"In George C. Edward III's Changing their Minds? Donald Trump and Presidential Leadership, Edwards looks at the microcosm of Donald Trump's first term as president and uses it to evaluate current theories of the power of presidential persuasion. Edwards contends that the idea of the bully pulpit-the argument that presidents have the ability to persuade the public and members of Congress to support their policies because of their office and the media attention they receive-is nonsense, and that the way presidents accomplish their goals is by identifying strategic opportunities-alliances with

rising interest groups or the cultivation of members of Congress—to make progress on issues for which there is already support for the president's position. Edwards is critical of presidents who think they can successfully restructure the politics of the country. His argument is that Trump had relatively limited opportunities to change the dialogue around issues such as health care and has done a bad job of taking advantage of the opportunities that he has been offered, except on taxes. He also looks at the way Trump has dealt with Congress and, placing it in the context of scholarly work on presidential-congressional relations, shows why Trump has been a failure in dealing with the legislature"—based on author's thesis (doctoral - Universitéat Basel, 2016) issued under title: The extraterritorial protection of animals: admissibility and possibilities of the application of national animal welfare standards to animals in foreign countries.

The author provides readers with the ability to set up their own investigative files. He helps them devise a scale to measure the effectiveness of officials that are part of the story. The reader will be able to question, with some authority, why the Norma Maynard case has not been resolved. Was this a deliberate choice by Iowa law enforcement and legal and judicial officials? If you elect to sleuth along with the author, will you be the one to solve the almost forty year riddle of the disappearance of Norma Maynard?

Longlisted for the National Book Award for Nonfiction "There Kevin Young goes again, giving us books we greatly need, cleverly disguised as books we merely want. Unexpectedly essential."—Marlon James Award-winning poet and critic Kevin Young tours us through a rogue's gallery of hoaxers, plagiarists, forgers, and fakers—from the humbug of P. T. Barnum and Edgar Allan Poe to the unrepentant bunk of JT LeRoy and Donald J. Trump. Bunk traces the history of the hoax as a peculiarly American phenomenon, examining what motivates hucksters and makes the rest of us so gullible. Disturbingly, Young finds that fakery is woven from stereotype and suspicion, race being the most insidious American hoax of all. He chronicles how Barnum came to fame by displaying figures like Joice Heth, a black woman whom he pretended was the 161-year-old nursemaid to George Washington, and What Is It?, an African American man Barnum professed was a newly discovered missing link in evolution. Bunk then turns to the hoaxing of history and the ways that forgers, plagiarists, and journalistic fakers invent backstories and falsehoods to sell us lies about themselves and about the world in our own time, from pretend Native Americans Grey Owl and Nasdijj to the deadly imposture of Clark Rockefeller, from the made-up memoirs of James Frey to the identity theft of Rachel Dolezal. In this brilliant and timely work, Young asks what it means to live in a post-factual world of "truthiness" where everything is up for interpretation and everyone is subject to a pervasive cynicism that damages our ideas of reality, fact, and art.

Foreword by Monica Lewinsky and as seen on Dr. Oz "Smart. Timely. Essential. The era's must-read to renew Internet civility." — Michele Borba ED.D, author of *Unselfie* An essential toolkit to help everyone — from parents to teenagers to educators — take charge of their digital lives. Online shame comes in many forms, and it's surprising how much of an effect a simple tweet might have on your business, love life, or school peers. A rogue tweet might bring down a CEO; an army of trolls can run an individual off-line; and virtual harassment might cause real psychological damage. In *Shame Nation*, parent advocate and internet safety expert Sue Scheff presents an eye-opening examination around the rise in online shaming, and offers practical advice and tips including: • Preventing digital disasters • Defending your online

"Irresistible is a fascinating and much needed exploration of one of the most troubling phenomena of modern times." —Malcolm Gladwell, author of New York Times bestsellers David and Goliath and Outliers "One of the most mesmerizing and important books I've read in quite some time. Alter brilliantly illuminates the new obsessions that are controlling our lives and offers the tools we need to rescue our businesses, our families, and our sanity." —Adam Grant, New York Times bestselling author of Originals and Give and Take Welcome to the age of behavioral addiction—an age in which half of the American population is addicted to at least one behavior. We obsess over our emails, Instagram likes, and Facebook feeds; we binge on TV episodes and YouTube videos; we work longer hours each year; and we spend an average of three hours each day using our smartphones. Half of us would rather suffer a broken bone than a broken phone, and Millennial kids spend so much time in front of screens that they struggle to interact with real, live humans. In this revolutionary book, Adam Alter, a professor of psychology and marketing at NYU, tracks the rise of behavioral addiction, and explains why so many of today's products are irresistible. Though these miraculous products melt the miles that separate people across the globe, their extraordinary and sometimes damaging magnetism is no accident. The companies that design these products tweak them over time until they become almost impossible to resist. By reverse engineering behavioral addiction, Alter explains how we can harness addictive products for the good—to improve how we communicate with each other, spend and save our money, and set boundaries between work and play—and how we can mitigate their most damaging effects on our well-being, and the health and happiness of our children. Adam Alter's previous book, Drunk Tank Pink: And Other Unexpected Forces that Shape How We Think, Feel, and Behave is available in paperback from Penguin.

When Martin McKenna was growing up in Garryowen, Ireland, in the 1970s, he felt the whole world knew him as just "that stupid boy." Badly misunderstood by his family and teachers, Martin escaped from endless bullying by running away from home and eventually adopting—or being adopted by—six street dogs. Camping out in barns, escaping from farmers, and learning to fend for himself by caring for his new friends, Martin discovered a different kind of language, strict laws of behavior, and strange customs that defined the world of dogs. More importantly,

his canine companions helped him understand the vital importance of family, courage, and self-respect—and that he wasn't stupid after all. Their lessons helped Martin make a name for himself as the "Dog Man" in Australia, where he now lives and dispenses his hard-earned wisdom to dog owners who are sometimes baffled by what their four-legged friends are trying to tell them. An emotional and poignant story seasoned with plenty of Frank McCourt-style humor, *The Boy Who Talked to Dogs* is an inspiration to anyone who's ever been told he or she won't amount to anything. It's also a unique, fascinating look into canine behavior. In these pages, Martin shows how modern life has conditioned dogs to act around humans, in some ways helpful, but in other ways unnatural to their true instincts, and how he has benefited enormously from learning to "talk dog."

A true classic with a timeless message! All the other bulls run, jump, and butt their heads together in fights. Ferdinand, on the other hand, would rather sit and smell the flowers. So what will happen when Ferdinand is picked for the bullfights in Madrid? *The Story of Ferdinand* has inspired, enchanted, and provoked readers ever since it was first published in 1936 for its message of nonviolence and pacifism. In WWII times, Adolf Hitler ordered the book burned in Nazi Germany, while Joseph Stalin, the leader of the Soviet Union, granted it privileged status as the only non-communist children's book allowed in Poland. The preeminent leader of Indian nationalism and civil rights, Mahatma Gandhi—whose nonviolent and pacifistic practices went on to inspire Civil Rights leader Martin Luther King, Jr.—even called it his favorite book. The story was adapted by Walt Disney into a short animated film entitled *Ferdinand the Bull* in 1938. *Ferdinand the Bull* won the 1938 Academy Award for Best Short Subject (Cartoons).

For many of us, the only way we meet "dangerous" dogs is through news reports about vicious attacks, and films and TV shows that feature out-of-control versions of man's best friend. But there's more to the *Bad Dog's* story than sensational headlines and movie beasts. A deeper look at these representations reveals a villain much closer to home. This book takes the reader on a rich

journey through depictions of violent dogs in popular media. It explores how press accounts and screen stories transform canines into bloodthirsty hunters, rabies-infested strays, ferocious fighters, rogue law enforcement partners and diabolical pets, all adding up to a frightening picture of our usually beloved companions. But, when media tells the dangerous dog's story, it is often with a deep connection to the person on the other end of the leash.

He's a dog with a phone . . . My dog sends me texts. Yeah. It's weird. When October Jones figured out he could send text messages to himself on his mobile phone, he naturally decided that the best use of this discovery was to send passive-aggressive messages to himself under the guise of his bulldog. And so the exasperating, slightly delusional, and utterly endearing Dog and his alter-ego, BatDog, were born. Texts from Dog features Dog's attempts to keep the neighborhood safe from the likes of Mr. Postman and his arch-nemesis Cat-Cat—he has managed to only smash three TVs and a patio door in the process. And in between crime fighting sprees and run-ins with the squirrel mafia, there are romantic interludes with pillows, fetch sessions gone terribly awry, and the abusive banter only a bromance between man and his text-savvy dog can spawn. For those of us who have ever had a conversation with a pet in our heads, Texts from Dog will make you laugh out loud and perhaps even make you think twice about leaving your pet home alone for the day. A tour de force from acclaimed author Alan Gratz (Prisoner B-3087), this timely -- and timeless -- novel tells the powerful story of three different children seeking refuge.

NEW YORK TIMES BEST SELLER • A grand, devastating portrait of three generations of the Sackler family, famed for their philanthropy, whose fortune was built by Valium and whose reputation was destroyed by OxyContin. From the prize-winning and bestselling author of Say Nothing, as featured in the HBO documentary Crime of the Century. The Sackler name adorns the walls of many storied institutions—Harvard, the Metropolitan Museum of Art, Oxford, the Louvre. They are one of the richest families in the world, known for their lavish donations to the arts and the sciences. The source of the family fortune was vague, however, until it emerged that the Sacklers were responsible for making and marketing a blockbuster painkiller that was the catalyst for the opioid crisis. Empire of Pain begins with the story of three doctor brothers, Raymond, Mortimer and the incalculably energetic Arthur, who weathered the poverty of the Great Depression and appalling anti-Semitism. Working at a barbaric mental institution, Arthur saw a better way and conducted groundbreaking research into drug treatments. He also had a genius for marketing, especially for pharmaceuticals, and bought a small ad firm. Arthur devised the marketing for Valium, and built the first great Sackler fortune. He purchased a drug manufacturer, Purdue Frederick, which would be run by Raymond and Mortimer. The brothers began collecting art, and wives, and grand residences in exotic locales. Their children and grandchildren grew up in luxury. Forty years later, Raymond's son Richard ran the family-owned Purdue. The template Arthur Sackler created to sell Valium—co-opting doctors, influencing the FDA, downplaying the drug's addictiveness—was employed to launch a far more potent product: OxyContin. The drug went on to generate some thirty-five billion dollars in revenue, and to launch a public health crisis in which hundreds of thousands would die. This is the saga of three generations of a single family and the mark they would

leave on the world, a tale that moves from the bustling streets of early twentieth-century Brooklyn to the seaside palaces of Greenwich, Connecticut, and Cap d'Antibes to the corridors of power in Washington, D.C. *Empire of Pain* chronicles the multiple investigations of the Sacklers and their company, and the scorched-earth legal tactics that the family has used to evade accountability. The history of the Sackler dynasty is rife with drama—baroque personal lives; bitter disputes over estates; fistfights in boardrooms; glittering art collections; Machiavellian courtroom maneuvers; and the calculated use of money to burnish reputations and crush the less powerful. *Empire of Pain* is a masterpiece of narrative reporting and writing, exhaustively documented and ferociously compelling. It is a portrait of the excesses of America's second Gilded Age, a study of impunity among the super elite and a relentless investigation of the naked greed and indifference to human suffering that built one of the world's great fortunes.

Maira Kalman, with wit and great sensitivity, reveals why dogs bring out the best in us *Maira Kalman + Dogs = Bliss Dogs* have lessons for us all. In *Beloved Dog*, renowned artist and author Maira Kalman illuminates our cherished companions as only she can. From the dogs lovingly illustrated in her acclaimed children's books to the real-life pets who inspire her still, Kalman's *Beloved Dog* is joyful, beautifully illustrated, and, as always, deeply philosophical. Here is Max Stravinsky, the dog poet of *Oh-La-La (Max in Love)*-fame, and her own Irish Wheaton Pete (almost named Einstein, until he revealed himself to be "clearly no Einstein"), who also made an appearance in the delightful *What Pete Ate: From A to Z*. And of course, there is Boganch, Kalman's in-laws' "big black slobbering Hungarian Beast." And that's just the beginning. With humor and intelligence, Kalman gives voice to the dogs she adores, noting that they are constant reminders that life reveals the best of itself when we live fully in the moment and extend unconditional love. "And it is very true," she writes, "that the most tender, complicated, most generous part of our being blossoms without any effort, when it comes to the love of a dog."

Have you ever been praised or criticized about your body or any part of it? With this question, participants of a research study were invited to share their experiences of body judgment. As participants described, the body is a carrier of messages and the source of judgmental experiences. *Psychoanalytic Perspectives on Gaze, Body Image, Shame, Judgment and Maternal Function: Being and Belonging* offers an insightful and engaging psychoanalytical account of experiences of shame and fear of rejection, explained through clinical vignettes and research participants' scripts. Exploring the findings from the individual and social standpoints, as well as the cultural and historical influences, Dr. Roth proposes that judgements are experienced as attacks, with the meaning attributed to the criticized body part, affecting the sense of self and forming a central point of the participants' identity trauma. Furthermore, that as guilt requires

reparative action, shame requires an act of sacrifice to align the individual to the ideal and to preserve the matrix of belonging, thus explaining the participants' use of alienation as a defense. This book will be of great interest to psychoanalysts and psychotherapists, as well as scholars of culture and religion. Giving a brief introduction to psychoanalytic concepts, with a full glossary, it will also appeal to the non-psychoanalytic reader, interested in body image and how related perceptions and judgements can affect our own sense of Being and Belonging.

A celebrated social psychologist offers a radical new perspective on cultural differences that reveals why some countries, cultures, and individuals take rules more seriously and how following the rules influences the way we think and act. In *Rule Makers, Rule Breakers*, Michele Gelfand, "an engaging writer with intellectual range" (*The New York Times Book Review*), takes us on an epic journey through human cultures, offering a startling new view of the world and ourselves. With a mix of brilliantly conceived studies and surprising on-the-ground discoveries, she shows that much of the diversity in the way we think and act derives from a key difference—how tightly or loosely we adhere to social norms. Just as DNA affects everything from eye color to height, our tight-loose social coding influences much of what we do. Why are clocks in Germany so accurate while those in Brazil are frequently wrong? Why do New Zealand's women have the highest number of sexual partners? Why are red and blue states really so divided? Why was the Daimler-Chrysler merger ill-fated from the start? Why is the driver of a Jaguar more likely to run a red light than the driver of a plumber's van? Why does one spouse prize running a tight ship while the other refuses to sweat the small stuff? In search of a common answer, Gelfand spent two decades conducting research in more than fifty countries. Across all age groups, family variations, social classes, businesses, states, and nationalities, she has identified a primal pattern that can trigger cooperation or conflict. Her fascinating conclusion: behavior is highly influenced by the perception of threat. "A useful and engaging take on human behavior" (*Kirkus Reviews*) with an approach that is consistently riveting, *Rule Makers, Ruler Breakers* thrusts many of the puzzling attitudes and actions we observe into sudden and surprising clarity.

What does it mean to be poor in Britain and America? For decades the primary narrative about poverty in both countries is that it has been caused by personal flaws or 'bad life decisions' rather than policy choices or economic inequality. This misleading account has become deeply embedded in the public consciousness with serious ramifications for how financially vulnerable people are seen, spoken about and treated. Drawing on a two-year multi-platform initiative, this book by award-winning journalist and author Mary O'Hara, asks how we can overturn this portrayal once and for all. Crucially, she turns to the real experts to try to find answers – the people who live it.

Shame severs our relationship from God. It is so powerful that it often results in denial, apathy, and even a self-defensive wrath toward neighbor. At the same time, shame may drive us to discover the true source of our dignity beyond our isolated and broken

self. The arc of the biblical narrative takes us from the fig leaves of Adam and Eve, who desire to hide from God and each other, to the liberation from self-consciousness that Jesus displays at the Last Supper, which can be seen as “undoing” the shame of Adam and Eve. Shame is the experience that can bring us close to the experience of the Cross, the place of simultaneous condemnation and liberation. By examining the biblical stories of shame and some personal and public stories of shame and of being shamed, Hirschfeld delves into this emotional and spiritual phenomenon to mine what shame has to teach. Shame cannot be erased, but God does not want us to be stuck in it. Working through our shame can lead us to a deeper sense of joy and freedom so we can, as the Proper Preface for Advent says, “without shame or fear rejoice to behold [Christ’s] appearing?” According to the Chinese zodiac, 2018 was the year of the ‘earthly dog’. In the middle of the long, hot, and feverish dog days of the summer of 2018, some workers at Shenzhen Jasic Technology took their chances and attempted to form an independent union. While this action was met by the harshest repression, it also led to extraordinary demonstrations of solidarity from small groups of radical students from all over the country, which in turn were immediately and severely suppressed. China’s year of the dog was also imbued with the spirit of another canine, Cerberus—the three-headed hound of Hades—with the ravenous advance of the surveillance state and the increasing securitisation of Chinese society, starting from the northwestern region of Xinjiang. This Yearbook traces these latest developments in Chinese society through a collection of 50 original essays on labour, civil society, and human rights in China and beyond, penned by leading scholars and practitioners from around the world.

Based on the web phenomenon Dogshaming and containing photos that are all-new and exclusive to the book, this hilarious album showcases adorable snapshots of shamed pups confessing their biggest - and grossest - sins.

Trump, the Alt-Right and Public Pedagogies of Hate and for Fascism: What Is To Be Done? uses public pedagogy as a theoretical lens through which to view discourses of hate and for fascism in the era of Trump and to promote an anti-fascist and pro-socialist public pedagogy. It makes the case for re-igniting a rhetoric that goes beyond the undermining of neoliberal capitalism and the promotion of social justice, and re-aligns the left against fascism and for a socialism of the twenty-first century. Beginning with an examination of the history of traditional fascism in the twentieth century, the book looks at the similarities and differences between the Trump regime and traditional Western post-war fascism. Cole goes on to consider the alt-right movement, the reasons for its rise, and the significance of the internet being harnessed as a tool with which to promote a fascistic public pedagogy. Finally, the book examines the resistance against these discourses and addresses the question of: what is to be done? This topical book will be of great interest to scholars, to postgraduate students and to researchers, as well as to advanced undergraduate students in the fields of education studies, pedagogy, and sociology, as well as readers in general who are interested in the phenomenon of Trumpism.

The second Book in the Shame Series By Valerie Ratcliff Walsh. A book of Testimonies on those who Shame The Day and got the victory & Poetry on Shame and Shaming the Day.

Now a New York Times bestseller and from the author of The Psychopath Test, a captivating and brilliant exploration of one of our

world's most underappreciated forces: shame. 'It's about the terror, isn't it?' 'The terror of what?' I said. 'The terror of being found out.' For the past three years, Jon Ronson has travelled the world meeting recipients of high-profile public shamings. The shamed are people like us - people who, say, made a joke on social media that came out badly, or made a mistake at work. Once their transgression is revealed, collective outrage circles with the force of a hurricane and the next thing they know they're being torn apart by an angry mob, jeered at, demonized, sometimes even fired from their job. A great renaissance of public shaming is sweeping our land. Justice has been democratized. The silent majority are getting a voice. But what are we doing with our voice? We are mercilessly finding people's faults. We are defining the boundaries of normality by ruining the lives of those outside it. We are using shame as a form of social control. Simultaneously powerful and hilarious in the way only Jon Ronson can be, *So You've Been Publicly Shamed* is a deeply honest book about modern life, full of eye-opening truths about the escalating war on human flaws - and the very scary part we all play in it.

A new collection of very short stories selected by Flash Fiction editor James Thomas and Robert Scotellaro. All of the stories in this book are exceptionally short, revealing themselves in no more than 300 words. With a foreword by Robert Shapard and an afterword by Christopher Merrill, this book brings you fresh approaches to an exacting form that demands precision, a species of brevity that is surprisingly expansive. Writers say the pieces are hard to compose, but readers say they are easy to appreciate, a pleasure to envision, a wonder to watch life spun out and painted in small places. Real and surreal, lyrical and prosaic, here are 135 stories by 89 authors, certain to make you think.
