When the novel *Brave New World* first appeared in 1932, its shocking analysis of a scientific dictatorship seemed a projection into the remote future. Here, in one of the most important and fascinating books of his career, Aldous Huxley uses his tremendous knowledge of human relations to compare the modern-day world with his prophetic fantasy. He scrutinizes threats to humanity, such as overpopulation, propaganda, and chemical persuasion, and explains why we have found it virtually impossible to avoid them. *Brave New World Revisited* is a trenchant plea that humankind should educate itself for freedom before it is too late.

National Book Award Nominee: "Somehow both genuinely scary and genuinely funny, sometimes on the same page—a wickedly entertaining ride."—Publishers Weekly (starred review) One of Publishers Weekly's Best Books of the Year On the outskirts of Buenos Aires in 1907, a doctor becomes involved in a misguided experiment that investigates the threshold between life and death. One hundred years later, a celebrated artist goes to extremes in search of aesthetic transformation, turning himself into an art object. How far are we willing to go, this novel asks, in pursuit of transcendence? The world of *Comemadre* is full of vulgarity, excess, and discomfort: strange ants that form almost perfect circles, missing body parts, obsessive love affairs, and man-eating plants. Darkly funny, smart, and engrossing, here the monstrous is not alien, but the consequence of our relentless pursuit of collective and personal progress. "Outrageous...insanely funny."—BOMB "In this dark, dense, surprisingly short debut novel by the Argentinian author, we're confronted with enough grotesqueries to fill a couple Terry Gilliam films and, more importantly, with the idea that the only real monsters are those that are formed out of our own ambition." —The Millions

«In front of us there is a treasure of nature, which seems to say: defend me, protect me, let me know. We approach the waterfall at an accessible point and sink our hands into a pool. It's good, it's very light ... The water we tasted has conquered us immediately and, moreover, the place is enchanting. The idea of ??commercial is as good as water itself. A few days later, my father summoned me to his office: "Alberto, take care of you". "But Daddy, I do not care about this thing, I have other things on my mind: buildings, construction sites ...». A spite of all my rebellions, beyond a little, where do I go? It's been just a month since that conversation with my father that I find myself dealing with mineral waters, sources to be managed, future bottles to sell and grains to solve ... ". Thus begins the story of the water "Sant'Anna", the natural mineral water today leading in Italy. And this is his novel.

The act of eating is a basic human need. Yet, in all societies, quotidian choices regarding food and its consumption reveal deeply rooted shared cultural conventions. Food goes beyond issues relating to biological needs and nutrition or production and commerce; it also reveals social and cultural criteria that determine what dishes are prepared on what occasions, and it unveils the politics of the table via the rituals associated with different meals. This book approaches the history of food in Late Medieval and Renaissance Italy through an interdisciplinary prism of sources ranging from correspondence, literature (both high and low), and medical and dietary treatises to cosmographic theory and iconographic evidence. Using a variety of analytical methods and theoretical approaches, it moves food studies firmly into the arena of Late Medieval and Renaissance history, providing an essential key to deciphering the material and metaphorical complexity of this period in European, and especially Italian, history.

From Brian Greene, one of the world's leading physicists and author of the Pulitzer Prize finalist *The Elegant Universe*, comes a grand tour of the universe that makes us look at reality in a completely different way. Space and time form the very fabric of the cosmos. Yet they remain among the most mysterious of concepts. Is space an entity? Why does time have a direction? Could the universe exist without space and time? Can we travel to the past? Greene has set himself a daunting task: to explain non-intuitive, mathematical concepts like String Theory, the Heisenberg Uncertainty Principle, and Inflationary Cosmology with analogies drawn from common experience. From Newton's unchanging realm in which space and time are absolute, to Einstein's fluid conception of spacetime, to quantum mechanics' entangled arena where vastly distant objects can instantaneously coordinate their behavior, Greene takes us all, regardless of our scientific backgrounds, on an irresistible and revelatory journey to the new layers of reality that modern physics has discovered lying just beneath the surface of our everyday world.

"Don't pick up a Mackay book unless you've got spare time. They're habit-forming." - Janet Maslin, *The New York Times* Martin Sivok is in trouble. Tied to a chair, plastic strips biting his wrists, inside a deserted warehouse. . . There are only so many ways this scenario can end, most of them badly. For now his best hope is figuring out who put him here--and staying conscious long enough to confront them. To stay awake he reviews the past year of his life: evading the law in the Czech Republic by running to Glasgow, settling into a borderline respectable relationship with his landlady, and getting back into the life at the very bottom of the criminal ladder, alongside Usman Kassar, a cocky, goofy kid anxious to prove himself. The job should be simple: Smash heads, grab cash, run. The trouble with being two outsiders is, you don't always know whose heads are too dangerous to crack, or whose cash is too hot to handle... In sharp, precise prose, Malcolm Mackay--an "elegant stylist" unmatched in contemporary noir (*Chicago Tribune*)--captures the character of Glasgow and its underworld denizens.

One of Kirkus Review's "Best Books of 2013" The shocking end is only the beginning . . . #1 bestselling author Jeffery Deaver has created the most riveting and original novel of the year--a race-against-the-clock mystery, told in reverse. The October List Gabriela waits desperately for news of her abducted daughter. At last, the door opens. But it's not the negotiators. It's not the FBI. It's the kidnapper. And he has a gun. How did it come to this? Two days ago, Gabriela's life was normal. Then, out of the blue, she gets word that her

six-year-old daughter has been taken. She's given an ultimatum: pay half a million dollars and find a mysterious document known as the "October List" within 30 hours, or she'll never see her child again. A mind-bending novel with twists and turns that unfold from its dramatic climax back to its surprising beginning, *The October List* is Jeffery Deaver at his masterful, inventive best.

Good luck isn't just chance—it can be learned and leveraged—and *The Serendipity Mindset* explains how you can use serendipity to make life better at work, at home—everywhere. Many of us believe that the great turning points and opportunities in our lives happen by chance, that they're out of our control. Often we think that successful people—and successful companies and organizations—are simply luckier than the rest of us. Good fortune—serendipity—just seems to happen to them. Is that true? Or are some people better at creating the conditions for coincidences to arise and taking advantage of them when they do? How can we connect the dots of seemingly random events to improve our lives? In *The Serendipity Mindset*, Christian Busch explains that serendipity isn't about luck in the sense of simple randomness. It's about seeing links that others don't, combining these observations in unexpected and strategic ways, and learning how to detect the moments when apparently random or unconnected ideas merge to form new opportunities. Busch explores serendipity from a rational and scientific perspective and argues that there are identifiable approaches we can use to foster the conditions to let serendipity grow. Drawing from biology, chemistry, management, and information systems, and using examples of people from all walks of life, Busch illustrates how serendipity works and explains how we can train our own serendipity muscle and use it to turn the unexpected into opportunity. Once we understand serendipity, Busch says, we become curators of it, and luck becomes something that no longer just happens to us—it becomes a force that we can grasp, shape, and hone. Full of exciting ideas and strategies, *The Serendipity Mindset* offers a clear blueprint for how we can cultivate serendipity to increase innovation, influence, and opportunity in every aspect of our lives.

“La storia dei sentimenti umani ci può aiutare a capire che l'economia, la politica e le altre forme di organizzazione umana che paiono vivere di leggi, algoritmi e regole, in realtà sono figlie dei nostri sentimenti. Ve ne sono stati di meravigliosi nel corso della storia. Studiamoli, copiamoli e vivremo più felici.” Dalla scoperta del fuoco alla rivoluzione industriale, dalla democrazia ateniese all'intelligenza artificiale, lo spirito di ogni grande salto della storia dell'uomo si può racchiudere in un sentimento prevalente, in un'emozione collettiva che ha mosso i nostri antenati verso nuove invenzioni. Oscar Farinetti intreccia le storie del passato con l'Italia e il mondo di oggi per invitarci a guardare alle energie positive chiuse dentro di noi, un potenziale enorme di cui abbiamo un grande bisogno, e che aspetta di essere liberato.

“ Questo libro l'ho chiamato Quasi perché penso che, ricordandoci di essere imperfetti, possiamo essere quasi felici.” La natura, gli affetti, le buone e cattive abitudini, la memoria e le passioni nelle parole di Oscar Farinetti e nei disegni di Marco Nereo Rotelli. Una riflessione in parole e immagini sui sentimenti che ci legano agli altri e al mondo in cui viviamo, un invito a scoprire la bellezza nascosta che ci circonda.

Inventive and heart-racing, this fierce feminist teen fantasy from debut author Bree Barton explores a dark kingdom in which only women can possess magic—and every woman is suspected of having it. Fans of Leigh Bardugo and Laini Taylor won't want to miss this gorgeously written, bold novel, the first in the *Heart of Thorns* trilogy. In the ancient river kingdom, where touch is a battlefield and bodies the instruments of war, Mia Rose has pledged her life to hunting Gwyrach: women who can manipulate flesh, bones, breath, and blood. The same women who killed her mother without a single scratch. But when Mia's father announces an alliance with the royal family, she is forced to trade in her knives and trousers for a sumptuous silk gown. Determined to forge her own path forward, Mia plots a daring escape, but could never predict the greatest betrayal of all: her own body. Mia possesses the very magic she has sworn to destroy. Now, as she untangles the secrets of her past, Mia must learn to trust her heart...even if it kills her.

Set on the beautiful island of Islay, *The Christmas Secret* is a gripping story filled with emotion from Karen Swan, author of *Christmas Under the Stars*. Alex Hyde is the leaders' leader. An executive coach par excellence, she's the person the Great and the Good turn to when the pressure gets too much; she can change the way they think, how they operate, she can turn around the very fortunes of their companies. Her waiting list is months' long, but even she can't turn down the unorthodox but highly lucrative crisis call that comes her way a few weeks before Christmas, regarding the troublesome – and troubled – head of an esteemed whisky company in Scotland: Lochlan Farquhar, CEO of Kentallen Distilleries, is a maverick, an enigma and a renegade, and Alex needs to get inside his head before he brings the company to its knees. It should be business as usual. She can do this in her sleep. Only, when she gets to the remote island of Islay, with the winter snows falling, Alex finds herself out of her comfort zone. For once, she's not in control – Lochlan, though darkly charismatic, is unpredictable and destructive, her usual methods gaining no traction with him – and with Christmas and her deadline fast approaching, she must win his trust and find a way to close on this deal. But as she pulls ever closer to him, boundaries become blurred, loyalties loosen and Alex finds herself faced with an impossible choice as she realizes nothing and no-one is as they first seemed. 'Fun and great escapism' – Tracy Rees, author of *The Hourglass* 'I devoured it like a tray of warm mince pies. A delicious winter tale' – Sarah Morgan, bestselling author of *Moonlight Over Manhattan* 'If you're anything like us, then a book by Karen Swan has become synonymous with Christmas, and her latest is arguably her best yet ... smart plots, brilliant characters and juicy romance' – Heat

"Americans eat chicken more than any other meat. But our nation's favorite food comes with an invisible cost: its insidious effect on our health. In this extraordinary narrative, acclaimed journalist Maryn McKenna reveals how antibiotic use has altered the way we consume industrially raised meat, and its impact on our daily lives. Drawing on decades of research, as well as interviews with entrepreneurs, epidemiologists, and other specialists, McKenna spins an astonishing story of science gone wrong. In the middle of the last century, antibiotics fueled the rapid rise of chicken from local delicacy to everyday protein source. But with that spectacular growth came great risk. As resistance to new wonder drugs crept into the farming process, bacterial outbreaks became harder to treat. And the consequences—to agriculture, to human health, and to modern medicine—were devastating. Beginning with the push to make chicken the affordable entrée of choice and tracing its evolution to a global commodity and carrier of foodborne illness, McKenna shines a light on the hidden forces of industrialization, the repercussions of runaway antibiotic use, and the outcome for future generations. Taking readers from the first poultry farms on the Delmarva Peninsula to the little-known lab where the chicken nugget was invented and into today's factory farms, McKenna reveals that the history of chicken is as much about economics, politics, and culture as it is about what we eat. In these vivid pages, she gives voice to a vanguard of farmers, chefs, and activists who are seeking to return poultry to an honored place at the table—and are changing the way we think about food. Incisive and beautifully written, *Big Chicken* is a cautionary tale of an industry that lost its way—and shows us the way back to healthier eating"—Back cover.

Tony Millionaire's Sock Monkey is one of the great all-ages comics properties of the new millennium, spawning plush dolls, TV appearances, lunch boxes, Zippo lighters and more. Now, for the first time, all

twelve of multiple Eisner Award-winner Tony Millionaire's acclaimed Sock Monkey all-ages comic books (1998-2007, originally published by Dark Horse Comics) are collected under one cover, as well as the full-color graphic novella "Uncle Gabby" (2004) and the full-color illustrated storybook, "The Glass Doorknob" (2002), ready to be devoured by a new generation of young readers. The precocious sock monkey Uncle Gabby and his innocent pal Mr. Crow are the heroes of this funny, unsettling and endearing collection. Follow them as they try to find a home for a shrunken head, play matchmakers between the bat in the doll's house and the mouse in the basement, unlock the mysteries of a glass doorknob, hunt salamanders, try to get to heaven, and much more.

Kentucky straight is bourbon with no mixer. Kentucky Straight is Kentucky seen without nostalgic gloss. These riveting, often heartbreaking stories, take us through country that is unmapped. They are set in a nameless Appalachian community too small to be called a town, a place where wanting an education is a mark of ungodly arrogance and dowsing for water a legitimate occupation; where hunting is not a sport but a means of survival. These are stories of coal miners and backwoods medicine men, of gamblers and marijuana farmers, tales of real tragedy and unutterable strangeness that convey their sense of place so vividly that we feel its ground rise beneath our feet. Offutt has received a James Michener Grant and a Kentucky Arts Council Award.

San Diego in the years before World War II. James Dillon is barely scraping by working a menial job in manufacturing, trying to raise a family and support his elderly mother and sister Frankie at the same time. He drinks too hard -- just like his father and nearly everyone in his extended family. With so many people crammed into one home, sometimes there's so much fighting he can barely stand it. But if James can survive the chaos of everyday life long enough, maybe -- just maybe -- there's a chance it'll all get better. Now and on Earth, Jim Thompson's first novel, draws on personal experience to depict a hardscrabble life in the sun-soaked streets of mid-20th century California. Chronicling the birth of a writer and the plight of the working man, it prefigures the American classics that followed, in a deeply-felt, autobiographical tale that shows a writer just coming into his own.

The Holy Spirit is often portrayed as something "weird." But the Bible makes it clear that the Spirit is not something. He is someone-a Person who has promised to never leave your side. John Bevere invites you into a personal discovery of the most ignored and misunderstood Person in the Church: the Holy Spirit.

Teaches children the basics of Latin grammar and vocabulary, as well as Roman British history and culture, through vocabulary lists, mythical tales, and illustrations.

Il fondatore di Eataly torna sui grandi temi che gli stanno a cuore: in primis quelli della biodiversità e dell'eccellenza italiana nel campo agroalimentare. Lo fa con pagine che richiamano la forma delle operette morali, racconti in cui personaggi spesso appartenenti a epoche diverse – da Noè a Fabio Brescacin di NaturaSi, da Plinio il Vecchio a Tonino Guerra, da Hemingway ad Alice, “acciuga filosofa” – dialogano sulla scoperta del fuoco, ripercorrono la storia dell'agricoltura, raccontano la storia del vino, della birra, dell'olio e quella della pesca, si interrogano sul rapporto fra gli uomini e gli animali e provano a immaginare un futuro sostenibile. Farinetti condensa queste storie millenarie in sei brevi racconti vivi di un umorismo e di una spinta etica che rendono piacevole e appassionante la lettura, sicché, pagina dopo pagina, apprendiamo l'origine delle diverse colture e le scoperte che le riguardano, trattate con l'occhio attento e rispettoso di chi crede fermamente nell'innovazione così come nell'importanza della tradizione. Il racconto lungo di chiusura, invece, ci porta nel Rinascimento attraverso il dipinto Il battesimo di Cristo della bottega del Verrocchio. In un ripetuto confronto fra il presente e quel florido passato emerge la necessità di abbandonare le lamentele intorno alle storture del presente e di essere i primi protagonisti del cambiamento. Chiude il libro una sorta di “riassunto” dal Bing Bang ai giorni nostri, una riflessione che ci invita a un modello sociale ed economico basato su un nuovo rapporto con la natura e tra noi uomini, in cui la parola chiave sia “rispetto”. Chi si impegnerà in tal senso potrà essere considerato “FICO”.

Letter to Menoecus - Epicurus - Translated by Robert Drew Hicks - Epicurus; 341-270 BC, was an ancient Greek philosopher as well as the founder of the school of philosophy called Epicureanism. Only a few fragments and letters of Epicurus's 300 written works remain. Much of what is known about Epicurean philosophy derives from later followers and commentators. For Epicurus, the purpose of philosophy was to attain the happy, tranquil life, characterized by ataraxia-peace and freedom from fear-and aponia-the absence of pain-and by living a self-sufficient life surrounded by friends. He taught that pleasure and pain are measures of what is good and evil; death is the end of both body and soul and should therefore not be feared; the gods neither reward nor punish humans; the universe is infinite and eternal; and events in the world are ultimately based on the motions and interactions of atoms moving in empty space. Epicurus is a key figure in the development of science and scientific methodology because of his insistence that nothing should be believed, except that which was tested through direct observation and logical deduction. He was a key figure in the Axial Age, the period from 800 BC to 200 BC, during which, according to Karl Jaspers, similar thinking appeared in China, India, Iran, the Near East, and Ancient Greece. His statement of the Ethic of Reciprocity as the foundation of ethics is the earliest in Ancient Greece, and he differs from the formulation of utilitarianism by Jeremy Bentham and John Stuart Mill by emphasizing the minimization of harm to oneself and others as the way to maximize happiness.

This volume invites to bridge the traditional gap between the author and the scribes, which means between the "original text" and the “copies” in order deal with more complex situations, in which the performer, the screenwriter, or the director...

This collection gathers previously uncollected entries from the author's autobiographical column.

The secrets to Italian cooking, straight from the source—the wildly popular food emporium that is founded in Italy. The first secret to the best cooking, of course, is the best-quality ingredients. How to Eataly tells you what to look for in the market, then offers one hundred recipes for contemporary classics such as Acorn Squash with Lentils, Vesuvio Pasta with Sausage, and Panna Cotta with Streusel. In addition, the book is packed with simple ideas for what to do with staples, from olive oil to mozzarella. Whether you are cooking from scratch or using some store-bought components, How to Eataly empowers you to create delicious meals by fostering a total understanding of Italian cooking.

Molly and her kittens live in feline luxury at their very own cat café in the Cotswolds village of Stourton. People flock from far and wide to visit the café, lured by delicious baked goods and adorable cats. For owner Debbie, Molly and her kittens, life is good. Or so they thought? When Debbie's sister Linda turns up unannounced and heartbroken, Debbie insists she stay at the café. What Debbie doesn't realize is that Linda's arrived with an unwelcome guest - a dog called Beau. However, there's one thing the cats hate in their café - dogs. With Christmas approaching, Molly feels as if her home and family are both under threat. But fate has another surprise in store for the cat café's residents, which leaves both Debbie and Molly floundering. Suddenly Molly's future is far from certain...

One by one, the guests arrived at the mansion on Indian Island, summoned by a mysterious host. And one by one, with terrifying meticulousness, they were stalked by a cunning murderer. Utterly baffling...and yet there was a pattern, concealed in a nursery rhyme hanging over the fireplace.

One more journey to the universe of Roberto Bolaño, an essential voice of contemporary Latin American literature *Cowboy Graves* is an unexpected treasure from the vault of a revolutionary talent. Roberto Bolaño's boundless imagination and seemingly inexhaustible gift for shaping the chaos of his reality into fiction is unmistakable in these three novellas. In "Cowboy Graves," Arturo Belano--Bolaño's alter ego--returns to Chile after the coup to fight with his comrades for socialism. "French Comedy of Horrors" takes the reader to French Guiana on the night after an eclipse where a seventeen year old answers a pay phone and finds himself recruited into the Clandestine Surrealist Group, a secret society of artists based in the sewers of Paris. And in "Fatherland," a young poet reckons with the fascist overthrow of his country, as the woman he is obsessed with disappears in the ensuing violence and a Third Reich fighter plane mysteriously writes her poetry in the sky overhead. These three fiercely original tales bear the signatures of Bolaño's extraordinary body of work, echoing the strange characters and uncanny scenes of his triumphs, while deepening our reverence for his gifts.

In a one-of-a-kind graphic novel collaboration between the #1 New York Times bestselling author of *The Martian* and the beloved illustrator behind *Sarah's Scribbles*, Alice, Wendy, and Dorothy team up to save the multiverse, from *Wonderland* to *Neverland* and *Oz*. Originating as fan fiction from the brilliant imagination of Andy Weir, now brought to vivid life by Sarah Andersen, *Cheshire Crossing* is a funny, breakneck, boundlessly inventive journey through classic worlds as you've never seen them before. Years after their respective returns from *Wonderland*, *Neverland*, and *Oz*, the trio meet here, at *Cheshire Crossing*—a boarding school where girls like them learn how to cope with their supernatural experiences and harness their magical world-crossing powers. But Alice, Wendy, and Dorothy—now teenagers, who've had their fill of meddling authority figures—aren't content to sit still in a classroom. Soon they're dashing from one universe to the next, leaving havoc in their wake—and, inadvertently, bringing the *Wicked Witch* and *Hook* together in a deadly supervillain love match. To stop them, the girls will have to draw on all of their powers . . . and marshal a team of unlikely allies from across the magical multiverse. Advance praise for *Cheshire Crossing* "Deliciously funny . . . a shrewd and spirited adaptation that will leave audiences hoping for another installment . . . Andersen's delightful cartoon drawing style meshes perfectly with Weir's prose, allowing the work to broaden its appeal beyond middle graders to young adults and adults."—Kirkus Reviews (starred review)

"Thought provoking and fresh - this book challenges how we think about economics." Gillian Tett, Financial Times For further information about recent publicity events and media coverage for *Rethinking Capitalism* please visit <http://marianamazucato.com/rethinking-capitalism/> Western capitalism is in crisis. For decades investment has been falling, living standards have stagnated or declined, and inequality has risen dramatically. Economic policy has neither reformed the financial system nor restored stable growth. Climate change meanwhile poses increasing risks to future prosperity. In this book some of the world's leading economists propose new ways of thinking about capitalism. In clear and compelling prose, each chapter shows how today's deep economic problems reflect the inadequacies of orthodox economic theory and the failure of policies informed by it. The chapters examine a range of contemporary economic issues, including fiscal and monetary policy, financial markets and business behaviour, inequality and privatisation, and innovation and environmental change. The authors set out alternative economic approaches which better explain how capitalism works, why it often doesn't, and how it can be made more innovative, inclusive and sustainable. Outlining a series of far-reaching policy reforms, *Rethinking Capitalism* offers a powerful challenge to mainstream economic debate, and new ideas to transform it.

Eric Hobsbawm, who passed away in 2012, was one of the most brilliant and original historians of our age. Through his work, he observed the great twentieth-century confrontation between bourgeois fin de siècle culture and myriad new movements and ideologies, from communism and extreme nationalism to Dadaism to the emergence of information technology. In *Fractured Times*, Hobsbawm, with characteristic verve, unpacks a century of cultural fragmentation. Hobsbawm examines the conditions that both created the flowering of the belle époque and held the seeds of its disintegration: paternalistic capitalism, globalization, and the arrival of a mass consumer society. Passionate but never sentimental, he ranges freely across subjects as diverse as classical music, the fine arts, rock music, and sculpture. He records the passing of the golden age of the "free intellectual" and explores the lives of forgotten greats; analyzes the relationship between art and totalitarianism; and dissects phenomena as diverse as surrealism, art nouveau, the emancipation of women, and the myth of the American cowboy. Written with consummate imagination and skill, *Fractured Times* is the last book from one of our greatest modern-day thinkers.

In the early 1970s, Corey Sifter, the son of working-class parents, becomes a yard boy on the grand estate of the powerful Metarey family. Soon, through the family's generosity, he is a student at a private boarding school and an aide to the great New York senator Henry Bonwiller, who is running for president. Before long, Corey finds himself involved with one of the Metarey

daughters as well, and he begins to leave behind the world of his upbringing. As the Bonwiller campaign gains momentum, Corey finds himself caught up in a complex web of events in which loyalty, politics, sex, and gratitude conflict with morality, love, and the truth. Ethan Canin's stunning novel is about America as it was and is, a remarkable exploration of how vanity, greatness, and tragedy combine to change history and fate.

"A necessary book for anyone truly interested in what we take from the sea to eat, and how, and why." —Sam Sifton, The New York Times Book Review Acclaimed author of *American Catch* and *The Omega Principle* and life-long fisherman, Paul Greenberg takes us on a journey, examining the four fish that dominate our menus: salmon, sea bass, cod, and tuna. Investigating the forces that get fish to our dinner tables, Greenberg reveals our damaged relationship with the ocean and its inhabitants. Just three decades ago, nearly everything we ate from the sea was wild. Today, rampant overfishing and an unprecedented biotech revolution have brought us to a point where wild and farmed fish occupy equal parts of a complex marketplace. *Four Fish* offers a way for us to move toward a future in which healthy and sustainable seafood is the rule rather than the exception.

In *Postmodern Winemaking*, Smith shares knowledge he has accumulated in engaging, humorous, and erudite essays that convey a new vision of the winemaker's craft—one that credits the crucial roles played by both science and art in the winemaking process. Smith, a leading innovator in red wine production techniques, explains how traditional enological education has led many winemakers astray—enabling them to create competent, consistent wines while putting exceptional wines of structure and mystery beyond their grasp. Great wines, he claims, demand a personal and creative engagement with many elements of the process. His lively exploration of the facets of postmodern winemaking, together with profiles of some of its practitioners, is both entertaining and enlightening.
