conversation that is as global as it is meaningful in communities, the lives of learners, and institutions around the world. International education requires that everyone the world over work together to produce new knowledge, to navigate the "crossroads," and to collectively chart the directions in which the field will move into the future.

The volume describes the worldwide state of the HIV/AIDS epidemic and possible ways forward. Marking the 30 years of AIDS, the report takes stock of the changes occurred in the AIDS epidemic and responses since the condition was first diagnosed in 1981. It also features commentaries from 15 leaders in the global AIDS response, including South Africa's President Jacob Zuma, former United States President Bill Clinton, former President of Brazil Luiz Inácio Lula da Silva, singer Angelique Kidjo and former UN Secretary-General Kofi Annan. It covers a wide range of areas, including the results achieved by HIV prevention efforts, the record number of people starting lifesaving treatment and the decline in resources for HIV. It also draws attention to the significant challenges remaining such as the gender inequalities and the increasing HIV prevalence among key populations at higher risk of infection.

In the late nineteenth century the borderlands between the United States, the British Empire in Canada, and the Asia-Pacific Rim emerged as a crossroads of the Pacific world. In *Pacific Connections*, Kornel Chang tells the dramatic stories of the laborers, merchants, smugglers, and activists who crossed these borders into the twentieth century, and the American and British empire-builders who countered them by hardening racial and national lines. But even as settler societies attempted to control the processes of imperial integration, their project fractured under its contradictions. Migrant workers and radical activists pursued a transnational politics through the very networks that made empire possible. Charting the U.S.-Canadian borderlands from above and below, Chang reveals the messiness of imperial formation and the struggles it spawned from multiple locations and through different actors across the Pacific world. *Pacific Connections* is the winner of the Outstanding Book in History award from the Association for Asian American Studies and is a finalist for the John Hope Franklin Book Prize from the American Studies Association.

A prominent former neoconservative and author of "The End of History and the Last Man" explains why the Iraqi war was a mistake and outlines new directions for American foreign policy.

Historically, few topics have proven to be so controversial in international intellectual property as the protection of geographical indications (GIs). The adoption of TRIPS in 1994 did not resolve disagreements, and countries

worldwide continue to quarrel today as to the nature, the scope, and the enforcement of GI protection nationally and internationally. Thus far, however, there is little literature addressing GI protection from the point of view of the Asia-Pacific region, even though countries in this region have actively discussed the topic and in several instances have promoted GIs as a mechanism to foster local development and safeguard local culture. This book, edited by renowned intellectual property scholars, fills the void in the current literature and offers a variety of contributions focusing on the framework and effects of GI protection in the Asia-Pacific region. The book is available as Open Access.

This book explores the instrumental manipulation of citizenship and narrowing definitions of national-belonging which refract political struggles in Zimbabwe, Cote d'Ivoire, Cameroon, Somalia, Tanzania, and South Africa, where conflicts are legitimated through claims of exclusionary nationhood and redefinitions of citizenship.
