The growing concern over the number of accidental firearm shootings, especially those involving children, prompted passage of the initial handgun safety law which went into effect in 1994. The stated intent of the California Legislature in enacting the current FSC law is for persons who obtain firearms to have a basic familiarity with those firearms, including, but not limited to, the safe handling and storage of those firearms. The statutory authority for this program is contained in Penal Code sections 26840 and 31610 through 31700. These statutes mandate DOJ to develop, implement and maintain the FSC Program. Pursuant to Penal Code section 26840, a firearms dealer cannot deliver a firearm unless the person receiving the firearm presents a valid FSC, which is obtained by passing a written test on firearm safety. Prior to taking delivery of a firearm from a licensed firearms dealer, the purchaser/recipient must also successfully perform a safe handling demonstration with that firearm..

This is a memoir of a woman's survival of an abusive relationship and its aftermath. It became a rollercoaster ride of events, emotions and legal battles that started when she stepped foot over the threshold of his front door that Saturday morning. His once caring concerned eyes were now dark, empty and full of hate. Her quiet life turned into a spellbound thriller. She learned that you have a warrior inside you ready to fight and help you get your life back. Finding that inner warrior and facing life on life's terms started her journey from heels to holster.

Nowhere is the gun control debate more heated than in the United States. Gun control advocates argue for tighter restrictions on purchasing and licensing in the hopes of reducing incidents of shootings. Gun owners fear that their guns will be taken away, eliminating their ability to protect their families. Carrying a concealed handgun is legal in every state, and polls shows that the majority of Americans support conceal and carry. The viewpoints in this volume attempt to answer tough questions, such as "Do concealed handguns deter or increase crime?" and "Do the protections stipulated in the Second Amendment cover today's gun owners?"

Unsung Heroism: A Long, Hard Look at A First-year Writing Class "First-year writing is the make-or-break course," author Alan Feldman says. "Some students triumph, but forty per cent of state college students don't return for a second year. Why is that?" His new book tells the story of students in one classroom during their first semester—their struggle, under the guidance of their professor, Elaine Beilin. "I wanted to look hard and long," Feldman writes, at daily life in Elaine's classroom, "like a person trying to see a leaf unfolding." He hoped to see the way "a better, more just world is being made." But what Feldman found shocked him, despite his twenty-five years of teaching. "Many kids worked thirty hours or more to pay for college. Their lives were so disaster prone." In Feldman's view, Beilin is a model for what the modern college professor has to be. "It was a case of 'attention must be paid.' Millions are waging this struggle. Thousands of professors like Elaine are helping. I guess this is my poem to this brave and difficult kind of teaching."

"I want you to know that in my many

years of being a student, you easily rank as the best teacher I have ever had. Your skill and patience has made me infinitely more comfortable with my weapons and myself. The next class you teach, I'll be there in a heartbeat. I'm sure you don't have to be reminded of the multitude of people you have touched and the positive impact you have had on firearms training overall." Bob Patridge "Len has taught me to effectively and safely use a handgun and rifle and for that I will always be grateful. I look forward to the time I spend once or twice a week under his instruction. Len has created a wide range of firearms training programs out of virtually nothing and trained a sizeable and competent cadre of firearms instructors who, like me, greatly respects the man. He is engaged with his students and always approachable. Students who have shot much longer than me comment on his great depth of knowledge and ability to improve their shooting. He clearly loves to teach the material and his enthusiasm is contagious. He has a great sense of humor and makes his classes a lot of fun. But in spite of all of this the safety of his students is always his first concern." Dr. Noel Pillman, MD "I am a retired police officer and a former police firearms instructor for over 20 years. I have been to numerous firearms training classes over the years but have not had any instructors more professional, knowledgeable, and dedicated to what they do than Len Breure." Maurice Merabella "Len was my first real 'tactical' instructor a few years ago. He is a thorough, safe, and well versed instructor. His teaching style is unique in a way that clearly conveys lessons and makes them easy to understand for experienced shooters and novices alike. Len brings a wealth of prior "been there, done that" experience to the table that's an asset to his teaching, and is rarely found in many of the new instructors that have come to the arena since most states have enacted concealed carry laws. I continue to train with a variety of tactical instructors, and am always amazed by how much of the information Len taught me is still the foundation upon which I build." Mike VanMeeteren "I have been fortunate enough to receive numerous training courses that were being taught by Len Breure. In my opinion, Len is one of the best in the business! It is very rewarding to be able to learn from someone who has the experience and knowledge to take tactical training to the next level." Jim Bryant I first meet Len while taking my Minnesota Concealed Carry Course in 2005. Since that time I have taken every course that Len teaches. In my opinion Len is the consummate professional, who teaches with passion and an incredible degree of knowledge. I would strongly urge anyone interested in personal protection to take Len's courses. Well-managed ranch lands or rangeland in Texas capture the rain that permeates our soils, sustains creeks and rivers, and replenishes aquifers, which, in turn, water our cities. The stewardship of the region is the focus of this book—the largest contributing watershed in the Colorado River Basin—viewed through the lens of its plant communities. This field guide and management reference to four million acres of rangeland in the Concho River watershed of west central Texas offers general descriptions of more than 200 plant species, including information about the plant's growing period, growth form, livestock and wildlife value, and special management issues. Accompanying photographs give the reader an idea of not only

what the plant looks like on the range but also which identifiable features, such as flowers, fruit, or leaf shape, are most important to that particular plant. In addition, several experts cover the use of fire and the management of deer, turkey, dove, and other wildlife in this region. A discussion of noxious, invasive, and toxic plants; historical accounts of the region; four useful appendixes; a glossary; and a plant list complete the impressive content of this comprehensive volume.

"Decoding Firearms" is an introductory look into gun safety and firearm use. Are you curious about firearms? Is learning about or using a firearm something you have been interested in? Does the thought about gun use intrigue you, but you are intimidated? Are you a member of the media and wish to better understand how to reference firearms when reporting on them in news pieces? Are you a new gun owner? Are you an experienced shooter looking to brush up on gun safety and use? Are you looking to find a guide to help you introduce a new shooter to the shooting sports? Are you an instructor looking for new material, with a fresh perspective, to present to your students? If so, "Decoding Firearms" may be for you! Topics covered in this work include: Gun safety rules, how firearms work, how to operate some common firearm types, the steps you take when using a firearm, and much much more! This work focuses on conventional modern firearms that utilize commercially available smokeless powder ammunition. "Decoding Firearms" has information on the use of pistols, revolvers, rifles, and shotguns. This is a good first look into the firearms community and world of gun use, presented in a conversational and didactic manner. While this is an introductory book, "Decoding Firearms" takes a deeper look into some subjects that often get overlooked, in detail such as: Proper hearing and eye protection, guarding yourself from lead and chemical exposure, how to look up if a public range has any OSHA related citations, in addition to material that is commonly covered in other works. "Decoding Firearms" was written to bring the necessary information, in an easy to follow order, from start to finish. Chapters 1-8 focuses on getting you through your first shots and reviewing that process, chapters 9-14 further expand on some subjects in chapter 1, and Chapter 15 discusses The Second Amendment.

"You will either master the pistol or the pistol will master you." To fire perfect shots, you must train for perfect shots. But whether you want to shoot squirrels, punch holes in paper targets, or defend your home, there is only one path to achieving consistent accuracy with a handgun: mastering the fundamentals of marksmanship. Written by a former U.S. Marine Corps firearms instructor who has taught more than a thousand law enforcement, military, and security personnel, *The Perfect Pistol Shot* uses succinct lessons, uncommon exercises, and real-world stories to provide a fresh look at a vital topic for all gunmen. It includes: The single most important "trick" to perfecting handgun marksmanship A simple concept for learning how to shoot a gun twice as fast A series of unique "Prove It" exercises that allow you to test the concepts offered without the pressure of actual shooting An entertaining chapter on guns, gun magazines, and gun gurus that will help you make wiser choices about your training Knowing how to engage targets is valuable for the defensive shooter, but if "engaging" doesn't translate into "hitting," what's the point? You must have a solid foundation on which to build tactical skills. Your reward will be conversion from just another hapless shooter into an independent marksman.

This manual has been written with the Law Enforcement Firearms Instructor in mind. It is an attempt to save the instructor time by furnishing already prepared outlines that cover most of the subject currently taught by and to law enforcement personnel. The purpose of the manual is twofold: First, it can be used by current firearms instructors as a handy reference guide and also as a way of keeping all of the firearms outlines in one simple format. By preparing the manual in this fashion, all of an instructor's outlines are easily accessible should an instructor's class be challenged by the legal system. Secondly, this manual can be used as the text for firearms instructor initial certification classes. Once the new instructor completes the basic

certification course, he or she will have a complete set of outlines that can be used for teaching their classes. The first four outlines in this manual (The Role of the Firearms Instructor, Safety Responsibilities, Record Keeping, and Discipline) are generally used during instructor development classes. The rest of the outlines, while also used in instructor development classes, are also appropriate for basic recruit classes as well as classes that are designed for in-service personnel. The Appendix contains material that can be used as class handouts or made into overheads for class presentations. Some of the courses can be used for general firearms qualification, while others are used for training a specific skill, such as linear and lateral movement or multiple attackers. The manual has been written to take the pain out of the "office work" part of being a firearms instructor and to give the instructor more time to teach. With this book, retired Green Beret Kyle "Panda" Barrington will guide you on your path to responsible citizenship. You will learn the philosophy behind pistol shooting, shooting principals, and the proven techniques that support them. Be a responsible citizen and seek responsible training, and this is a very good start! Take responsibility for your actions. Responsible citizens should seek responsible training. Your gun and good intentions mean absolutely nothing without proper training. You are responsible for every round you shoot. A young black man's funny and searing quest to learn to shoot, and a fascinating odyssey into race, guns, and self-protection in America. The most RJ Young knew about guns was that they could get him killed. Until, recently married to a white woman and in desperate need of a way to relate to his gun-loving father-in-law, Young does the unimaginable: he accepts Charles's gift of a Glock. Despite, or because of, the racial rage and fear he experiences among white gun owners ("Ain't you supposed to be shooting a basketball?"), Young determines to get good, really good, with a gun. *Let It Bang* is the compelling story of the author's unexpected obsession—he eventually becomes an NRA-certified pistol instructor—and of his deep dive into the heart of America's gun culture: what he sees as the domino effect of white fear, white violence, black fear, rinse, repeat. Young's original reporting on shadow industries like US Law Shield, which insures and defends people who report having shot someone in self-defense, and on the newly formed National African American Gun Association, gives powerful insight into the dynamic. Through indelible profiles, Young brings us up to the current rocketing rise in gun ownership among black Americans, most notably women. *Let It Bang* is an original look at American gun culture from the inside and the other side—and, most movingly, the story of a young black man's hard-won nonviolent path to self-protection. "We need more books like this: personal, emotional meditations on gun ownership...showing us all the ways in which guns take on meaning for people, and what happens when those meanings collide."—Pacific Standard
