This volume aims at building bridges from pragmatics to dialogue and overcoming the gap between two 'circles' which have cut themselves off from each other in recent decades even if both addressed the same object, 'language use'. Pragmatics means the study of natural language use. There is however no clear answer as to what language use means. We are instead confronted with multiple and diverse models in an uncircumscribed field of language use. When trying to transform such a puzzle of pieces into a meaningful picture we are confronted with the complexity of language use which does not mean 'language' put to 'use' but represents the unity of a complex whole and calls for a total change in methodology towards a holistic theory. Human beings as dialogic individuals use language as dialogue which allows them to tackle the vicissitudes of their lives. Dialogue and its methodology of action and reaction can be traced back to human nature and provides the key to the unstructured field of pragmatics. The contributions to this volume share this common ground and address various perspectives in different types of action game.

This book is an ambitious synthesis of the social, economic, political and cultural interactions between Greeks and non-Greeks in the Mediterranean world during the Archaic, Classical and Hellenistic periods. Instead of traditional and static distinctions between Greeks and Others, Professor Vlassopoulos explores the diversity of interactions between Greeks and non-Greeks in four parallel but interconnected worlds: the world of networks, the world of apoikiai ('colonies'), the Panhellenic world and the world of empires. These diverse interactions set into motion processes of globalisation; but the emergence of a shared material and cultural koine across the Mediterranean was accompanied by the diverse ways in which Greek and non-Greek cultures adopted and adapted elements of this global koine. The book explores the paradoxical role of Greek culture in the processes of ancient globalisation, as well as the peculiar way in which Greek culture was shaped by its interaction with non-Greek cultures.

In 1990, Günter Grass - a reluctant diarist - felt compelled to make a record of the interesting times through which he was living. Following the fall of the Berlin Wall in November 1989 and the collapse of Communism, Germany and Europe were enduring a period of immense upheaval. Grass resolved to immerse himself in these political debates: he travelled widely throughout both Germanys, the former East and the former West, conducting a lively exchange with political enemies, friends and his own children about all the questions posed by reunification. His account gives the reader an unparalleled insight into a key moment in the life of modern Europe, seen through the eyes of one of its most acclaimed writers. It also provides a startling insight into the creative process as the reader witnesses ideas for novels

occurring and then taking shape. From Germany to Germany is both a personal journal by a great creative artist and a penetrating commentary on recent European history by someone who was simultaneously an acute observer and a highly engaged participant.
