Labor in the Time of Trump critically analyzes the right-wing attack on workers and unions and offers strategies to build a working-class movement. While President Trump's election in 2016 may have been a wakeup call for labor and the Left, the underlying processes behind this shift to the right have been building for at least forty years. The contributors show that only by analyzing the vulnerabilities in the right-wing strategy can the labor movement develop an effective response. Essays in the volume examine the conservative upsurge, explore key challenges the labor movement faces today, and draw lessons from recent activist successes. Donald Cohen, founder and executive director of In the Public Interest; Bill Fletcher, Jr., author of Solidarity Divided; Shannon Gleeson, Cornell University School of Industrial and Labor Relations; Sarah Jaffe, co-host of Dissent

The popularization of radio, television, and the Internet radically transformed musical practice in the Asia Pacific. These technologies bequeathed media broadcasters with a profound authority over the ways we engage with musical culture. Broadcasters use this power to promote distinct cultural traditions, popularize new music, and engage diverse audiences. They also deploy mediated musics as a vehicle for disseminating ideologies, educating the masses, shaping national borders, and promoting political alliances. With original contributions by leading scholars in anthropology, ethnomusicology, sound studies, and media and cultural studies, the 12 essays this book investigate the processes of broadcasting musical culture in the Asia Pacific. We shift our gaze to the mechanisms of cultural industries in eastern Asia and the Pacific islands to understand how oft-invisible producers, musicians, and technologies

Explores the fluctuating relationship between human rights and humanitarianism and the changing nature of the politics and practices of humanity.

When did America become obsessed with racial differences? After decades of progress healing real-world prejudices and anger, we suddenly live in an America where we're expected to view every single thing through the lens of race. Children are taught the politics of racial resentment and fear in schools. Films, novels, and even comic books are judged by the color of their protagonists—and their adherence to the latest “woke” messaging. Corporate America has universally adopted the slogan “Black Lives Matter” in every piece of marketing, those words serving as a talisman to protect them from Twitter mobs and outraged activists. And the 1619 Project and similar pieces of academic propaganda seek to redefine and undermine the very notion of America as a unified and great nation.

Meanwhile, organized BLM advances a radical and dangerous political agenda which, if enacted, would mean the end of the American experiment as we know it. The nation faces a pivotal moment: will we reject the Race Crazyes, or let them destroy us?

Once a ceremonial position modelled after the constitutional monarchy in the United Kingdom, the office of the President of Singapore was transformed from an appointed to an elected one in 1991. As the head of state, but not the head of government, the elected President was to have additional discretionary powers involving the spending of

financial reserves, appointment of high-ranking public servants, and certain ministerial powers to detain without trial. In 2016, a constitutional commission was convened to consider further reforms to the office and the elections process. This book explores Singapore's presidency, assessing how well it has functioned, discussing the rationales for an elected presidency, and evaluating the constitutional commission's recommendations for reforms, including the need for minority representation in the office. In doing so, the book provides important reflections on how the constitutional reform process raises crucial questions about the rule of law and the practice of constitutionalism in Singapore.

This book examines the evolution and major elements of China's Belt-and-Road Initiative (BRI), a trillion-dollar project for the revival and refinement of ancient terrestrial and maritime trade routes. The author analyses the foreign policy and economic strategy behind the initiative as well as the geoeconomic and geopolitical impact on the region. Furthermore, he assesses whether the BRI has to be considered as a challenge to the US-led order, leading to a Sinocentric order in the 21st century. Offering two case studies on the China-Pakistan Economic Corridor (CPEC) and the 21st Century Maritime Silk Road (MSR), the book reveals the drivers motivating China and its partners in executing BRI projects, such as security of commodity-shipments, energy supplies, and explores trade volumes as well as the anxiety these trigger among critics. The book juxtaposes these to

non-Chinese, specifically multilateral institutional and Western corporate, inputs into Beijing's developmental planning-processes. It also identifies the role of combined Chinese-foreign stimuli in generating the policy priorities precipitating the BRI vision, and the geoeconomic essence of BRI's implementation.

Providing an original perspective on the construction of nations and national identities, this book examines national symbols and ceremonies, arguing that, far from being just superficial or decorative, they are in fact an integral part of nation building, maintenance and change.

This book 's radical theory of police argues that the police demand for order is a class order and a racialized and patriarchal order, by arguing that the police project, in order to fabricate and defend capitalist order, must patrol an imaginary line between society and nature, it must transform nature into inert matter made available for accumulation.

Police don 't just patrol the ghetto or the Indian reservation, the thin blue line doesn 't just refer to a social order, rather police announce a general claim to domination--of labor and of nature. Police and police violence are modes of environment-making.

This edited volume argues that any effort to understand racialized police violence is incomplete without a focus on the role of police in constituting and reinforcing patterns of environmental racism.

What is pragmatism? Is it a means to an end, or an end in itself? Is it antithetical to ideology or morality? Arguing that pragmatism is a skill much more than an attribute, Phua examines how viewing it in this way can help achieve better foreign policy outcomes. He examines and contrasts the ways in which the United States, China and Singapore have incorporated pragmatism into their approaches to foreign policy. In doing so he debunks dualistic myths around

Museums, Emotion, and Memory Culture examines the politics of emotion in history museums, combining approaches and concerns from museum, heritage and memory studies, anthropology and studies of emotion. Exploring the meanings and politics of memory contests in Turkey, a site for complex negotiations of identity, the book asks what it means for museums to charge the past with political agendas through spectacular, emotive representations. Providing an in-depth examination of emotional practice in two Turkish museums that present contrasting representations of the national past, the book analyses relationships between memory, governmentality, identity, and emotion. The museums discussed celebrate Ottoman and Early Republican pasts, linking to geo- and party politics, people's senses of who they are, popular memory culture, and competing national stories and identities vis-à-vis Europe and the wider world. Both museums use dramatic, emotive panoramas as key displays and the research at the heart of this book explores this seemingly anachronistic choice, and how it links with memory cultures to prompt visitors to engage imaginatively, socially, politically and morally with a particular version of the past. Although the book focuses on museums in Turkey, it uses this as a platform to address broader questions about memory culture, emotion, and identity. As such, Museums and Memory Culture should be of great interest to academics and students around the world who are engaged in the study of museums, heritage, culture, history, politics, anthropology, sociology, and the psychology of emotion.

"The Oxford English Dictionary of holidays." NPR's Planet Money. The election of Barack Obama in 2008 was startling, as was the victory of Donald Trump eight years later. Because both presidents were unusual and gained office backed by Congresses controlled by their own parties, their elections kick-started massive counter-movements. The Tea Party starting in 2009 and the "resistance" after November 2016 transformed America's political landscape. Upending American Politics offers a fresh perspective on recent upheavals, tracking the emergence and spread of local voluntary citizens' groups, the ongoing activities of elite advocacy organizations and consortia of wealthy donors, and the impact of popular and elite efforts on the two major political parties and candidate-led political campaigns. Going well beyond national surveys, Theda Skocpol, Caroline Tervo, and their contributors use organizational documents, interviews, and local visits to probe changing organizational configurations at the national level and in swing states. This volume analyzes conservative politics in the first section and

progressive responses in the second to provide a clear overview of US politics as a whole. By highlighting evidence from the state level, it also reveals the important interplay of local and national trends.

In this era of climate crisis, in which our very futures are at stake, sustainability is a global imperative. Yet we tend to associate sustainability, nature, and the environment with distant places, science, and policy. The truth is that everything is environmental, from transportation to taxes, work to love, cities to cuisine. This book is the first to examine contemporary Singapore from an ecocultural lens, looking at the ways that Singaporean life and culture is deeply entangled with the nonhuman lives that flourish all around us. The authors represent a new generation of cultural critics and environmental thinkers, who will inherit the future we are creating today. From chilli crab to Tiger Beer, Changi Airport to Pulau Semakau, O-levels to orang minyak films, these essays offer fresh perspectives on familiar subjects, prompting us to recognise the incredible urgency of climate change and the need to transform our ways of thinking, acting, learning, living, and governing so as to maintain a stable planet and a decent future.

This book sheds light on the mechanisms of base politics that surround US overseas military bases, comparing several countries across different regions. Analysing cases from Japan, Greenland, Germany, Italy, Turkey, Saudi Arabia, South Korea, and Singapore, the contributors paint a detailed and complex picture of the role and impact of US bases. In times of war they project military power, and in times of peace they deter the emergence of general and latent threats.

Furthermore, they are used to secure access to resources, and as a means of politically and economically influencing small and mid-size countries. From the viewpoint of the countries that host them, military bases allow the host many benefits of the US security umbrella, but can cause internal problems, including accidents and noise pollution that accompany the functioning of a base, as well as constraining their own sovereignty. Military bases do not simply serve to bring America strategic and security benefits - as symbols of the hierarchical structure of the international system, they influence power relations in the entire world. An invaluable resource for scholars of International Relations with an interest in the practical and theoretical challenges of the US's relationship with its allies.

The global film industry has witnessed significant transformations in the past few years. Regions outside the USA have begun to prosper while non-traditional production companies such as Netflix have assumed a larger market share and online movies adapted from literature have continued to gain in popularity. How have these trends shaped the global film industry? This book answers this question by analyzing an increasingly globalized business through a global lens. Development of the Global Film Industry examines the recent history and current state of the business in all parts of the world. While many existing studies focus on the internal workings of the industry, such as production, distribution and screening, this study takes a "big picture" view, encompassing the transnational integration of the cultural and entertainment industry as a whole, and pays more attention to the coordinated development of the film industry in the light of influence from literature, television, animation, games and other sectors. 'From the vantage point of years in active politics, Tony Leon provides a lucid analytical balance sheet of SA Ltd 2021. Eschewing political correctness, Leon tells it as he sees it.' – Judge Dennis Davis 'Anyone who wants to understand South Africa today – a country so beautiful, yet so broken – simply has to read this book.' - Niall Ferguson, author of *The Ascent of Money* In his riveting new book, *Future Tense*, Tony Leon captures and analyses recent South African history, with a focus on the squandered and corrupted years of the past decade. With unique access and penetrating insight, Leon presents a portrait of today's South Africa and prospects for its future, based on his political involvement over thirty years with the key power players: Cyril Ramaphosa, Jacob Zuma, Thabo Mbeki, Nelson Mandela and FW de Klerk. His close-up and personal view of these presidents and their history-making, and many encounters in the wider world, adds vivid colour of a country and planet in upheaval. Written during the first coronavirus lockdown, *Future Tense* examines the surge of the disease and the response, both of which have crashed the economy and its future prospects. As the founding leader of the Democratic Alliance, Leon also provides an insider view for the first time of the power struggles within that party, which saw the exit of its first black leader in 2019. There is every reason to fear for the future of South Africa but, as Leon argues, 'the hope for a better country remains an improbable, but not an
