What role should (non-normative) facts such as people's confined generosity and scarcity of resources play in the normative theorising of political philosophers? The chapters in this book investigate different aspects of this broad question. Political philosophers are often silent on questions of what types of facts are relevant, if any, for normative theory, and what methodological assumptions about agency and behaviour need to be made, if any such assumptions are necessary. However, due to recent debates among and between idealists, non-idealists and realists in political theory, the issue about the relation between facts and norms in political philosophy/theory is beginning to attract greater attention from political theorists/philosophers. The chapters in this book were originally published in the journal *Critical Review of International Social and Political Philosophy*.

Civil Engineering is the component of Encyclopedia of Physical Sciences, Engineering and Technology Resources in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty one Encyclopedias. Civil Engineering is the oldest of the engineering specialties and has contributed very much to develop our society throughout the long history of human life. The advancement of civil engineering has, therefore, been closely related to that of civilization. In this theme, human activities on the earth from ancient times to the present are briefly reviewed first, and then the history of the process to establish the civil engineering discipline is discussed for better understanding of the important role that civil engineering has played in the growth of a mature society, from both technological and social points of view. Broad diversification of civil engineering has resulted from the enormous expansion of society during the latter half of the twentieth century. The various branches are briefly described to show the notable characters that civil engineering has formed to maintain the sustainable development of society. The Theme on Civil Engineering with contributions from distinguished experts in the field provides the essential aspects and fundamentals of civil engineering. The two volumes are aimed at the following five major target audiences: University and College Students Educators, Professional Practitioners, Research Personnel and Policy Analysts, Managers, and Decision Makers, NGOs and GOs.

This book - one in the four-volume set, Global Governance and the Quest for Justice - focuses on the international and regional organisations that represent the key players in the evolving global order. The papers in this collection seek to map the real world of global governance - exploring who governs and how, what the leading international and regional organisations claim to do and what they actually do - as well as assessing the gap between the ideal of constitutionalised global governance and the actuality of governance under globalisation. The contributors discuss what it would mean for global governance to aspire to Rule of Law standards of transparency, accountability and participation together with categorical respect for human rights. In this collection, the perspective of modern public lawyers is systematically applied to the governance deficit associated with globalisation and to its institutional correction in pursuit of a legitimate regime of global governance.

Kautilya, also known as Chanakya, is India's most illustrious political economist of all time. He regarded economic activity as the driving force behind the functioning of any political dispensation. In fact, he went to the extent of saying that revenue should take priority over the army because sustaining the army was possible out of a well-managed revenue system. Kautilya advocated limiting the taxation power of the State, having low rates of taxation, maintaining a gradual increase in taxation and most importantly devising a tax structure that ensured compliance. He strongly encouraged foreign trade, basing it on the premise that for a successful trade contract to be established, it had to be beneficial to all. He

emphasised State control and investment in land, water and mining. Kautilya was a true statesman who bridged the gap between experience and vision. For Kautilya, good governance was paramount. He suggested built-in checks and balances in systems and procedures for the containment of malpractices. Many postulates of Kautilya s philosophy of political economy are applicable to contemporary times.
