Language issues are intrinsically part of every classroom setting. Therefore, there is a need to present the linguistic perspective to all teachers and teachers-in-training. This perspective assumes that people internally organize language at different levels, each with its own set of organizing principles, and proposes that this complex system is learned by children at an early age and with little conscious instruction. It recognizes that languages change over time and that variation, based on region, ethnic identity, gender, social class, and social context, is inherent to language. Focusing more on the practical than the theoretical, Barry aims to engage teachers and education students in discussion of the relevance of linguistics to teaching and to encourage them to bring their own expertise to the discussion.
