Between 1912 and 1919, the Universal Film Manufacturing Company credited eleven women with directing at least 170 films, but by the mid-1920s all of these directors had left Universal and only one still worked in the film industry at all. Two generations of cinema historians have either overlooked or been stymied by the mystery of why Universal first systematically supported and promoted women directors and then abruptly reversed that policy. In this trailblazing study, Mark Garrett Cooper approaches the phenomenon as a case study in how corporate movie studios interpret and act on institutional culture in deciding what it means to work as a man or woman. In focusing on issues of institutional change, Cooper challenges interpretations that explain women's exile from the film industry as the inevitable result of a

transhistorical sexism or as an effect of a broadly cultural revision of gendered work roles. Drawing on a range of historical and sociological approaches to studying corporate institutions, Cooper examines the relationship between institutional organization and aesthetic conventions during the formative years when women filmmakers such as Ruth Ann Baldwin, Cleo Madison, Ruth Stonehouse, Elise Jane Wilson, and Ida May Park directed films for Universal.

From fads, crazes, and manias to collective delusions, scares, panics, and mass hysterias, history is replete with examples of remarkable social behavior. Many are fueled by fear and uncertainty; others are driven by hope and expectation. For others still, the causes are more obscure. This massive collection of extraordinary social behaviors spans more than two millennia, and attempts to place many of the episodes within their greater historical and cultural context. Perhaps the most well known example of unusual collective behavior occurred in 1938, when a million or more Americans were frightened or panicked after listening to a realistic radio drama about a Martian invasion of New Jersey, based on an adaptation of the H.G. Wells novel "War of the Worlds." Less known but equally remarkable scares based on Wells' book occurred in Chile in 1944 (when Army units were mobilized), in Ecuador in 1949 (when riots broke out, leaving

more than a dozen dead), as well as in Buffalo in 1968, Rhode Island in 1974, and Europe in 1988 and 1998. The modern civilized world is by no means immune to such peculiar episodes. In the late 20th century, scores of people in the U.S. and Europe were wrongly incarcerated following claims of Satanic ritual abuse by authorities untutored in False Memory Syndrome. This episode recalls the European witch terror of the late Middle Ages, when innocent people were tortured and executed for consorting with the Devil based on the flimsiest of evidence. **OUTBREAK! THE ENCYCLOPEDIA OF EXTRAORDINARY SOCIAL BEHAVIOR** is an authoritative reference on a broad range of topics: collective behavior, deviance, social and perceptual psychology, sociology, history, folklore, religious studies, political science, social anthropology, gender studies, critical thinking, and mental health. Never before have so many sources been brought together on the mesmerizing topic of collective behavior.

On December 4th, 1872, a 100-foot brigantine was discovered drifting through the North Atlantic without a soul on board. Not a sign of struggle, not a shred of damage, no ransacked cargo—and not a trace of the captain, his wife and daughter, or the crew. What happened on board the ghost ship *Mary Celeste* has baffled and tantalized the world for 130 years. In his stunning new book, award-winning journalist Brian Hicks plumbs the depths of this fabled nautical mystery and finally uncovers the truth. The *Mary Celeste* was cursed as soon as she was launched on the Bay of Fundy in the spring of 1861. Her first captain died before completing the maiden voyage. In London she accidentally rammed and sank an English brig. Later she was abandoned after a storm drove her ashore at Cape Breton. But somehow the ship was recovered and refitted, and in the autumn of 1872 she fell to the reluctant command of a seasoned mariner named

Benjamin Spooner Briggs. It was Briggs who was at the helm when the *Mary Celeste* sailed into history. In Brian Hicks's skilled hands, the story of the *Mary Celeste* becomes the quintessential tale of men lost at sea. Hicks vividly recreates the events leading up to the crew's disappearance and then unfolds the complicated and bizarre aftermath—the dark suspicions that fell on the officers of the ship that intercepted her; the farcical Admiralty Court salvage hearing in Gibraltar; the wild myths that circulated after Sir Arthur Conan Doyle published a thinly disguised short story sensationalizing the mystery. Everything from a voodoo curse to an alien abduction has been hauled out to explain the fate of the *Mary Celeste*. But, as Brian Hicks reveals, the truth is actually grounded in the combined tragedies of human error and bad luck. The story of the *Mary Celeste* acquired yet another twist in 2001, when a team of divers funded by novelist Clive Cussler located the wreck in a coral reef off Haiti. Written with the suspense of a thriller and the vivid accuracy of the best popular history, *Ghost Ship* tells the unforgettable true story of the most famous and most fascinating maritime mystery of all time.

Thomas loves his summer visits to his grandmother's on Cape Cod. He spends his days wondering about the sailing ships of the past and imagining their stories. One afternoon, after a night of terrible thunderstorms, Thomas finds, deep in the sands, a weathered old-fashioned belt buckle. When he picks it up, a boy his own age appears before him. His name is Silas Rich, a cabin boy from a ship called the *Monomoy* that sailed almost 250 years ago. As Silas tells his tale, suddenly the world of sailing ships is very near indeed.

It is often said The first casualty of war is the truth and there is no better example of this than the furore caused by the claims and counterclaims of the British and German Governments at the height of the First World War. Wounded

allied personnel were invariably repatriated by hospital ships, which ran the gauntlet of mined waters and gambled on the humanity of the U-Boat commanders. For, contrary to the terms of the Geneva Convention, on occasions Germany had sunk the unarmed hospital ships under the pretense they carried reinforcement troops and ammunition. The press seized on these examples of Hun Barbarity, especially the drowning of noncombatant female nurses. The crisis heightened following the German Governments 1 February 1917 introduction of unrestricted naval warfare. The white painted allied hospital ships emblazoned with huge red crosses now became in German eyes legitimate targets for the U-Boats. As the war on the almost 100 strong fleet of hospital ships intensified the British threatened reprisals against Germany, in particular an Anglo-French bombing raid upon a German town. Undeterred the Germans stepped up their campaign sinking two hospital ships in swift succession. Seven hospital ships struck mines and a further eight were torpedoed. Faced with such a massacre of the innocents Britain decided her hospital ships, painted and brightly lit in accordance with the Geneva Convention, could no longer rely on this immunity. The vessels were repainted in drab colors, defensively armed and sailed as ambulance transports among protected convoys. Germany had successfully banished hospital ships from the high seas.

The period in film history between the regimentation of the Edison Trust and the vertical integration of the Studio System--roughly 1916 through 1920--was a time of structural and artistic experimentation for the American film industry. As the nature of the industry was evolving, society around it was changing as well; arts, politics and society were in a state of flux between old and new. Before the major studios dominated the industry, droves of smaller companies competed for the attention of the independent exhibitor, their

The reporting of the trade journals, as they witnessed the evolution of the industry from its infancy towards the future, is the basis of this history. Pulled from the pages of the journals themselves as archived by the Media History Digital Library, the observations of the trade press writers are accompanied by cleaned and restored advertisements used in the battle among the young film companies. They offer a unique and vital look at this formative period of film history.

The disappearance of Flight 19, five US Navy Grumman TBM Avenger torpedo bombers, on December 5th 1945 and the subsequent vanishing of a Martin Mariner PBM flying boat which was searching for them remains one of the most baffling and enduring aviation mysteries. More nonsense has been written about Flight 19 than almost any other aviation mystery. The loss of these aircraft has been blamed on everything from giant waterspouts to UFOs and even on the malign influence of the Bermuda Triangle. However, many previous writers have either invented evidence to support their theories or have focused on only a single aspect of this

tragedy. This book includes a detailed analysis of all the evidence and concludes that the solution to this mystery is much simpler but no less tragic or surprising. The writer has experience of both investigative journalism and flying and uses this knowledge to provide a harrowing account of human failure and fallibility that led directly to the deaths of twenty-seven men. Clearly set out and meticulously researched, this book finally tells the real story of Flight 19. Why are there so many heroes attached to the sinking of the Titanic? Why do we accord impossible glory to the miserable, misbegotten drowning of the equivalent of a small town? Who were the real heroes, and how were they overlooked? What did society - and the press - do with its overriding need for blame? The creation of heroes where they did not exist offers us insights, in throwing off the blanket of boasting a century later, that bring history's most famous shipwreck back into sharper focus. We see into the nature of prejudice, social values and the overriding political and national considerations of the time. This book also looks at the offered sacrificial victims of the time, in particular the character of Captain Stanley Lord of the Californian, the man charged with abandoning 1,500 people to their fate. Backed up with new photographic archives and bolstered by a series of contemporary extracts to support its arguments, this is Titanic history presented in an entirely new authentic light. An investigation into the unsolved disappearance of the crew of the Mary Celeste in 1872 draws on previously unpublished letters and photographs, as well as new theories and discoveries, to explain what may have happened. This is a major new naval history of the First World War which reveals the decisive contribution of the war at sea to Allied victory. In a truly global account, Lawrence Sondhaus traces the course of the campaigns in the North Sea, Atlantic, Adriatic, Baltic and Mediterranean and examines the role of critical innovations in the design and performance of ships, wireless communication and firepower. He charts how Allied supremacy led the Central Powers to attempt to revolutionize naval warfare by pursuing unrestricted submarine warfare, ultimately prompting the United States to enter the war. Victory against the submarine challenge, following their earlier success in sweeping the seas of German cruisers and other surface raiders, left the Allies free to use the world's sea lanes to transport supplies and troops to Europe from overseas territories, and eventually from the United States, which proved a decisive factor in their ultimate victory.

Sir Arthur Ignatius Conan Doyle DL (22 May 1859 - 7 July 1930) was a Scottish physician and writer who is most noted for his fictional stories about the detective Sherlock Holmes, which are generally considered milestones in the field of crime fiction. He is also known for writing the fictional adventures of a second character he invented, Professor Challenger, and for popularising the mystery of the Mary Celeste. He was a prolific writer whose other works include fantasy and science fiction stories, plays, romances, poetry, non-fiction, and historical novels. Sherlock Holmes is a fictional detective created by Scottish author and physician Sir Arthur Conan Doyle, a graduate of the University of Edinburgh Medical School. A London-based "consulting detective" whose abilities border on the fantastic, Holmes is famous for his astute logical reasoning, his ability to adopt almost any disguise, and his use of forensic science skills to solve difficult cases. Holmes, who first appeared in publication in 1887, was featured in four novels and 56 short stories. The first novel, *A Study in Scarlet*, appeared in Beeton's Christmas

Annual in 1887 and the second, The Sign of the Four, in Lippincott's Monthly Magazine in 1890. The character grew tremendously in popularity with the first series of short stories in The Strand Magazine, beginning with "A Scandal in Bohemia" in 1891; further series of short stories and two novels published in serial form appeared between then and 1927. The stories cover a period from around 1880 up to 1914. All but four stories are narrated by Holmes's friend and biographer, Dr. John H. Watson; two are narrated by Holmes himself ("The Blanched Soldier" and "The Lion's Mane") and two others are written in the third person ("The Mazarin Stone" and "His Last Bow"). In two stories ("The Musgrave Ritual" and "The Gloria Scott"), Holmes tells Watson the main story from his memories, while Watson becomes the narrator of the frame story. The first and fourth novels, A Study in Scarlet and The Valley of Fear, each include a long interval of omniscient narration recounting events unknown to either Holmes or Watson.
