Health Communication: Strategies and Skills for a New Era provides a practical process model for developing a health communication intervention. The book also explores exposure to media and how it shapes our conceptions of health and illness. Using a life stages and environments approach, the book touches on the patient role and how we 'hear' information from health care providers as well as guidance on how to be a thoughtful consumer of health information.

Contemporary old age is fraught with contradiction and complexity—women portrayed either as incompetent and cuddly grandmothers or as young women trapped in old

bodies, images that rarely reflect how women actually see themselves. *Women in Late Life* explores the thorny issues related to gender and aging, including prevailing but problematic cultural expectations, body image, ageism, the experience of chronic illness, threats to Social Security and the very possibility of a secure retirement while challenging a long-term care system that disadvantages women. Author Martha Holstein writes from a critical feminist perspective, drawing on her many years of experience in gerontology, as well as interviews and personal experience as a woman now in her seventies. The book highlights how women's experience of late life is shaped by the effects of lifelong gender norms, by contemporary culture—from gender stereotypes to ageism—and by the political context. The book blends critique with proposals aimed at resisting damaging inequities resulting from being simultaneously old and a woman. She focuses on changes needed on multiple levels—societal, cultural, political, and individual. This interdisciplinary look at key questions around gender and aging is nuanced and beautifully written.

Since the time when interactive television emerged as a medium for the home environment, it has been permanently evolving. Changing requirements and user behavior, e.g., the demand for being mobile and have access to information and entertainment anywhere and anytime, are challenging interactive TV. New kinds of interactive services have to be conceived for the increasing mobile, ubiquitous requirements of the different user groups. In these changing environments, a better understanding of emerging contexts and their implications is essential. This gave birth to the idea for the theme of the EuroITV 2008 Conference: "Changing Television Environments." EuroITV 2008, the 6th edition of the European Conference on Interactive Television, was organized and hosted by the HCI and Usability Unit, ICT&S Center, University of Salzburg, Austria. The EuroITV Conference Series

started at Brighton University in 2003 and 2004. It was followed by Aalborg University in 2005, Athens University of Economics and Business in 2006 and by CWI (Centrum Voor Wiskunde en Informatica) in Amsterdam 2007. We would like to thank all former Chairs for making this great conference series happen and for providing us with the opportunity to host EuroITV 2008. A new consumer buying guide aids homeowners in difficult purchasing decisions, providing advice, descriptions, and ratings of more than eight hundred brand-name items, including kitchen appliances, tools, remodeling materials, and home electronics, accompanied by tips on how to get the best value for one's money. Recent years have seen an exponential increase in video and multimedia traffic transported over the Internet and broadband access networks. This timely resource addresses the key challenge facing many service providers today: effective bandwidth management for supporting high-quality video delivery. Written by a recognized expert in the field, this practical book describes ways to optimize video transmission over emerging broadband networks. Moreover, the book explores new wireless access networks that can enable video connectivity both inside and outside the residential premise.

What it is and what it isn't. This not a camera manual for the Leica M, nor is it a book that will teach you photography. Nevertheless, in Bertram Solcher's book you will learn a whole lot about your camera and how to use it, and about the art and craft of photography. This

book contains a collection of illustrated essays that are meant to reveal the secrets of working with a rangefinder camera. To be more precise, with the best camera ever made. The book's ultimate goal is to ignite your passion for the kind of spontaneous, minimalist, and creative photography we admire in the works of Henri Cartier-Bresson, Joel Meyerowitz, and other great Leica photographers. All Leica M model cameras, both analog and digital, use rangefinder technology. Because of its design, working with a Leica M requires a more methodical style of photography where the photographer must slow down and exercise attention and purpose. Using these cameras is both challenging and rewarding. With a Leica M, you can mingle discretely within your environment to capture candid, exciting, insightful images. Bertram Solcher, a professional Leica M photographer for over 35 years, demonstrates how to use this unique camera in a practical and effective way. Solcher's enthusiasm, substantial experience, and technical expertise will help you learn the skills necessary for creating masterful photographs with any Leica M camera.

The Report on Unidentified Flying Objects is a book by Edward J. Ruppelt which described the study of UFOs by United States Air Force from 1947 to 1955. Ruppelt was a United States Air Force officer best known for his involvement in Project Blue Book, a formal governmental study of unidentified flying objects. He is generally credited with coining the term "unidentified flying object." Because Ruppelt was the central axis of the government's investigation the book provides a unique

insider look at how the government's efforts functioned. Have you ever thought what it might be like to think and act like a fighter pilot? This very simple and easy to read book utilizes the experiences of a USAF fighter pilot and applies them to entrepreneurial business.

This media history explores a series of portable small cameras, playback devices, and storage units that have made the production of film and video available to everyone. Covering several storage formats from 8mm films of the 1900s, through the analogue videotapes of the 1970s, to the compression algorithms of the 2000s, this work examines the effects that the shrinkage of complex machines, media formats, and processing operations has had on the dissemination of moving images. Using an archaeological approach to technical standards of media, the author provides a genealogy of portable storage formats for film, analog video, and digitally encoded video. This book is a step forward in decoding the storage media formats, which up to now have been the domain of highly specialised technicians.

Developing expertise in motivational interviewing (MI) takes practice, which is exactly the point of this engaging, user-friendly workbook. The volume is packed with real-world examples from a range of clinical settings, as well as sample interactions and hands-on learning activities. The author is an experienced MI researcher, clinician, and trainer who facilitates learning with quizzes, experiential exercises, and

reproducible worksheets. The reader learns step by step how to practice core MI skills: raising the importance of behavior change, fostering the client's confidence, resolving ambivalence, solidifying commitment to change, and negotiating a change plan. The utility of the book is enhanced by the large-size format and lay-flat binding. The book shows how to navigate each session using microskills that many clinicians already know: open-ended questions, affirmations, reflective listening, and summaries, or OARS for short. This book is in the Applications of Motivational Interviewing series. Video Field Production and EditingCRC Press

Mammals raising their young evolved brains hardwired for emotional relationships. Around this mammalian core, humans evolved a new, larger brain for abstract thinking. Too often our abstract thinking gets in the way of emotionally connecting with other people. Hearts and Minds shows you how to improve your relationships by integrating these different brain systems. Plus, you'll find: The best places to meet single men and women (page 93). How young men and women fall in love with mirrors of themselves (page 74), when mature men and women love their real partners, including accepting their faults (page 83). How switching gender roles moves dating into a committed relationship (page 139). How to use conflicts to strengthen a relationship (page 146).

Television Production & Broadcast Journalism provides students with basic technical skills necessary to enter the television production industry as a production assistant, and introduces broadcast journalism theory. The text provides an overview of the equipment, job responsibilities, and techniques involved in both traditional studio production and remote location work. The activities and processes involved in each phase of production are presented and reinforced with realistic examples, numerous photos showing students in actual production situations, and engaging student activities.

Broadcast journalism coverage includes ethics and news judgment, types of stories, news writing, preparing news packages, and conducting interviews. The broadcast journalism concepts address skills and qualities required in the industry, but also incorporate classroom-appropriate standards and practices. The text places a strong emphasis on the importance of vocabulary and the correct use of technical terms. In addition to the glossary at the end of the textbook, a running glossary within the chapters provides an immediate formal definition of terms, as they are addressed in the text of the chapter. Talk the Talk features explain the difference in meaning between consumer and industry-specific terms, and clarify the proper use of industry terminology. Proper use of industry terms is an important factor in becoming a successful television production professional.

Achieve the Best Camera Design: Up-to-Date Information on MCMs Miniature camera modules (MCMs), such as webcams, have rapidly become ubiquitous in our day-to-day devices, from mobile phones to interactive TV systems. MCMs—or "smart" cameras—can zoom, adjust their frame rate automatically with illumination change, focus at different distances, compensate for hand shake, and transform captured images. With contributions from academics and field engineers, Smart Mini-Cameras discusses the structure, operation principles, applications, and future trends of miniature mobile cameras. It compares this technology with traditional digital still cameras and explains the specific requirements of MCM components (imposed by the size or type of application) in terms of optical design, image sensor, and functionalities. The book describes the implementation of several active functionalities, including liquid crystal auto focus (AF) and optical image stabilization (OIS). It also explores how new technologies, such as the curved detector

and transforming optics, are stimulating novel trends, including a miniature panoramic lens on mobile phones. By providing you with an understanding of the components and performance tradeoffs of MCMs, this book will help you achieve the best camera design. It also answers frequently asked questions, such as the importance of the number of megapixels in a mobile phone camera and the value of AF and OIS features.

An aging population, increasing obesity and more people with mobility impairments are bringing new challenges to the management of routine and emergency people movement in many countries. These population challenges, coupled with the innovative designs being suggested for both the built environment and other commonly used structures (e.g., transportation systems) and the increasingly complex incident scenarios of fire, terrorism, and large-scale community disasters, provide even greater challenges to population management and safety. Pedestrian and Evacuation Dynamics, an edited volume, is based on the Pedestrian and Evacuation Dynamics (PED) 5th International 2010 conference, March 8th-10th 2010, located at the National Institute of Standards and Technology, Gaithersburg, MD, USA. This volume addresses both pedestrian and evacuation dynamics and associated human behavior to provide answers for policy makers, designers, and emergency management to help solve real world problems in this rapidly developing field. Data collection, analysis, and model development of people movement and behavior

during nonemergency and emergency situations will be covered as well.

With massive social media followings and a loyal fan base, Jeanty is poised for great success for his sixth poetry collection entitled *Apologies That Never Came*. In this series of prose and poetry, both the words and sentiment are simple, uninterrupted by excess flair or complexity. *Apologies That Never Came* dissects the agony of heartbreak and loss through the unexpressed words and feelings; what is left over at the end. While his poems and prose delve into pain, they ultimately transcend that heartbreak, awakening everyone's preexisting strength and capacity for growth. Much like in his previous collections, Jeanty has successfully created a tool for unity and healing out of the torment of his experiences.

In these terrific action photos of wildlife on the African savannah in the Serengeti and the Massai Mara, Anup Shah reveals these creatures as never seen before, using remote hidden cameras that have been planted across the plains. This is life on the plains in all its dynamism, cruelty and vitality, the circle of life in action. Readers will find themselves literally face to face with hyenas as they feed on a kill, with elephants communing in a watering hold, playful lion cubs, wildebeests leaping across a ravine, inquisitive monkeys who have discovered the camera and gaze directly into the lens and cheetahs peering back under their tails towards the camera. Many of these animals have actually noticed the camera, mostly by the sound of it clicking away and their interest is clearly piqued; they're certainly not

accustomed to encounters with a camera on the ground of their home turf. This is primarily a visual journey through the African plains, but captions written by the author will impart interesting facts about the animals, as well as any activity of interest that may have occurred while the photo was being taken.
