The lending industry is comprised of a wide variety of sectors, such as banking, credit cards, mortgages, leasing and consumer finance. Many of these sectors have interconnections and synergies. In addition, a large number of related services and technologies have a major influence on the lending and credit business. These services include e-commerce, credit risk analysis, call centers and information technologies. Rapid changes have taken place in lending in recent years. For example, large amounts of business and consumer debt are now syndicated or securitized. Meanwhile, non-bank firms, such as GE, have become immense competitors in the lending arena, and international acquisitions are shaping up the globalized banking industry of the near future. This carefully-researched book (which includes a database of leading companies on CD-ROM) is a banking, credit and mortgages market research and business intelligence tool-- everything you need to know about the

With the famine as a backdrop, this is a story about two families as different as coarse wool and fine silk. Michael Ranahan, the son of a tenant farmer, dreams of breaking his bondage to the land and going to America. The passage money has been saved. He's made up his mind to go. And then—the blight strikes and Michael must put his dream on hold. The landlord, Lord Somerville, is a compassionate man who struggles to preserve a way of life without compromising his ideals.
