

Focus On Nursing Pharmacology 5th Edition Karch

Complex pharmacologic information is simple to learn with this complete study resource! Designed to accompany Lehne's Pharmacology for Nursing Care, 9th Edition, this robust workbook features critical thinking study questions, case studies, and patient teaching scenarios that help you connect pharmacology concepts with their impact on patient care. Plus, an emphasis on priority nursing care with NCLEX examination-style review questions prepares you for success on the exam. NCLEX Examination-style questions are included in each chapter. NEW! NCLEX-style alternate format questions including prioritization questions, bolster your readiness for the NCLEX Exam while supporting review of core pharmacology content NEW! Increased emphasis on patient safety features questions on safe patient care that challenge you to select appropriate actions to prevent or remediate medication errors. NEW! Detailed rationales for all prioritization questions are included in the answer key and encompass explanations for both correct and incorrect responses.

Over 1,000 generic name drugs, encompassing over 4,000 trade name drugs, are organized alphabetically with A-to-Z tabs for quick and easy access. Detailed information for each drug distinguishes side effects and adverse reactions to help you identify which are most likely to occur. Highlighting of high-alert drugs helps promote safe administration of drugs that pose the greatest risk for patient harm; an appendix includes drug names that sound alike or look alike. UNIQUE! Herbal information is included in the appendix and on the Evolve companion website, covering the interactions and effects of commonly encountered herbs. Classifications section features an overview of actions and uses for drug families. Top 100 Drugs list helps you easily identify the most frequently administered drugs. Nursing considerations are organized in a functional nursing process framework and include headings for baseline assessment, intervention/evaluation, and patient/family teaching. Information on lifespan and disorder-related dosage variations equips you with special considerations for pediatric, geriatric, hepatic, and immune- or renal-compromised patients. Extensive IV content features IV compatibilities/IV incompatibilities and breaks down key information with headings on reconstitution, rate of administration, and storage. Fixed combinations are included in dosages of each combined drug directly within the individual monographs, to help you understand different drug dose options for specific diseases. Cross-references to the 400 top U.S. brand-name drugs are located throughout the book for easy access. Customizable and printable monographs for 100 of the most commonly used drugs are located on Evolve, along with quarterly drug updates. Therapeutic and toxic blood level information promotes safe drug administration. Comprehensive IV Compatibility Chart foldout arms you with compatibility information for 65 intravenous drugs. List of newly approved drugs in the front of the book makes it easy to locate the latest drugs. Callouts in a sample drug monograph highlight key features to help you understand how to use the book more efficiently.

Get ready for your neonatal intensive care nursing certification exam with the only review developed in collaboration with three leading nursing organizations! From AACN, AWHONN, and NANN, Certification and Core Review for Neonatal Intensive Care Nursing, 5th Edition prepares you for your examination with hundreds of high-quality study questions and realistic test simulation. Based on the latest test plans of the AACN's CCRN®-Neonatal exam and the NCC's Neonatal Intensive Care Nursing (RNC-NIC) exam, review questions cover the changes to the Core Curriculum and reflect the latest evidence, essential knowledge, and best practices. New to this edition are three new chapters and 225 completely new review questions. This powerful study tool offers unparalleled preparation for your certification exam! Endorsed by the three most authoritative associations in neonatal intensive care nursing: the American Association of Critical-Care Nurses (AACN); the Association of Women's Health, Obstetric, and Neonatal Nurses (AWHONN); and the National Association of Neonatal Nurses (NANN). Realistic exam practice is offered through 675 total questions that mirror the certification exam content, the multiple-choice question format, and the distribution of content. Answers are provided for each question, accompanied by rationales and references, to enhance your understanding of the material. Online flexibility allows you to organize review questions and test format by your preferred examination, either the AACN or NCC. Online exam simulation — included free with each new copy of the book — mirrors the test-taking experience with an interactive, timed format. Customized study lets you choose whether to work through online questions in Study Mode or Examination Mode. Online remediation includes rationales for both correct and incorrect answers, and in-book remediation provides rationales for correct answers. A compact, portable size makes the book easier to study anytime, anywhere. 225 NEW review questions include 75 in the book and 150 additional online questions on the Evolve companion website. Thoroughly UPDATED review content reflects AACN's latest CCRN®-Neonatal exam and the NCC's latest Neonatal Intensive Care Nursing (RNC-NIC) exam, information in Core Curriculum for Neonatal Intensive Care Nursing, 5th Edition, and the newest evidence-based guidelines for neonatal critical care. NEW! Three new chapters include Grieving Process, Quality Improvement, and Facilitation of Learning. NEW focus on culturally sensitive care is included in an expanded Family Integration and Culturally Sensitive Care chapter. UPDATED rationales in the Answer Key are referenced to the most recent literature and evidence-based guidelines. Compatibility with iPads, iPhones, and other mobile devices allows online exam practice that is easy and convenient.

Amy Karch has found that students learn best when concepts are built upon each other, growing from simple to complex, building on a foundation of understanding. Organized by body systems, this heavily illustrated book organizes essential nursing pharmacology information into focused, easy-to-learn steps. Building key concepts upon each other, the text gives students a solid foundation of understanding. Easy to understand drug prototype boxes are integrated as well as integrated content summaries. The fifth edition includes a completely revamped art program with more images depicting drug actions than any of the book's competitors. The fifth edition also underwent major reorganization to streamline the very functional "Focus on" theme for drug use across the lifespan, cultural and gender considerations, evidence-based practice, patient teaching, herbal and alternative therapies and dosage calculations; a new box, "Focus on Safe Medication Administration;" and totally revamped "Drugs in Focus" table for each classification of drugs. Focused content and focused features equal a focused student. In addition, we've expanded and updated content on psychiatric agents (includes new indications, cautions and precautions), and significantly expanded information on AIDS and therapeutic management. Drug discussions include therapeutic actions and indications, pharmacokinetics, contraindications and cautions

and adverse effects. Detailed rationales are presented throughout. Each chapter opens with Learning Objectives and a Glossary of Key Terms, and ends with NCLEX-style questions, and contains a case study-based critical thinking exercise that sets up a situation, shows critical thinking, and then presents a discussion and case-based nursing care guide. Features like this make the book an essential teaching tool. Lippincott's Photo Atlas of Medication Administration comes with this text. Photo Atlas uses the nursing process format to provide step-by-step nursing skills (with rationales). In addition to being completely illustrated, the Photo Atlas also contains documentation guidelines and samples, and Unexpected Situations, which explain how to respond to unanticipated outcomes. Topics include removing medication from an ampule, removing medication from a vial, mixing medications from two vials in one syringe, administering an intradermal injection, and more.
