Finalist for the 2015 Giller Prize Among The National Post's Top 5 Books of 2015 Among The Toronto Star's Top 5 Fiction Books of 2015 Among Largehearted Boy's Favourite Novels of 2015 One of Quill & Quire's Books of the Year, 2015 Among The Edmonton Journal's Top 5 Books of 2015 A 49th Shelf Book of the Year, 2015 Among NOW Toronto's Top 10 Books of 2015

Martin John's mam says that she is glad he is done with it. But is Martin John done with it? He says he wants it to stop, his mother wants it to stop, we all want it to stop. But is it really what Martin John wants? He had it in his mind to do it and he did it. Harm was done when he did it. Harm would continue to be done. Who will stop Martin John? Will you stop him? Should she stop him? From Anakana Schofield, the brilliant author of the bestselling *Malarky*, comes a darkly comic novel circuiting through the mind, motivations and preoccupations of a character many women have experienced but few have understood quite so well. The result confirms Schofield as one of the bravest and most innovative authors at work in English today. Anakana Schofield is an Irish-born writer, who won the Amazon.ca First Novel Award and the Debut-Litzer Prize for Fiction in 2013 for her debut novel *Malarky*.

A group of essays dedicated to the noted Anglo-Irish scholar, Derry Jeffares, by distinguished colleagues, pupils and friends.

Science tells us that a new and dangerous stage in planetary evolution has begun—the Anthropocene, a time of rising temperatures, extreme weather, rising oceans, and mass

species extinctions. Humanity faces not just more pollution or warmer weather, but a crisis of the Earth System. If business as usual continues, this century will be marked by rapid deterioration of our physical, social, and economic environment. Large parts of Earth will become uninhabitable, and civilization itself will be threatened. Facing the Anthropocene shows what has caused this planetary emergency, and what we must do to meet the challenge. Bridging the gap between Earth System science and ecological Marxism, Ian Angus examines not only the latest scientific findings about the physical causes and consequences of the Anthropocene transition, but also the social and economic trends that underlie the crisis. Cogent and compellingly written, Facing the Anthropocene offers a unique synthesis of natural and social science that illustrates how capitalism's inexorable drive for growth, powered by the rapid burning of fossil fuels that took millions of years to form, has driven our world to the brink of disaster. Survival in the Anthropocene, Angus argues, requires radical social change, replacing fossil capitalism with a new, ecosocialist civilization.

'Another riveting book from Anna Jacobs' - 5-star reader review Seventeen-year-old Liza is happy working as a lady's maid - until her employers decide to emigrate and her father makes up his mind that she is to wed an older widower whom she detests. Determined to avoid a loveless marriage, Liza plans to run away. But when the widower rapes her to force her to marry him, she flees back to the family for whom she worked. She feels she has no choice but to go with them to Australia, and they all set out on the long voyage. On board ship, Liza discovers to her horror that she has fallen pregnant. Even if she can survive the journey, the demanding life of a settler in 1850s Western Australia will be made even harder by an illegitimate child. But Liza is to find that in addition to deprivation of the worst sort, Australia will

offer her opportunities she could never have dreamt of back home in Lancashire.

***** What readers are saying about LANCASHIRE LASS 'As ever, great!' - 5 stars
'A lovely book' - 5 stars 'Great from start to finish' - 5 stars 'Brilliant again!' - 5 stars 'I just love these books - once you start you will find it hard to put down' - 5 stars

In *The Universe Within*, Neil Shubin, one of the world's leading experts, reveals to us the extraordinary cosmic and evolutionary adventure of our own bodies. During the past 13.7 billion years (or so) since the Big Bang, our universe has evolved, stars have formed and died and our planet congealed from the matter in space. For aeons, the earth has circled the sun while mountains, seas and entire continents have come and gone. Against this epic backdrop, humanity's place in the cosmos can look tiny and insignificant. But as Neil Shubin shows in this revelatory new book, the one place where universe, solar system and planet merge is inside your body. Shubin shows how the origin of the Moon is tied to our internal body clocks; how the vast amounts of water on Earth and inside all living creatures crossed the deepest stretches of space to us; how strange fluctuations in the orbits within our solar system have led to our irregular ice-ages; and how tiny imbalances in the chaos immediately after the Big Bang can explain why matter exists at all. Delving below the earth's surface and into the frozen Arctic, exploring the smallest atomic structures and the vast reaches of space, Neil Shubin uncovers a sublimely beautiful, almost magical truth: that in every one of us lies the most profound story of all - how we and our world came to be. 'Shubin is not only a

distinguished scientist, but a wonderfully lucid and elegant writer; he is an irrepressibly enthusiastic teacher ... a science writer of the first rank', Oliver Sacks Neil Shubin is a palaeontologist in the great tradition of his mentors, Ernst Mayr and Stephen Jay Gould. He has discovered fossils around the world that have changed the way we think about many of the key transitions in evolution and has pioneered a new synthesis of expeditionary palaeontology, developmental genetics and genomics. He trained at Columbia, Harvard and Berkeley and is currently a Professor in the Department of Organismal Biology and Anatomy at the University of Chicago. His previous book is *Your Inner Fish: The amazing discovery of our 375-million-year-old ancestor.*

Employees are left exposed, and shareholders act to protect themselves, Never has the awareness that we all live in the same world been so strong-and never have the social conditions of existence been so unequal."

"Noam Chomsky's *Year 501* is a powerful and comprehensive discussion of the incredible injustices hidden in our history and there is little in that history that escapes Chomsky's attention.

Prepare to meet the most fearsome criminals in the universe. Learn about the evil plots of Marvel supervillains including Thanos, Green Goblin and Ultron. Read about their incredible powers and their deadly battles with your favourite Super Heroes! Engaging topics and fun, interactive pages build reading skills in this Level 2 Reader - just right for children who are beginning to read on their own. A glossary and fun quiz at the end

of the book help to develop vocabulary and reading comprehension skills. Each title in the DK Readers series is developed in consultation with leading literacy experts to help children build a lifelong love of reading. © 2018 MARVEL

Explore 50 of the greatest, most thrilling road cycling routes the world has to offer, guided by the experts at the world's biggest road cycling magazine. Route maps, first-hand ride reports and truly breathtaking photography from the finest cycling photographers come together in this celebration of the world on two wheels. Covering the very best of Europe, from the twisting trails of northern Norway to the winding coast of southern Spain, this beautiful book also includes rides from as far afield as Vietnam, Ethiopia and Lebanon, as well as the USA.

Science progrès la nature

Covers authors who are currently active or who died after December 31, 1959. Profiles novelists, poets, playwrights and other creative and nonfiction writers by providing criticism taken from books, magazines, literary reviews, newspapers and scholarly journals.

How America can rebuild its industrial landscape to sustain an innovative economy. America is the world leader in innovation, but many of the innovative ideas that are hatched in American start-ups, labs, and companies end up going abroad to reach commercial scale. Apple, the superstar of innovation, locates its

production in China (yet still reaps most of its profits in the United States). When innovation does not find the capital, skills, and expertise it needs to come to market in the United States, what does it mean for economic growth and job creation? Inspired by the MIT Made in America project of the 1980s, Making in America brings experts from across MIT to focus on a critical problem for the country. MIT scientists, engineers, social scientists, and management experts visited more than 250 firms in the United States, Germany, and China. In companies across America—from big defense contractors to small machine shops and new technology start-ups—these experts tried to learn how we can rebuild the industrial landscape to sustain an innovative economy. At each stop, they asked this basic question: “When you have a new idea, how do you get it into the market?” They found gaping holes and missing pieces in the industrial ecosystem. Even in an Internet-connected world, proximity to innovation and users matters for industry. Making in America describes ways to strengthen this connection, including public-private collaborations, new government-initiated manufacturing innovation institutes, and industry/community college projects. If we can learn from these ongoing experiments in linking innovation to production, American manufacturing could have a renaissance.

(Drum Recorded Versions). This matching drum folio to the legendary album

includes 17 transcriptions: Are You Experienced? * Fire * Foxey Lady * Hey Joe * Highway Chile * Love or Confusion * Manic Depression * May This Be Love * Purple Haze * Red House * Remember * Stone Free * Third Stone from the Sun * The Wind Cries Mary * more.

Many of the environmental and social problems we face today are symptoms of a deeper systemic failing: a dominant cultural paradigm that encourages living in ways that are often directly counter to the realities of a finite planet. This paradigm, typically referred to as 'consumerism,' has already spread to cultures around the world and has led to consumption levels that are vastly unsustainable. If this pattern spreads further there will be little possibility of solving climate change or other environmental problems that are poised to dramatically disrupt human civilization. It will take a sustained, long-term effort to redirect the traditions, social movements and institutions that shape consumer cultures towards becoming cultures of sustainability. These institutions include schools, the media, businesses and governments. Bringing about a cultural shift that makes living sustainably as 'natural' as a consumer lifestyle is today will not only address urgent crises like climate change, it could also tackle other symptoms like extreme income inequity, obesity and social isolation that are not typically seen as environmental problems. State of the World 2010 paints a picture of

what this sustainability culture could look like, and how we can - and already are - making the shift.

Hans Küng is undoubtedly one of the most important theologians of our time, but he has always been a controversial figure, and as the result of a much-publicized clash over papal infallibility had his permission to teach revoked by the Vatican. Yet at seventy-five he is also something like a senior statesman, one of the 'Group of Eminent Persons' convened by the UN Secretary-General Kofi Annan, and a friend of heads of government like Tony Blair and President Mubarak of Egypt. In this fascinating autobiography he gives a frank and outspoken account of the first four decades of his life. He tells of his youth in Switzerland and his decision to become a priest; his doubts and struggles as he studied in Rome and Paris, and his experiences as a professor in Tübingen, where he received a chair at the amazingly early age of thirty-one. Most importantly, as one of the last surviving eye-witnesses he gives an authentic account of the struggles behind the scenes at the Second Vatican Council, in which he took part as a theological expert. Here it becomes clear just how major an influence he was, to the point of shaping the Council's agenda and drafting speeches for bishops to deliver in plenary sessions. With its rich thought and vivid narrative, Küng's book paints a moving picture of his personal convictions, and his struggle for a Christianity characterized not by the domination of an official church but by Jesus.

Soft matter (polymers, colloids, surfactants, liquid crystals) are an important class of materials for modern and future technologies. They are complex materials that behave neither like a fluid nor a solid. This book describes the characteristics of such materials and how we can

understand such characteristics in the language of physics.

This collection of original essays looks at a topic of growing interest and debate in feminist and historical circles: the social regulation of women through law during the 19th and 20th centuries, and the resistance which emerged in response. The collection refutes the notion of women oppressed during the 19th century, unable to act in opposition to the law. When issues of motherhood and women's sexuality became areas of public policy, women began to negotiate the law, as case studies from Europe and the USA show. This book should be of interest to students of women's studies, sociology of law, and social policy.

Autumn, 1944. Doodlebugs are the latest threat to war-battered southern England. At the munitions factory, Em Earle is about to suffer a threat from much nearer home: local crook Samuel Golden is back and up to his old tricks, trying to find ways to exploit people's hardship for his own gain. As well as Samuel's unwanted attentions, Em has to deal with some huge revelations from within her own family. Her daughter Lizzie is pregnant, and a strange woman has turned up on Em's doorstep claiming to be her sister. Em is excited, but wary - could this woman be too good to be true?

Today my mum and I are going to buy a turtle! We have wanted a turtle for a pet for a very long time. Find out how we made a home for our little turtle.

The success of any organization most often depends on the execution and management of such strategic issues as business development, personnel and fiscal operations. This new book introduces readers to the duties and practices assigned to service managers in the successful operation of an automotive

service facility. Coverage begins with a general discussion of the management structure and the service manager's role in facility operations. Consideration is then given to navigation of the personnel process from the recruitment of workers to supervision of their performance. The financial business practices of a service manager familiarizes readers with the importance of fiscal responsibility in the operation of a lucrative automotive service business.
