This volume demonstrates how literacy is more than learning to read and write. Literacy creates communities, organizes personal and social lives, makes possible civil society and the rule of law, and underwrites the commitment of both modern and developing societies to universal education and ever higher levels of literate competence. Everything that is involved in being and becoming literate is the concern of this interdisciplinary group of distinguished scholars.

The text provides a general introduction and overview of legal history and basic legal concepts, with associated, contextualised legal skills.
