Combines an overview of the field of mass communication with a discussion of theoretical issues and the role of the mass media within the context of American society. The book for the first time explores in-depth the life and work of Herta Herzog (1910-2010), an Austrian-American social psychologist. Herzog spent most of her working life in the United States, where she moved to in the 1930s, following her first husband Paul Lazarsfeld into migration and working with him at the famous Office of Radio Research in Princeton and Columbia. The chapters by scholars from the U.S., Israel, Germany and Austria show the amazing scope of Herzog's work as both, one of the founders of empirical communication research and the "grand dame" of market and motivation research. Herzog crossed many borders, moving from Europe to the U.S. and back again, stepping over disciplinary lines as well as restrictions by gender. Effective communication is the key to success in life. We live in an era where words and gestures play an important role in effective communication. Businesses operate in various circumstances and it is paramount that the communication between different parties concerned is clear and effective and also takes into account the cultural sensitivities. This is where the concept of Business Communication comes to play. This book, written in accordance with the syllabus of the University of Delhi, is an attempt to equip the readers with skills required to communicate effectively in a business situation. It would also be useful for the students of BCom, BBA, and MBA of other universities, and for anyone looking to learn the nitty-gritties of business communication. KEY

The International History of Communication Study maps the growth of media and communication studies around the world. Drawing out transnational flows of ideas, institutions, publications, and people, it offers the most comprehensive picture to date of the global history of communication research and education. This volume reaches into national and regional areas that have not received much attention in the scholarship until now, including Asia, Latin America, Africa, and the Middle East alongside Europe and North America. It also covers communication study outside of academic settings: in international organizations like UNESCO, and among commercial and civic groups. It

moves beyond the traditional canon to cover work by forgotten figures, including women scholars in the field and those outside of the United States and Europe, and it situates them all within the broader geopolitical, institutional, and intellectual landscapes that have shaped communication study globally. Intended for scholars and graduate students in communication, media studies, and journalism, this volume pushes the history of communication study in new directions by taking an aggressively international and comparative perspective on the historiography of the field.

Methodologically and conceptually, the volume breaks new ground in bringing comparative, transnational, and global frames to bear, and puts under the spotlight what has heretofore only lingered in the penumbra of the history of communication study.

The Murphy book gives strong emphasis to completeness, conciseness, consideration, concreteness, clearness, courteousness, and correctness in business communication. Pedagogically rich, most chapters in this paperback text include checklists, mini-cases and problems, "Communication Probe" boxes which summarize related research, and sidenotes that isolate significant points that should not be missed. Two new chapters are devoted to ethics and technology respectively.
