Adolescence is a time when youth make decisions, both good and bad, that have consequences for the rest of their lives. Some of these decisions put them at risk of lifelong health problems, injury, or death. The Institute of Medicine held three public workshops between 2008 and 2009 to provide a venue for researchers, health care providers, and community leaders to discuss strategies to improve adolescent health.

John Santrock's *A Topical Approach to Life-Span Development* combines the most current research with a proven pedagogical system to provide instructors and students with the best-selling topically arranged introduction to lifespan development. Drawing on a who's who list of expert consultants in all areas of developmental psychology, Santrock once again provides a trusted, comprehensive, readable, and engaging survey of the field. Rich applications and examples from a range of areas such as parenting, health care, and education ensure that students will remain engaged with the material. Significant revisions for the 5th edition include updated discussions of health and well-being as well as expanded coverage of diversity, culture, and gender.

W. W. Norton & Company is proud to present the Sixth Edition of *The Norton Sampler*. As a rhetorically arranged collection of short essays for composition, our Sampler echoes the cloth samplers once done in colonial America, presenting the basic patterns of writing for students to practice just as schoolchildren once practiced their stitches and ABCs on needlework samplers. This new edition shows students that description, narration, and the other patterns of exposition are not just abstract concepts used in composition classrooms but are in fact the

way we think--and write. The Norton Sampler contains 63 carefully chosen readings--classics as well as more recent pieces, essays along with a few real-world texts--all demonstrating how writers use the modes of discourse for many varied purposes.

Recipient of the 2017 Most Promising New Textbook Award from the Textbook & Academic Authors Association (TAA) Chronologically organized, *Lifespan Development: Lives in Context* offers a unique perspective on the field by focusing on the importance of context—examining how the places, sociocultural environments, and ways in which we are raised influence who we become and how we grow and change. Author Tara L. Kuther integrates cutting-edge and classic research throughout the text to present a unified story of developmental science and its applications to everyday life. Robust pedagogy, student-friendly writing, and an inviting design enhance this exciting and inclusive exploration of the ways in which context informs our understanding of the lifespan.

Balanced coverage of the entire life span is just one thing that distinguishes HUMAN DEVELOPMENT: A LIFE-SPAN VIEW, Seventh Edition. With its comprehensive, succinct, and applied coverage, the text has proven its ability to capture students' interest while introducing them to the issues, forces, and outcomes that make us who we are. Robert V. Kail's expertise in childhood and adolescence, combined with John C. Cavanaugh's extensive research in gerontology, result in a book with a rich description of all life-span stages and important topics. A modified chronological approach traces development in sequential order from conception through late life, while also dedicating several chapters to key topical issues. This organization also allows the book to be relatively briefer than other texts, a benefit given the enormous amount of information covered in the course. The authors provide theoretical and empirical foundations that enable students to become educated, critical interpreters of developmental information. A blend of basic and applied research, as well as coverage of controversial topics and emergent trends, demonstrates connections between the laboratory and life.
