Eager to change the world? Learn how you can have a greater social impact through your everyday purchases. The money we routinely spend on food, clothes, gifts, and even indulgences is an untapped superpower. What would happen if we slowed down to make more thoughtful decisions about what we buy? For "mom and pop" stores across the country, and artisan and agricultural communities around the world, every purchase matters. Consumers--whether individuals, small businesses, or corporations--are paying more attention than ever to how their goods are made; and retailers--large and small--are responding by investing in ethical and eco-friendly production. Yet figuring out which brands to support can feel overwhelming. Jane Mosbacher Morris has devoted her career to creating economic opportunities for vulnerable communities around the world, and in this valuable book, she shares her passion and insights on how we, as consumers, can create positive change too. Covering topics that range from why not all factories are evil, to how our morning coffee can be the easiest way for us to use our purchasing power for good, *Buy the Change You Want to See* makes us better informed consumers. Morris tells inspiring stories about how victims of human trafficking and natural disasters have been empowered by economic opportunity, and she offers practical ideas about how we can support these communities through our purchases--whether it comes to jewelry made from recycled materials in Haiti, sustainably grown and ethically sourced coffee and chocolate from farmers in some of the poorest regions of the world, or mass-produced jeans and shoes made in factories where workers are guaranteed decent working conditions and a fair wage.

A REVOLUTIONARY NEW APPROACH TO ADDICTION RECOVERY FROM AN ADDICTION EXPERT Rewired is a new, breakthrough approach to fighting addiction and self-damaging behavior by acknowledging our personal power to bring ourselves back from the brink. Centered on the concept of self-actualization, Rewired will guide you towards not only physical sobriety, but a mental, emotional, and spiritual sobriety by learning to identify key principles within yourself, including authenticity, honesty, gratitude, and understanding a need for solitude. Rewired addresses the whole self; just as addiction affects every part of one's life, so too must its treatment. By helping us to build a healthy space to support our own recovery, we can rewrite the negative behaviors that result in addiction. Usable in conjunction with or in place of 12-step programs, Rewired allows for a more holistic approach, helping to create a personalized treatment plan that is right for you. Each section in Rewired includes: - Personal anecdotes from the author's own struggles with alcoholism and addiction - Inspiring true success stories of patients overcoming their addictions - Questions to engage you into finding what is missing from your recovery - Positive affirmations and intentions to guide and motivate With all the variables, both physical and emotional, that play into overcoming addiction, Rewired enables us to stay strong and positive as we progress on the path to recovery. Rewired teaches patience and compassion, the two cornerstones of a new, humanist approach to curing addiction. Remember, addicts are not broken people that need to be fixed—they just have a few crossed wires. For anyone trying to overcome an addiction, living with someone with an addiction, or helping someone with an addiction As most drug and alcohol addicts eventually realize, good intentions alone aren't enough to break destructive habits. However, addiction can be managed once its true nature is understood. This simple yet profound guidebook takes you step-by-step through the process of building a life after addiction by adopting new behaviors that create lasting change. An internationally renowned psychiatrist, neurologist, and addiction specialist, Dr. Walter Ling has worked with thousands of addicts, their loved ones, and fellow clinicians. His no-nonsense, no-judgment approach, which he calls the "neuroscience of common sense," advocates holistic methods to prevent relapse and establish new patterns to create a sustainable, meaningful life.

Competition talent shows have been among the most popular on television in the 21st century. The producers of these shows claim to give ordinary people extraordinary opportunities to change their lives by showcasing a specific skill leading to a new career trajectory. Most participants will claim that they entered to get a big break and to develop a career they have always dreamed of. To what extent do these shows deliver on such promises? Following through what happens to leading contestants in singing, entertainment, modelling, cooking and business entrepreneur competitions, this book shows that few go on to achieve lasting success in their chosen career. Many return to obscurity or to their previous lives. Some enjoy a low level career in the new direction

delivered by the competition they entered. Just a few become truly successful. The pop and entertainment themed contests have discovered just a handful of major pop stars and entertainers out of many hundreds who have taken part after the initial auditions. Turning to the cookery or business franchises, there are few who go on to achieve lasting success in their chosen career. In these it is equally likely that the winners go on to enjoy success with media careers rather than as chefs or entrepreneurs. The most successful franchise of all is the fashion model competition (Next Top Model), which has yielded a high hit rate in terms of career success. What the analysis here also reveals is that it isn't only the winners who ultimately benefit the most from their appearances in these shows. Moreover, television picks its own stars by recruiting contestants because they are telegenic or have a good backstory as much as for their relevant talents. In this way, a talent hungry medium has co-opted these franchises to replenish its own needs.

Wall Street Journal bestseller "A welcome revelation." --The Financial Times Award-winning Wharton Professor and Choiceology podcast host Katy Milkman has devoted her career to the study of behavior change. In this ground-breaking book, Milkman reveals a proven path that can take you from where you are to where you want to be, with a foreword from psychologist Angela Duckworth, the best-selling author of Grit. Change comes most readily when you understand what's standing between you and success and tailor your solution to that roadblock. If you want to work out more but find exercise difficult and boring, downloading a goal-setting app probably won't help. But what if, instead, you transformed your workouts so they became a source of pleasure instead of a chore? Turning an uphill battle into a downhill one is the key to success. Drawing on Milkman's original research and the work of her world-renowned scientific collaborators, How to Change shares strategic methods for identifying and overcoming common barriers to change, such as impulsivity, procrastination, and forgetfulness. In this groundbreaking analysis of personality type, bestselling author of Better Than Before and The Happiness Project Gretchen Rubin reveals the one simple question that will transform what you do at home, at work, and in life. During her multibook investigation into understanding human nature, Gretchen Rubin realized that by asking the seemingly dry question "How do I respond to expectations?" we gain explosive self-knowledge. She discovered that based on their answer, people fit into Four Tendencies: Upholders, Questioners, Obligers, and Rebels. Our Tendency shapes every aspect of our behavior, so using this framework allows us to make better decisions, meet deadlines, suffer less stress, and engage more effectively. More than 600,000 people have taken her online quiz, and managers, doctors, teachers, spouses, and parents already use the framework to help people make significant, lasting change. The Four Tendencies hold practical answers if you've ever thought: • People can rely on me, but I can't rely on myself. • How can I help someone to follow good advice? • People say I ask too many questions. • How do I work with someone who refuses to do

Create a world-changing venture. Silicon Valley's latest trend for creating new ventures is based on trial and error: test market needs with new product concepts and a minimum amount of capital, expect that the product may not meet the market need, so fail fast and try another product with the hope that a product-market fit will eventually emerge. But this fail fast, step-and-pivot philosophy is like taking a random walk in the forest without a compass. *If You Really Want to Change the World* is about helping entrepreneurs find true north. There are more opportunities now than ever before to build breakthrough companies that touch millions of lives. If this is your goal, let this book be your guide to creating world-changing ventures.

Developed as a response to Modernist art and literature, this collection of poetry and art challenges the way we appreciate artistic genre. Instead of creating art inspired by poetry or the poetry inspired by art, this work melds that two into a cohesive work, with neither being the progenitor of the other. It examines the history of blackness and looks at that history through a modern lens, changing how we see our heroes, how we see ourselves and how we see society. It questions how we communicate and how we amuse ourselves. It redraws our innate sense of beauty. It examines gender roles and abuse. Created by a mother and daughter team, this book of poetry provides image to imagery. With Katerina Canyon's poems and Aja Canyon's illustrations, this work is a conversation between them as they examine what it means to operate within the world as black women.
