Throughout the world as in the United States, psychologists are increasingly being called upon to evaluate clients whose backgrounds differ from their own. It has long been recognized that standard personality and psychopathology assessment instruments carry cultural biases, and in recent years, efforts to correct these biases have accelerated. The Handbook of Cross-Cultural and Multicultural Personality Assessment brings together researchers and practitioners from 12 countries with diverse ethnic and racial identities and training to present state-of-the-art knowledge about how best to minimize cultural biases in the assessment of personality and psychopathology. They consider research methodology, the design and construction of standard objective and projective tests, the use of measures of acculturation, racial identity, and culture-specific tests, the social etiquette of service delivery, and the interpretation of test data for clinical diagnosis. Ranging widely through all the relevant issues, they share a common collective vision of how culturally competent services should be

delivered to clients. The Handbook offers the first comprehensive view of a consistent approach to cultural competence in assessment--a necessary precursor of effective intervention. It will become an indispensable reference for all those whose practice or research involves individuals with different ethnic and racial identities.

School psychology practice does not exist in a vacuum and is not value-neutral. As the role and function of the school psychologist continues to evolve and expand, social justice provides a needed real-world framework for school psychology students, practitioners, supervisors, and professors to guide their efforts. Culled from years of experience by experts working in a vast array of applied environments and appropriate both for practitioners and for graduate courses in multicultural school psychology and/or the role and function of school psychologists, this book takes the reader through a tour of common school psychology topics and functions through the lens of social justice. Utilizing case examples and concrete suggestions, a critical yet hopeful vision of ways in which school psychologists can work to achieve positive outcomes for students, families, schools, and society is provided.

The Handbook of Social Influences in School Contexts draws from a growing body of research on how and why various aspects of social relationships and contexts contribute to children's social and academic functioning within school settings. Comprised of the latest studies in developmental and educational psychology, this comprehensive volume is perfect for researchers and students of Educational Psychology. Beginning with the theoretical perspectives that guide research on social influences, this book presents foundational research before moving on to chapters on peer influence and teacher influence. Next, the book addresses ways in which the school context can influence school-related outcomes (including peer and teacher-student relationships) with specific attention to research in motivation and cognition. Within the chapters authors not only present current research but also explore best-practices, drawing in examples from the classroom. With chapters from leading experts in the field, The Handbook of Social Influences in School Contexts provides the first complete resource on this topic.

The rapid changes in the composition of school-age youth around the world have catalyzed a growing concern about how to address children's mental health and education. Grounded in this increasingly global perspective, *The International Handbook of Consultation in Educational Settings* is designed to provide a multicultural/transnational approach to consultation theory, research, training, and practice in educational settings. With chapters written by geographically diverse and prominent scholars across the field of school psychology, this handbook captures the range of ways in which consultation services are trained, implemented, and researched internationally. Written for practitioners, researchers, faculty members, and graduate students in the fields of school psychology, school counseling, special education, and educational psychology, this volume is the first of its kind to provide a comprehensive look at consultation in learning environments across the world. *The International Handbook of Consultation in Educational Settings* offers various perspectives on models, implementation, training, and research on school consultation. After an introduction to the volume by the editors, contributors to Part II examine school-

based consultation around the world to explore how consultation services are implemented in different countries. Part III addresses cross-cultural issues in consultation, particularly at a systems level. Part IV presents themes related to processes and issues in the implementation of consultation by focusing on approaches in various countries. The chapters in Part V focus on consultation training, offering insights into the development of students and professionals into effective consultants in cross-cultural and systemic contexts. Part VI describes how practitioners can contribute to the body of research on consultation through careful planning and implementation of their work. Finally, the editors summarize key concepts and findings in a concluding chapter.

The second edition of the Handbook of Multicultural School Psychology continues the mission of its predecessor, offering a comprehensive, interdisciplinary view of the field of multicultural school psychology and addressing the needs of children and families from diverse cultural backgrounds. The revised organizational structure includes the following: History and Professional Issues; Consultation and Collaboration; Interventions Focused on Academic and Mental Health Issues; Data-based Decision Making; Systems-based Issues; Training and Research; and Future Perspectives. have been effectively revised and updated. Comprehensive—In seven sections, this book covers theoretical, research, and practical concerns in a wide range of areas that include multicultural and bilingual issues, second language acquisition, acculturation, parent collaboration, research, and systemic issues. Chapter Structure—Chapter authors follow a uniform structure that includes theoretical and research issues and implications for practice. Recent practice and training guidelines including Blueprint for Training and Practice III (2006), NASP Model for Comprehensive and Integrated School Psychological Services (2010), and APA Multicultural Guidelines (2003) are covered. Interdisciplinary Perspective—Contributing authors are from a wide range of related fields that include school psychology, special education, general education, early childhood education, educational psychology, clinical psychology, counseling, and mental health, thus exposing readers to theory and research from various approaches. Changes—New to this edition is a section focusing on systemic issues such as overrepresentation of culturally and linguistically diverse (CLD) students in special education, prejudice, response to intervention (RTI) for CLD students and English Language Learners (ELL), and end-of-chapter discussion questions. This book is ideal for graduate courses and seminars on multicultural school psychology. It is also a useful reference for researchers and practicing school

this collection brings together leading experts in the field, offering both producers and consumers of school consultation an invaluable snapshot of the current boundaries and rapidly growing content of the discipline. It touches upon not only the scientific progress of the field, but also upon the variety of cutting-edge techniques and approaches currently being developed with an eye toward a changing world. Perfect for school psychologists, and also appropriate for researchers, trainers, and school-based professionals such as special educators and school counselors, this handbook is an absolute necessity for those keeping pace with the innovating, evolving world of school consultation.

Multicultural aspects of psychology have received some attention in the literature in the last decade. A number of texts currently address these significant concerns, for example, *Counseling the Culturally Different* (Sue & Sue, 2008); *Handbook of Multicultural Counseling* (Poterotto et al., 2009); and *Handbook of Multicultural Counseling Competencies* (Pope-Davis & Coleman, 2005). In their most recent editions, several of these books address more nuanced complexities of diversity, for example, the intersections of gender or social class with race-ethnicity. Meanwhile, other texts have addressed gender issues in psychology (*Handbook of Counseling Women, Counseling Men*), with some attention paid to racial-ethnic and other diversity concerns. Clearly the progression of scholarship in this field reflects the importance of incorporating multiple aspects of diversity within psychology. However, no book currently exists that fully addresses the complexities of race-ethnicity and gender together. Better understanding of the dual impact of race-ethnicity and gender on psychological functioning may lead to more effective conceptualizations of a number of mental health issues, such as domestic violence, addictions, health-related behaviors and achievement. Exploring the impact

of race-ethnicity and gender also may provide a broader understanding of self-in-community, as this affects individuals, families and other social groups and work and career development. Topics of interest may include identity development, worldviews and belief systems, parenting styles, interventions for promoting resilience and persistence and strategies for enhancing more accurate diagnostic and treatment modalities. Today's world is comprised of multiple and intersecting communities that remain in need of psychological models and interventions that support and promote both individual and collective mental health. We believe that utilizing unidimensional conceptual models (e.g. focusing solely on race-ethnicity or gender) no longer adequately addresses psychological concerns that are dynamic, complex and multi-faceted. The proposed Handbook will focus on timely topics which historically have been under-addressed for a number of diverse populations.

Multiculturalism is a prevalent worldwide societal phenomenon. Aspects of our modern life, such as migration, economic globalization, multicultural policies, and cross-border travel and communication have made intercultural contacts inevitable. High numbers of multicultural individuals (23-43% of the population by some estimates) can be found in many nations where migration has been strong (e.g., Australia, U.S., Western Europe, Singapore) or where there is a history of colonization (e.g., Hong Kong). Many multicultural individuals are also ethnic and cultural minorities who are descendants of immigrants, majority individuals with extensive multicultural experiences, or people with culturally mixed families; all people for whom identification and/or involvement with multiple cultures is the norm. Despite the prevalence of multicultural identity and experiences, until the publication of this volume, there has not yet been a comprehensive review of scholarly research on the psychological underpinning of

multiculturalism. The Oxford Handbook of Multicultural Identity fills this void. It reviews cutting-edge empirical and theoretical work on the psychology of multicultural identities and experiences. As a whole, the volume addresses some important basic issues, such as measurement of multicultural identity, links between multilingualism and multiculturalism, the social psychology of multiculturalism and globalization, as well as applied issues such as multiculturalism in counseling, education, policy, marketing and organizational science, to mention a few. This handbook will be useful for students, researchers, and teachers in cultural, social, personality, developmental, acculturation, and ethnic psychology. It can also be used as a source book in advanced undergraduate and graduate courses on identity and multiculturalism, and a reference for applied psychologists and researchers in the domains of education, management, and marketing.

Published with the sponsorship of the Trainers of School Psychologists, this two volume handbook examines the essential tenets of the school psychology profession, critically reviews training and practice issues, and evaluates how the traditional and changing skills and issues translate into meeting the needs of children and the systems that serve them. Volume I focuses on the professional issues and topics that form the core of the university curriculum for the school psychology specialist degree. It explores contemporary university training programs, the foundations of school education, and key areas of responsibility for school-based mental health professionals, and takes a look at the future of training for school psychologists. Specific issues such as the teaching of specialty skills and training for unique areas and special populations are also discussed. By way of raising questions and issues that ultimately play out in the field, it lays the groundwork for Volume II, which is dedicated to bridging the training and
