One of America's biggest and most diverse landscapes begins in your yard. There's no way around it: Texas is huge. The state dials in at well over 250,000 square miles, housing most of the United States' power grid, arguably all of its delicious food, and almost every kind of environment imaginable: formidable mountains, rolling hills, flat plains, and coastline. If you're a home gardener, knowing what to do when can be overwhelming--that's where Texas Month-by-Month Gardening, the companion book to our Texas Getting Started Garden Guide, comes to the rescue. Inside, Houston horticulturist Robert "Skip" Richter makes it easy with a in-depth month-by-month breakdown of what to plant, when to plant, and how to take care of it in order to have a beautiful Texas garden all year round. During each month, you'll learn to plan, plant, care for, water, fertilize, and troubleshoot in-season annuals, bulbs, lawns, natives, perennials, roses, shrubs, trees, vines, and groundcovers. As with all of our renowned gardening books, you're treated to gorgeous full-color "here's how" and plant photography and USDA zone maps. Plus, you'll get a detailed introduction to gardening specifically in the Lone Star State. So have no fear: from the red buckeyes in Dallas to Sunshine roses in Abilene, you'll have the best little garden in the biggest state around. This report describes the substance of the various interventions implemented by the HSRC and its donor partners in Botswana, South Africa and Zimbabwe, as part of the research-driven, multi-country and multi-site intervention project on orphans and vulnerable children (OVC), funded by the WK Kellogg Foundation. The report provides information on what is happening on the ground and also the basic data required to develop 'models of best practice'. It is organised according to the project's four focus areas: home-based, child-centred development programmes; family and household support programmes; strengthening of community-support systems and HIV/AIDS awareness, advocacy and policy programmes, reported by country. The main purpose of the OVC project is to develop 'models of best practice' that will facilitate the development of community-driven strategies for responding to the increasing burden of OVC in Africa.
