During the past 10 years following the 2004 Indian Ocean Tsunami, invaluable lessons have been learned and great changes have been observed. Immediately after the disaster, the second World Conference on Disaster Reduction was held in Kobe, Japan, and formulated the Hyogo Framework for Action (HFA: 2005–2015). HFA provided a platform and framework for changes and innovations, many of which were part of the recovery programs in the different countries affected by the 2004 disaster. This book is a modest attempt to review the lessons learned through the recovery process in the affected region. The book has 31 chapters, drawing lessons from four countries: India, Indonesia, Sri Lanka, and Thailand. There are five sections: Overview (10 chapters), Indonesia (8 chapters), India (6 chapters), Sri Lanka (5 chapters), and Thailand (2 chapters). The primary target groups for this book are students and researchers in the fields of disaster risk reduction, environment, and development. The book provides them with a good idea of the current research trends and lessons over the past decade of recovery initiatives. Another target group comprises practitioners and policy makers, who will be able to apply the knowledge collected here to establishing policy and making decisions.

Concern about children's reading is an international issue highlighted by continuing OECD research. Government actions such as the priority given to reading in the review of the National Curriculum reflect current UK concern. Reading is an essential life skill not only for an individual's development and life chances but for social cohesion and a developed democracy. In an era of public spending cuts it is important to reflect upon the impact that libraries can have in growing readers for the future. This much-needed book provides valuable evidence of successes so far both nationally and internationally, and offers ideas for future development as well as inspiration for current practice. An edited collection contributed by expert practitioners, it covers all aspects of promoting reading to and with children and young people from birth right through to teenage years, including the following key topics: the importance of Bookstart how

Assessment of student learning outcomes (ASLO) is one of the key activities in teaching and learning. It serves as the source of information in determining the quality of education at the classroom and national levels. Results from any assessment have an influence on decision making, on policy development related to improving individual student achievement, and to ensure the equity and quality of an education system. ASLO provides teachers and school heads with information for making decisions regarding a students' progress. The information allows teachers and school heads to understand a students' performance better. This report reviews ASLO in three South Asian countries---Bangladesh, Nepal, and Sri Lanka---with a focus on public examinations, national assessment, school-based assessment, and classroom assessment practiced in these countries.

Injury is an increasingly significant health problem throughout the world, accounting for 16 per cent of the global burden of disease. The public health burden of death and disability from injury is particularly notable in low and middle income countries. These guidelines seek to establish practical and affordable standards applicable to injury or trauma care worldwide, whether in rural health posts, small hospitals, hospitals staffed by specialists or tertiary care centres. It

"Civilian control over the military is widely hailed as among the biggest successes of India's democracy. This is a rarity, especially among post-colonial states, and is rightfully celebrated. But has this come at a cost? In *The Absent Dialogue*, Anit Mukherjee argues that the pattern of civil-military relations in India has hampered its military effectiveness. Indian politicians and bureaucrats have long been content with the formal and ritualistic exercise of civilian control, while the military continues to operate in institutional silos, with little substantive engagement between the two. In making this claim, the book closely examines the variables most closely associated with military effectiveness -- weapons procurement, jointness (the ability of separate military services to operate together), officer education, promotion policies, and defense planning. India's pattern of civil-military relations -- best characterized as an absent dialogue -- adversely affects each of these processes. Theoretically, the book adopts the 'unequal dialogue' framework proposed by Eliot Cohen but also argues that, under some conditions, patterns of civil-military relations maybe more closely resemble an 'absent dialogue.' Informed by more than a hundred and fifty interviews and recently available archival material, the book represents a deep dive into understanding the power and the limitations of the Indian military. It sheds new light on India's military history and is essential reading for understanding contemporary civil-military relations and recurring problems therein. While the book focuses on India, it also highlights the
