This is a key study into whether 'climate change refugees' are protected by international law. It examines the reasons why people do or do not move; how far climate change is a trigger for movement; and whether traditional international responses, such as creating new treaties and new institutions, are appropriate solutions in this context.

This book fills in as a study of India's universal relations. The thought of this subject is of regularly expanding enthusiasm to lawmakers, organizers, and examiners inside and outside India. The sense is discernable that the 21st century is seeing the 'ascent' of India inside the universal framework.

The Yearbook aims to promote research, studies and writings in the field of international law in Asia, as well as to provide an intellectual platform for the discussion and dissemination of Asian views and practices on contemporary international legal issues.

This book is the first-ever comprehensive analysis of international law from Global South perspectives with specific reference to Bangladesh. The book not only sheds new light on classical international law concepts, such as statehood, citizenship, and self-determination, but also covers more current issues including Rohingya refugees, climate change, sustainable development, readymade garment workers and crimes against humanity. Written by area specialists, the book explores how international law shaped Bangladesh state practice over the last five decades; how Bangladesh in turn contributed to the development of international law; and the manner in which international law is also used as a hegemonic tool for marginalising less powerful countries like Bangladesh. By analysing stories of an ambivalent relationship between international law and post-colonial states, the book exposes the duality of international law as both a problem-solving tool and as a language of hegemony. Despite its focus on Bangladesh, the book deals with the more general problem of post-colonial states' problematic relationship with international law and so will be of interest to students and scholars of international law in general, as well as those interested in the Global South and South Asia in particular.

This Handbook gives an overview of India's international relations, given the development of India as a major economic power in the world, and the growing interest in the impact of Asia on the international system in the future. Edited by David Scott of Brunel University, and with chapters written by a variety of experts, the Handbook of India's International Relations offers an up-to-date, unbiased and comprehensive resource to academics, students of international relations, business people, media professionals and the general reader. There is a pre-publication price on this title, the price rises to £150 three months after publication.

This book discusses the subject of pathways to a sustainable economy through science and technology innovations which are regarded as the important components of the '4th Industrial Revolution'. The volume has been developed from Bangladesh's 'Vision 2041' agenda which includes development actions needed to catch up with more developed nations. Most importantly, the goals of the 'Vision 2041' have been taken from the dreams of the architect of independent Bangladesh, Bangabandhu (Friends of Bengal) Sheikh Mujibur Rahman. His dream was to make Bangladesh the Switzerland of Asia. The Father of Bangladesh Nation was killed by assassins' bullets along with his most of the family members in August 1975. After his death, the nation moved backwards while recovering from nine months of liberation post war in 1971. Between 1975 and 1990 Bangladesh was ruled by military and quasi military

governments. Bangladesh established a true democratic regime in 1996 with Sheikh Mujib's daughter, Sheikh Hasina, who formed the government after 21 years with a mandate to realise the dreams of her father. Sheikh Hasina, had her own 20 year vision for Bangladesh, called, 'Vision 2021', with plans to make the nation poverty free by 2021. After a pause between 2001 and 2008, Sheikh Hasina returned to power in 2009. Under her consecutive three terms she brought Bangladesh back on track and Bangladesh is one of the nations which reduced poverty half under MDGs by 2015. During her third consecutive term Sheikh Hasina, is on the way to transforming Bangladesh into a 'middle income' nation by 2021. This volume aims to identify and mitigate the challenges of '4th Industrial Revolution' investigating the areas of science and technology innovations for Bangladesh and for other parts of the world keeping in mind establishing a sustainable economy under UN agendas to 2030 (SDGs). The primary audience for this book are UN development agencies, academic institutions, government policymakers and business leaders of the more developed and developing nations alike.

This book investigates the interplay of internal and external constraints, challenges and possibilities regarding foreign policy in India. It is the first attempt to systematically analyse and focus on the different actors and institutions in the domestic and international contexts who impose and push for various directions in India's foreign policy. Rather than focusing on any one particular theme, the book

explores the myriad aspects of foreign policymaking and the close interface between the domestic and external aspects in Indian policymaking. In turn, this relates to the structural issues shaping and reshaping the Asian regional dynamics and India's connectivity within a globalized world. This book will be of great interest to postgraduate students; scholars of Asian Studies, development, and political science and international relations; and all those involved in policy – especially foreign policy – within India and South Asia. It will also be useful for people working in professional branches of consultancy and the private sector dealing with India and with South Asia in general.

Providing Peacekeepers analyzes the factors which encourage (or discourage) states from contributing their soldiers to serve in United Nations peacekeeping operations. It focuses on the UN's experiences during the twenty-first century and does so through four thematic and sixteen case study chapters.

The growing economic and political significance of Asia has exposed a tension in the modern international order. Despite expanding power and influence, Asian states have played a minimal role in creating the norms and institutions of international law; today they are the least likely to be parties to international agreements or to be represented in international organizations. That is changing. There

is widespread scholarly and practitioner interest in international law at present in the Asia-Pacific region, as well as developments in the practice of states. The change has been driven by threats as well as opportunities. Transnational issues such as climate change and occasional flashpoints like the territorial disputes of the South China and the East China Seas pose challenges while economic integration and the proliferation of specialized branches of law and dispute settlement mechanisms have also encouraged greater domestic implementation of international norms across Asia. These evolutions join the long-standing interest in parts of Asia (notably South Asia) in post-colonial theory and the history of international law. The Oxford Handbook of International Law in Asia and the Pacific brings together pre-eminent and emerging specialists to analyse the approach to and influence of key states of the region, as well as whether truly 'Asian' trends can be identified and what this might mean for international order. It is generally viewed that a country like Bangladesh which is weak, poor and heavily dependent upon the assistance of the international institutions and major powers of the world can not have anything significant in its foreign policy which can be studied. The reality is contrary to the common perception. Foreign policy of all the least developed countries

Child soldiers are generally perceived as faultless, passive victims. This ignores that the roles of child soldiers vary, from innocent abductee to wilful perpetrator. This book argues that child soldiers should be judged on their actions and that treating them like a homogenous group prevents them from taking responsibility for their acts.

This volume is designed to place in context the passionate controversies and emotional attachments of the two billion people who live, study, work, love, and die in the Middle East and South Asia.

Understanding these regions means more than annually-updated details of the governments, politics, cultures, and economies of the twenty-four nations and assorted territories. Special chapters address significant issues of continuing international importance, including access to water, the role of oil, and the 2011 Arab spring. Both regions, after all, contain types of people misunderstood and often intensely disliked by others. Where religion intrudes on politics—the Afghan Taliban oppose educating girls, Hindu fanatics rampage in India, Iranian militiamen shoot demonstrators, Islamic extremists impose sharia, and Jewish Ultra-Orthodox send women to the back of the bus—readers bombarded with superficial news bites and slanted reporting might never sense the other accomplishments of these same societies. bring relief to the impoverished, Israel's scholars win Nobel prizes, and most Indians cherish long-standing religious toleration. The author of this volume attempts to let the reader draw conclusions from the evidence.

This is the first volume to comprehensively and systematically study, describe, and theorize the financial obligation created and governed by public international law. Legal globalization has given rise to a number of financial issues in international law in areas as diverse as development financing, investment protection, compensation of human rights victims, and sovereign debt crises. The claims resulting from the proliferation of financial activity are not limited to those primarily involving financial obligation (e.g. loans and grants) but include secondary obligation resulting from the law on international responsibility. Among the many instances of financial obligation covered in this study, the reader will find inter-State financial transactions, inter-State sale of goods, transnational services such as telecommunications and post, the financial operations of multilateral institutions, loans, grants and guarantees provided by the various international financial institutions, certain financial relations between non-State actors (including natural persons) and States, intergovernmental organizations or other international legal actors, and government loans to international organizations.

Rich in historical detail and systematic in its coverage of contemporary law, this book will be valued by all practitioners and scholars with an interest in the nature of international financial obligation.

Bangladesh Country Study Guide - Strategic Information and Developments Volume 1 Strategic Information and Developments

Child soldiers remain poorly understood and inadequately protected, despite significant media attention and many policy initiatives. This Research Handbook aims to redress this troubling gap. It offers a reflective, fresh and nuanced review of the complex issue of child soldiering. The Handbook brings together scholars from six continents, diverse experiences, and a broad range of disciplines. Along the way, it unpacks the life-cycle of youth and militarization: from recruitment to demobilization to return to civilian life. The overarching aim of the Handbook is to render the invisible visible – the contributions map the unmapped and chart new directions. Challenging prevailing assumptions and conceptions, the Research Handbook on Child Soldiers focuses on adversity but also capacity: emphasising the resilience, humanity, and potentiality of children affected (rather than ‘afflicted’) by armed conflict.

Drawing upon international relations theory, this volume conceptualizes possible solutions to the various conflicts in South Asia. It analyses the bilateral conflicts between India and Pakistan and other multilateral problems specific to this region. Bringing together scholarship from several South Asian countries, it offers a well-rounded formulation of conflict resolution and cooperation-building. The volume employs a strong theoretical rubric, empirical research, and exhaustive fieldwork. Its centralizing approach to sustain the diversity of perspectives and arguments makes it an indispensable contribution to strategic studies.

It is often only years after the commission of core international crimes that prosecutions and investigations take place. This anthology addresses challenges associated with such delayed justice: the location, treatment, and assessment of old evidence. Part I considers the topic from the perspective of different actors involved in the prosecution of core international crimes at the domestic and international levels. Part II comprises chapters focusing on the efforts of the Bangladeshi authorities to investigate and prosecute international crimes perpetrated during the 1971 war. This book brings together experienced judges, prosecutors, lawyers, scientists, and commentators who have dealt with questions of old evidence in their work. Among the contributors are Shafique Ahmed, Andrew Cayley, David Cohen, Seena Fazel, Siri S. Frigaard, M. Amir-UI Islam, Md. Shahinur Islam, Agnieszka Klonowiecka-Milart, Alphons M.M. Orie, Stephen J. Rapp, Patrick J. Treanor, Otto Triffterer and Martin Witteveen. The chapters describe the challenges encountered in practice and suggest concrete solutions that can be tailored to fit the circumstances of the case or country. By providing a comprehensive analysis of the relevant problems in this area and a variety of views, this anthology will serve as an invaluable resource for criminal justice actors and researchers seeking to address questions of old evidence.

This book brings together a collection of essays about the untenable political status quo in Bangladesh under Sheikh Hasina. Since democratization in the 1990s, Bangladeshi political life has been characterized by fierce battles over the role of religion in society, corruption, and the obstacles to constructing a society with freedom of expression and rule of
