

E Book Of Communication Skill By Parul Popat

Communication is the absolutely indispensable leadership discipline. But, too often, leaders and professional communicators get mired in tactics, and fail to influence public attitudes in the ways that would help them the most. This book builds on the U.S. Marine Corps' legendary publication *Warfighting*, showing how to apply the Corps' proven leadership and strategy doctrine to all forms of public communication. The author reveals how to orient on audiences, recognizing their centers of gravity and most critical concerns. He also teaches how to integrate and succeed with all three levels of communication: strategic, operational, and tactical. He shows how to take the initiative and control the agenda, respond to events with speed and focus, use the power of maneuver, prepare and plan, and put it all together, in order to become a "habitually strategic" communicator.

In this module on communication, the reader explores the nature and consequences of a particular definition of communication: the expression and interpretation of meaning in a given context. Special attention is given to context (i.e., physical setting, participants, purpose of communication) and how these impact how we think about communication in language classrooms.
