Lavishly illustrated with seventy-four color plates and fifty black-and-white photographs and drawings, *Never for Want of Powder* tells the story of a world-class munitions factory constructed by the Confederacy in 1861, the only large-scale permanent building project undertaken by a government often characterized as lacking modern industrial values. In this comprehensive examination of the powder works, five scholars--a historian, physicist, curator, architectural historian, and biographer--bring their combined expertise to the task of chronicling gunpowder production during the Civil War. In doing so, they make a major contribution to understanding the history of wartime technology and Confederate ingenuity. Early in the war President Jefferson Davis realized the Confederacy's need to supply its own gunpowder. Accordingly Davis selected Col. George Washington Rains to build a gunpowder factory. An engineer and West Point graduate, Rains relied primarily on a written pamphlet rather than on practical experience in building the powder mill, yet he succeeded in designing a model of efficiency and safety. He sited the facilities at Augusta, Georgia, because of the city's central location, canal transportation, access to water power, railroad facilities, and relative security from attack. As much a story of people as of machinery, *Never for Want of Powder* recounts the ingenuity of the individuals involved with the project. A cadre of talented subordinates--including Frederick Wright, C. Shaler Smith, William Pendleton, and Isadore P. Girardey--assisted Rains to a degree not previously appreciated by historians. This volume also documents the coordinated outflow of gunpowder and ammunition, and Rains's difficulty in preparing for the defense of Augusta. Today a lone chimney along the Savannah River stands as the only reminder of the munitions facility that once occupied that site. With its detailed reproductions of architectural and mechanical schematics and its expansive vista on the Confederacy, *Never for Want of Powder* restores the Augusta Powder Works to its rightful place in American lore.

*Southern Homes and Plan Books* showcases the architectural legacy and design philosophy of Leila Ross Wilburn (1885–1967), a legacy that includes hundreds of houses in a variety of popular house styles, from bungalows to ranch houses, built using Wilburn's plan books during the first six decades of the twentieth century. Wilburn opened her own firm in Atlanta in 1908 and practiced until her death in 1967. She published nine plan books that offered mail order house designs to contractors, builders, and prospective homeowners and allowed them the ease of choosing a preconceived design and construction plan. Sarah J. Boykin and Susan M. Hunter provide a survey of the southern homes built from Wilburn's plan books, examining Wilburn's architectural legacy and her achievements as a plan book architect. The book provides beautiful photographs of houses built from her plans, along with illustrations from the plan books themselves and other related documents from the time. Readers can thus see how her designs were realized as
