This book is a compendium of strategies; it is not a description of a single approach, nor is it intended to be eclectic. The inclusion of a strategy should not be perceived as our endorsement of that strategy. There are some strategies that we view as problematic; there are others about which we disagree.

Lesson planning in line with the new Primary National Curriculum! Why do we teach children to read? It is not merely to decode the words. We teach them to derive meaning from the text, to comprehend it. To not just read the lines, but to read between the lines and even read beyond the lines. So how can you make teaching comprehension in primary schools effective and engaging? How are you ensuring that children are finding meaning in what they read and how do we support more able readers to learn more? What does a good 'reading' lesson look like? This book demonstrates the effective teaching of reading through exemplar lessons. It discusses what makes them good lesson plans and how they can be adapted to suit different classes and different schools. In particular, this book helps you to meet the needs of more able readers particularly in years 5 and 6, outlining ways to challenge more able pupils to support them with the level 6 tests in Year 6. It helps you to cultivate your subject knowledge and invigorate your classroom teaching through focusing on what children need to learn and how to teach it. Did you know that this book is part of the Lessons in Teaching series? WHAT IS THE LESSONS IN TEACHING SERIES? Suitable for any teacher at any stage of their career, the books in this series are packed with great ideas for teaching engaging, outstanding lessons in your primary classroom. The Companion Website accompanying the series includes extra resources including tips, lesson starters, videos and Pinterest boards. A history of the United States in the twentieth century, featuring sociological and cultural events, as well as strictly historical, and using many pertinent literary excerpts.

This book disseminates original research on learning in and from practice in pre-service teacher education. Authors such as Lederman and Lederman describe the student teaching practicum (or work-integrated learning [WIL]), which is an essential component of pre-service teacher education, as the 'elephant in the room'. These authors note that 'the capstone experience in any teacher education programme is the student teaching practicum... [a]fter all, this is where the rubber hits the road'. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher. This is the 'gap' that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters. Chapter 6 focuses on research related to what makes Finnish teacher education so effective, and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school (based on Finnish insights) in Johannesburg. Chapter 3 highlights the challenges faced in open-and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely, where "safe spaces" or laboratories are created for student teachers to learn and grow professionally. These could either be simulations, such as software programmes and avatars in the intervention described in Chapter 2; student excursions, as the findings in chapters 5, 7 and 10 portray; or alternative approaches to WIL (e.g. Chapters 11 and 12). The book is devoted to scholarship in the field of pre-service teacher education. The target audience is scholars working in the fields of pre-service teacher education, work-integrated learning, and self-directed learning. The book makes a unique contribution in terms of firstly its extensive use of Cultural-Historical Activity Theory as a research lens, and secondly in drawing on various theoretical frameworks. Both quantitative and qualitative research informed the findings of the book.

Parents can play an immensely important role in supporting their children's literacy

learning at home, but how can primary teachers enlist the support of parents in helping children learn literacy? With a focus on improving children's literacy skills, this book provides practical answers to key questions that are directly relevant to all primary teachers and to many parents. It presents new ways of linking learning in home and school through a range of activities that can be used to share knowledge between children, parents and teachers. Activities include: teachers and children making videos to show parents how children learn literacy in school parents and children taking photos of the 'everyday' literacy they use outside school parents and teachers exchanging information through Home-School folders and diaries. Particular attention is given to ways of working with parents from a diverse range of family backgrounds reflecting the multi-ethnic nature of many schools today. The practical activities can easily be fitted into the day-to-day activities of busy classrooms and can provide crucial new ways of improving children's learning of literacy skills.

This widely adopted text and teacher resource provides a comprehensive approach to assessing and remediating reading difficulties in grades K-6. Darrell Morris presents rich case studies of beginning and older readers struggling with different types of reading problems. He shows how to administer a thorough diagnostic battery and provide instruction tailored to each student's needs. In addition to one-to-one tutoring strategies, small-group and whole-class applications are discussed. Reproducible tools, book lists, and other user-friendly materials can be photocopied from the book or downloaded and printed in a convenient 8 1/2" x 11" size. New to This Edition *Detailed explanations of how to adapt the techniques for classroom use. *The latest research findings pertaining to reading diagnosis. *Updated and expanded book lists.*Chapter on historical and theoretical foundations. This book offers essential guidance to preservice and inservice teachers seeking to create, revise, or add new strategies to the teaching of the language arts block. The focus is on how to implement effective strategies in the context of a well-planned classroom and a smoothly choreographed daily schedule. In a series of vivid case studies, Lesley Mandel Morrow brings to life the methods used by exemplary teachers to create rich, student-friendly learning environments for children in grades K-4. No component of organizing the language arts block is omitted, including setting up and running classroom learning centers, assessing different instructional needs, conducting whole-class and small group meetings, and linking language arts to content area instruction. Enhancing the practical utility of the book are sample daily schedules and classroom management tips for each grade level, along with dozens of reproducible learning activities, lesson plans, and assessment and record-keeping tools.
