Every object around us contains the history of all the people and places that brought it here. But rarely is that history explored. In this book, instead of breaking an object apart to reveal those stories, they are told by building the object a guitar named Storyteller from scratch. The text and illustrations reveal the rich lives of the people, places, and projects that breathed life into it. The stories range from people who were pioneers in landscape restoration to those involved with automobile manufacturing. The places include the high arctic, tropical forests, and vertical cliffs of the Niagara Escarpment. The projects include stage plays, laser physics and the establishment of the first Canadian diamond mines. By bringing together these disparate stories in one musical instrument the book makes the argument that art, science, and history are part of everybody's life.

RIFFS: HOW TO CREATE AND PLAY GREAT GUITAR RIFFS: UPDATED AND REVISED

New York Times bestselling author Allen St. John started off looking for the world's greatest guitar, but what he found instead was the world's greatest guitar builder. Living and working in Rugby, Virginia (population 7), retired rural mail carrier Wayne Henderson is a true American original, making America's finest instruments using little more than a pile of good wood and a sharp whittling knife. There's a 10-year waiting list for Henderson's heirloom acoustic guitars—and even a musical legend like Eric Clapton must wait his turn. Partly out of self-interest, St. John prods Henderson into finally building Clapton's guitar, and soon we get to pull up a dusty stool and watch this Stradivari in glue-stained blue jeans work his magic. The story that ensues will captivate you with its portrait of a world where craftsmanship counts more than commerce, and time is measured by old jokes, old-time music, and homemade lemon pies shared by good friends.

A pioneering "horror-punk" band, the Misfits are legends in their own time.
