Brought to an American audience for the first time, How I Wish I'd Taught Maths is the story of an experienced and successful math teacher's journey into the world of research, and how it has entirely transformed his classroom.

A unique, heuristic approach to mathematical discovery and problem solving This combined edition of Mathematical Discovery: On Understanding, Learning and Teaching Problem Solving is unique among mathematics texts. Espousing a heuristic approach to mathematical problem solving, the text may be followed sequentially or according to instructors' individualized curricula. Beginning with a discussion of patterns and practical approaches to problem solving, the book then presents examples from various branches of math and science to help students discover how to solve problems on their own – an invaluable skill for the classroom and beyond.

Help your child be the top of the class with the best-selling home-study series from Carol Vorderman Let Carol Vorderman help your child succeed in Maths.

255 Puzzles For Key Stage Two & Three Learning ?????? This Book Contains: ? English 30 x Word Search 30 x Word Hunt 30 x Target Puzzles 10 x Complex Sentence Cryptograms The puzzles inside include vocabulary found in the UK National Curriculum for Key Stages Two & Three. The English puzzles selected are designed to assist in the skill development of writing, spelling, vocabulary, memory & logical reasoning. ? Maths 15 x Easy Fruit Math Puzzles 15 x Medium Fruit Math Puzzles 15 x Hard Fruit Math Puzzles These 45 math logic puzzles will engage and stimulate your child's problem solving ability through addition, subtraction and multiplication of healthy foods. ? ? ? ? ? ? In early childhood

education it has been demonstrated that a correlation exists between the level of a child's mathematical ability and their future academic success. The reverse of this relationship has also been observed, where children who are behind the mathematical skills of their peers, continue to fall behind in future studies (Pelkowski, et al. 2019). Furthermore, it is well established in literature that the more maths learning opportunities a child is exposed to, the more growth they will experience in math knowledge (Piasta, et al. 2015). ? Logic 20 x Pattern Recognition Problems 30 x Sudoku Puzzles 30 x 2D Mazes 30 x 3D Mazes In today's 'Age of Information', it is of great importance to equip students with critical thinking, and logical reasoning skills to effectively decipher and make meaning from large amounts of information (Fitzgerald, 2005). Logical reasoning assists in construction of concepts and knowledge in the learning process (Ongcoy, 2016). This book includes logic puzzles to promote the cognitive development and logical reasoning to improve their academic performance in high school, and beyond (Bouhnik, Giat, 2009)! Shayer and Adey (1993) found that at the completion of a 2-year science program designed to promote formal operational thinking, improvements were seen in maths, english and science results in the British National Examinations. This book is designed to provide a learning opportunity to foster the curiosity and confidence of children aged 9 - 14 and set them well on the path to academic success. ? ?

Written with the intention of making English easy, this is workbook 2 for Key Stage 2 (higher) which covers all aspects of English, including grammar, writing skills and creative writing.
