This book examines experiences of home improvement in the UK and Aotearoa New Zealand, providing valuable insight into the ways in which people make and maintain home in social, material and economic context. Drawing on in-depth interviews, examining both DIY projects and projects carried out by professional handymen, Rosie Cox explores how home improvement fits into wider social relationships and structures of inequality. Consideration is given to the importance of such work for gender and national identities, and how these identities are related to material contexts and the forms and fabric of homes. The book also highlights how home improvement can be a rewarding and valuable form of work, as well as an unrewarding and alienating endeavour. It will be of interest to scholars from a range of disciplines including anthropology, sociology and human geography.

This book explores the history of reggae in modern Britain from the time it emerged as a cultural force in the 1970s. As basslines from Jamaica reverberated across the Atlantic, so they were received and transmitted by the UK's Afro-Caribbean community. From roots to lovers' rock, from deejays harnessing the dancehall crowd to dub poets reporting back

from the socio-economic front line, British reggae soundtracked the inner-city experience of black youth. In time, reggae's influence permeated the wider culture, informing the sounds and the language of popular music whilst also retaining a connection to the street-level sound systems, clubs and centres that provided space to create, protest and innovate. This book is therefore a testament to struggle and ingenuity, a collection of essays tracing reggae's importance to both the culture and the politics of late twentieth and early twenty-first century Britain.

Working for yourself can be rewarding both personally and financially, but it can also be very tough and many small businesses fail in their first year. Frances Ive's book helps you to decide if you are the right kind of person to venture out on your own, and looks closely at both the advantages and the pitfalls of working for yourself. It also outlines the practical and emotional aspects of setting up on your own. Self-employment is very popular in the UK and is particularly suitable for women who need to run their work life around the family and the over 50s who feel that the workplace is not favourable for older people, but are nevertheless very capable and experienced. Being self-employed is very different from being employed because you have to do everything for yourself and have complete responsibility for the success or failure of the

business. Conversely, you have considerable freedom and can be in control of your own destiny. This book provides a frank insight into the world of self-employment and enables people to see if it is right for them. Author: Frances Ive

This book tells the story of the turbulent decades when the book publishing industry collided with the great technological revolution of our time. From the surge of ebooks to the self-publishing explosion and the growing popularity of audiobooks, *Book Wars* provides a comprehensive and fine-grained account of technological disruption in one of our most important and successful creative industries. Like other sectors, publishing has been thrown into disarray by the digital revolution. The foundation on which this industry had been based for 500 years – the packaging and sale of words and images in the form of printed books – was called into question by a technological revolution that enabled symbolic content to be stored, manipulated and transmitted quickly and cheaply. Publishers and retailers found themselves facing a proliferation of new players who were offering new products and services and challenging some of their most deeply held principles and beliefs. The old industry was suddenly thrust into the limelight as bitter conflicts erupted between publishers and new entrants, including powerful new tech giants who saw the world in very different ways. The book wars had begun. While ebooks were at the

heart of many of these conflicts, Thompson argues that the most fundamental consequences lie elsewhere. The print-on-paper book has proven to be a remarkably resilient cultural form, but the digital revolution has transformed the industry in other ways, spawning new players which now wield unprecedented power and giving rise to an array of new publishing forms. Most important of all, it has transformed the broader information and communication environment, creating new challenges and new opportunities for publishers as they seek to redefine their role in the digital age. This unrivalled account of the book publishing industry as it faces its greatest challenge since Gutenberg will be essential reading for anyone interested in books and their future.

What is the relationship between women and secularization? In the West, women are abandoning traditional religion. Yet they continue to make up the majority of religious adherents. Accounting for this seeming paradox is the focus of this volume. If women undergird the foundations of religion but are leaving in large numbers, why are they leaving? Where are they going? What are they doing? And what's happening to those who remain? *Women and Religion in the West* addresses a neglected yet crucial issue within the debate on religious belonging and departure: the role of women in and out of religion and spirituality. Beginning with an analysis of

the relationship between gender and secularization, the book moves its focus to in-depth examination of women's experiences based on data from key recent qualitative work on women and religion. This volume addresses not only women's place in and out of Christianity (the normal focus of secularization theories) but also alternative spiritualities and Islam, asking how questions of secularization differ between faith systems. This book offers students and scholars of religion, sociology, and women's studies, as well as interested general readers, an accessible work on the religiosity of western women and contributes fresh analyses of the rapidly shifting terrain of contemporary religion and spirituality.

This is a secret history of modern times, told by way of what conventional history tries to exclude. Lipstick Traces tells a story as disruptive and compelling as the century itself.

Are you Future Ready? McKinsey, the global consulting firm, estimates that between the present and 2030, 75 to 375 million workers need to switch jobs that will require new skills and new education just due to automation and tech disruption: “In terms of magnitude, it's akin to coping with the large-scale shift from agricultural work to manufacturing that occurred in the early 20th century in North America and Europe, and more recently in China.

But in terms of who must find new jobs, we are moving into uncharted territory. Those earlier workforce transformations took place over many decades, allowing older workers to retire and new entrants to the workforce to transition to the growing industries. But the speed of change today is potentially faster. The task confronting every economy, particularly advanced economies, will likely be to retrain and redeploy tens of millions of midcareer, middle-age workers.” In this book, we explore the Future of Work and how it’s going to affect all of us in critical ways. We look at Disruption Rules through the lens of paradigm shifts, disruptive forces, and VUCA (Volatility, Uncertainty, Complexity, Ambiguity). We look at what causes these changes, why it matters to you the reader, how it impacts you, and most importantly, what you can learn and do as a result of these disruptions. The main title of this book is Working It. As the title implies, Working It can be what you do to earn a living or what you do to have fun or how you live your life. In other words, Working It is all the stuff you do that have meaning and value for you. So when you go through this book, you’ll notice that many of the stories go beyond what you do at the place that provides you income. We focus on the meaning and things that are important to your Working It - Disruption Rules. When there’s a disruption, most of us find a job or career book to find answers and encouragement. Most old-school job books provide life, career, or job road maps. Follow these steps and you’ll get to where you want to be. If you believe these principles and follow these practices, you’ll find a satisfying job and enjoy a

substantial salary with guaranteed yearly increases. In this book, we want to get real, provide insights, and tell it like it is! The Future of Work impacts people on a daily basis since it deals with our human needs, wants, and expectations. The Future of Work is now! So, we'd say that the Future of Work is important and relevant to the vast majority of people worldwide.

The recent, devastating and ongoing economic crisis has exposed the faultlines in the dominant neoliberal economic order, opening debate for the first time in years on alternative visions that do not subscribe to a 'free' market ethic. Bringing together the work of distinguished scholars and dedicated activists, *The Rise and Fall of Neoliberalism* presents critical perspectives of neoliberal policies, questions the ideas underpinning neoliberalism, and explores diverse responses to it from around the world.

Introducing readers to the study of law, media and popular culture, this text, using three original case studies, re-examines the assumptions underpinning existing research and suggests alternatives. Arguing that the study of law, media and popular culture should be

embedded in the sociology of everyday life, the author focuses on four specific topics, in which there is scope for further development. These are the facts that: the current literature in this field predominantly focuses on crime, neglecting the way the media portrays less spectacular, more run-of-the-mill legal topics fiction, primarily, has captured scholars' attention, with remarkably less being paid to representations of law, other than crime, in factual media textual analysis continues to be the preferred method in the study of law and the media the literature is dominated by a fear of corrosive media effects, while the potential of the media and popular culture to improve public legal knowledge, facilitate access to justice and promote legal change remains largely undocumented. Exploring the often uneasy relationship between law and popular culture from specific socio-legal perspectives, including systems theory, semiotics of law and legal pluralism, this book is an essential read for those studying and researching in this area.

This book will introduce the reader to the world of voluntary risk-taking, investigating the seductive nature of pursuing peril and teasing out boundaries between legal and criminal behavior.

"In this pamphlet, architect Usman Haque and media theorist Matthew Fuller look beyond established precepts and explore an alternate technology of space making derived from the politics of "code" itself. "This book provides a very good introduction to the key concepts and theories that inform and frame the current psychotherapeutic and counselling landscape. Each author has written on a selection of basic concepts as they are approached in their preferred therapeutic modality, resulting in an exciting and inclusive overview of both old and contemporary psychotherapeutic thought. In addition, each author is mindful of the importance of a critical appraisal of the various concepts and theories. Thus, this book will be extremely useful both for trainees and practitioners." Dr Anastasios Gaitanidis, Senior Lecturer, University of Roehampton, London, UK

"As well as being an invaluable source of knowledge about all aspects of counselling and psychotherapy, this book is a real pleasure to read. The authors have been able to capture the essence of ideas, traditions and key figures in a way that is accessible and a consistent source of delight and illumination. Highly recommended for anyone wishing to expand their psychotherapeutic horizons." John McLeod, Emeritus Professor of Counselling, University of Abertay Dundee, UK

"This book does what it says on the tin, it highlights the key concepts and theories in the field of counselling and psychotherapy. It is a systematic and encyclopaedic voyage of all the central constructs in the field. It is very well written, snappy and thorough, but more important, it serves a vital need of putting in one place all the theories and concepts needed by anyone interested in counselling and psychotherapy." Cary L. Cooper, CBE, Professor of

Organizational Psychology and Health, Lancaster University, UK and President of BACP "This is an invaluable guide for anyone wanting easily accessible information about counselling theory and practice. It will be as useful to trainees sitting as counsellors, as to experienced practitioners wanting to update their knowledge on the latest thinking." Tim Bond, University of Bristol, UK This helpful book offers a concise overview of core concepts within the four dominant approaches to counselling and psychotherapy: psychodynamic, humanistic-existential, cognitive behavioural and integrative. The book aims to assist you in developing your critical thinking and essay writing skills and includes: Over 140 entries, each between 500 and 1200 words Critical and engaging discussions of core concepts Biographical sketches of leading theorists, including: Freud, Jung and Rogers Using the popular alphabetical format, Key Concepts in Counselling and Psychotherapy is an ideal first source for students with an essay on counselling theory to write, a case study to analyse, a belief or assumption to challenge, or a question to explore. It will also appeal to practitioners or academics wanting to refresh their knowledge of theory and research.

Clinical Legal Education (CLE) can be defined in broad terms as the study of law through real, or simulated, casework. It enables students to experience the law in action and to reflect on those experiences. CLE offers an alternative learning experience to the traditional lecture/seminar method and allows participants to take the study of law beyond the lecture theatre and library. CLE has been a part of English law schools for several decades and is becoming an increasingly popular component of a number of programmes. It is also well established in North America, Australia and many other countries around the globe. In some law schools, CLE is credit-bearing; in others, it is an extracurricular activity. Some

CLE schemes focus on social-welfare law, whilst others are commercially orientated. A number are run in conjunction with third-sector organisations and many are supported by private practice law firms. This edited collection brings together academics, lawyers, third-sector organisations and students to discuss the present experience and potential of CLE. As such, it will be of interest to a wide and diverse audience, both within and outside the UK.

While feminists have long recognised the importance of self-managed, alternative media to transport their messages, to challenge the status quo, and to spin novel social processes, this topic has been an under-researched area. Hence, this book explores the processes of women's and feminist media production in the context of participatory spaces, technology, and cultural citizenship. The collection is composed of theoretical analyses and critical case studies. It highlights contemporary alternative feminist media in general as well as blogs, zines, culture jamming, and street art.

This book examines how young people understand and live politics, using innovative research methods. It treats age, class, gender and ethnicity as political 'lived experiences'. It concludes that young people are alienated, rather than apathetic, and that their interests and concerns are rarely addressed within mainstream political institutions.

As the twenty-first century begins, significant changes are occurring in the way that services and goods are produced and consumed. One of the key drivers of this change is information and communications technology (ICT). It has

transformed the role of space and time in patterns of economic development, in the rise of globalization and in the scale and structure of organizations. ICT has therefore accelerated the process of continual change and evolution that is the hallmark of both the capitalist economy and of organizations. Giving a student-friendly account of the diversity of theoretical perspectives, this outstanding book aids understanding the evolving economic geography of advanced capitalist economies. A series of detailed firm and employees' case studies from Europe, North America and the Asia Pacific, are used to inform useful theoretical case studies, which also investigate the significance of increased blurring of the lines between services and manufacturing functions in the production and consumption process.

Our love affair with the digital interface is out of control. We've embraced it in the boardroom, the bedroom, and the bathroom. Screens have taken over our lives. Most people spend over eight hours a day staring at a screen, and some "technological innovators" are hoping to grab even more of your eyeball time. You have screens in your pocket, in your car, on your appliances, and maybe even on your face. Average smartphone users check their phones 150 times a day, responding to the addictive buzz of Facebook or emails or Twitter. Are you sick? There's an app for that! Need to pray? There's an

app for that! Dead? Well, there's an app for that, too! And most apps are intentionally addictive distractions that end up taking our attention away from things like family, friends, sleep, and oncoming traffic. There's a better way. In this book, innovator Golden Krishna challenges our world of nagging, screen-based bondage, and shows how we can build a technologically advanced world without digital interfaces. In his insightful, raw, and often hilarious criticism, Golden reveals fascinating ways to think beyond screens using three principles that lead to more meaningful innovation. Whether you're working in technology, or just wary of a gadget-filled future, you'll be enlightened and entertained while discovering that the best interface is no interface. Spatialities draws on a distinguished panel of artists, cultural theorists, architects, and geographers to offer a nuanced conceptual framework for understanding the ever-evolving spatial orderings that materially constitute our world.

This book is a detailed examination of whether domestic security measures are striking an appropriate balance between homeland security and civil liberties in the post-9/11 era. Professor Paul Wilkinson and the other contributors assess the nature of UK responses to terrorism by key public and private-sector bodies, highlighting how these organizations can prevent, pre-empt, counter and manage terrorist attacks by using a matrix of factors

such as types of terrorist networks, tactics and targets. The volume also compares and contrasts the UK's response with cognate states elsewhere in the EU and with the USA. While improved intelligence has helped prevent a major Al Qaeda attack, the authors conclude that there is still a 'major question mark' over whether the country is adequately resourced to deal with an emergency situation, particularly in major cities other than London. The book also confirms that while the UK faces a 'real and serious' threat of terrorist attack by Al Qaeda, it is better prepared for an attack than other EU member states. Homeland Security in the UK will be essential reading for all students of terrorism studies, security studies and politics, as well as by professional practitioners and well-informed general readers.

This book discusses homelessness policy in the UK from 1945 to 2019. It identifies five key factors that have driven policy: the favoured explanations for homelessness, distinctions between different groups of homeless people, demand for social rented housing, geographical differences and the forms of prevention preferred by policy makers. The account analyses how these factors have influenced key pieces of legislation such as the 1948 National Assistance Act, the 1977 Housing (Homeless Persons) Act and the 2002 Homelessness Act. It also identifies the key issues that policy has sought to address at different times, including children being taken into care because of their parents' homelessness, rough sleeping, the use of bed and breakfast hotels as temporary accommodation, social exclusion and welfare reform. In addition to published sources and archival material, the book draws on the experiences of two former Ministers and other key figures in the development of

homelessness policy.

From self-help books and nootropics, to self-tracking and home health tests, to the tinkering with technology and biological particles - biohacking brings biology, medicine, and the material foundation of life into the sphere of »do-it-yourself«. This trend has the potential to fundamentally change people's relationship with their bodies and biology but it also creates new cultural narratives of responsibility, authority, and differentiation. Covering a broad range of examples, this book explores practices and representations of biohacking in popular culture, discussing their ambiguous position between empowerment and requirement, promise and prescription.

This insightful book sets out five core elements of good practice that will lead to great teaching and learning both within and beyond the classroom. It looks in detail at the learning process and how teachers can support this through a rich mix of teacher-led direct instruction and collaborative and online learning, both flipped and blended. Covering five major themes to reset our pedagogy, *Advancing Learning Within and Beyond the Classroom* presents the key evidence about 'what works' alongside practical activities to adopt or adapt to enhance your own practice. The chapters cover: the application of precise curricular knowledge the presentation of key questions to guide, check and deepen learning elaboration to build deep understanding personalised feedback to accelerate progress the introduction of regular challenges to drive high learning outcomes and relevant commercial and world-class standards Including a comprehensive overview of evidence-based practice and a wealth of practical strategies to drive engagement and productive learning, this is essential reading for all teachers working in secondary schools or further education.

contains practical tools, down-to-earth frameworks and useful methods, a valuable resource for working with communities. A key focus of the book is on empowering the grass roots – building people, groups, organisations, partnerships and networks. In particular, it describes how strong communities might look with seven key features and introduces a new 'Wheel of Participation' as a useful planning framework. Written by a practitioner for both students and other practitioners, the book combines theory and practice, draws on recent research and is packed with practical examples. This is key reading for community studies, social work or youth and community programmes, and will also be useful in many different settings, such as regeneration, local government, health and housing.

This book examines the nature of service design and service thinking in healthcare and hospital management. By adopting both a service-based provider perspective and a consumer-oriented perspective, the book highlights various healthcare services, methods and tools that are desirable for customers and effective for healthcare providers. In addition, readers will learn about new research directions, as well as strategies and innovations to develop service solutions that are affordable, sustainable, and consumer-oriented. Lastly, the book discusses policy options to improve the service delivery process and customer satisfaction in the healthcare and hospital sector. The contributors cover various aspects and fields of application of service design and service thinking, including service design processes, tools and methods; service blueprints and service delivery; creation and implementation of services; interaction design and user experience; design of service touchpoints and service interfaces; service excellence and service innovation. The book will appeal to all scholars and practitioners in the hospital and healthcare sector who are interested in
