"This book's great service is that it challenges us to consider the ways in which our institutions and systems, and the assumptions, positions and divisions that undergird them, leave us ill prepared for the next crisis."—Robert Rubin, The New York Times Book Review Deftly weaving finance, politics, business, and the global human experience into one tight narrative, a tour-de-force account of 2020, the year that changed everything—from the acclaimed author of Crashed. The shocks of 2020 have been great and small, disrupting the world economy, international relations and the daily lives of virtually everyone on the planet. Never before has the entire world economy contracted by 20 percent in a matter of weeks nor in the historic record of modern capitalism has there been a moment in which 95 percent of the world's economies were suffering all at the same time. Across the world hundreds of millions have lost their jobs. And over it all looms the specter of pandemic, and death. Adam Tooze, whose last book was universally lauded for guiding us coherently through the chaos of the 2008 crash, now brings his bravura analytical and narrative skills to a panoramic and synthetic overview of our current crisis. By focusing on finance and business, he sets the pandemic story in a frame that casts a sobering new light on how unprepared the world was to fight the crisis, and how deep the ruptures in our way of living and doing business are. The virus has attacked the economy with as much ferocity as it has our health, and there is no vaccine arriving to address that. Tooze's special gift is to show how social organization, political interests, and economic policy interact with devastating human consequences, from your local hospital to the World Bank. He moves fluidly from the impact of currency fluctuations to the decimation of institutions--such as health-care systems, schools, and social services--in the name of efficiency. He starkly analyzes what happened when the pandemic collided with domestic politics (China's party conferences; the American elections), what the unintended consequences of the vaccine race might be, and the role climate change played in the pandemic. Finally, he proves how no unilateral declaration of 'independence' or isolation can extricate any modern country from the global web of travel, goods, services, and finance.

While some may dispute the author's bleak vision, this is nevertheless required reading for anyone who wants to understand the massive changes hitting the world's economies in the coming decades.' Luke Johnson, Chairman of Channel 4 and Signature Restaurants and Columnist for The Sunday Telegraph. 'This book is a compelling recital of serious points upon which all citizens, whether professional investors or not, will have to make up their mind.' Simon Cawkwell (aka "Evil Knievil", leading British Bear). 'If you are not yet worried about the financial future you should be. The global economy isn't as healthy as you think it is. Wake Up! explains why and then tells you exactly what to do about it. A brilliantly written and very convincing financial horror story. A must read for anyone who wants to preserve their capital over the coming decade.' Merryn Somerset-Webb, Editor of MoneyWeek and Sunday Times Columnist.

The #1 Wall Street Journal Bestseller “Required reading. . . . Shows how our economic crisis was a failure, not of the free market, but of government.” —Charles Koch, Chairman and CEO, Koch Industries, Inc. Did Wall Street cause the mess we are in? Should Washington place stronger regulations on the entire financial industry? Can we lower unemployment rates by controlling the free

market? The answer is NO. Not only is free market capitalism good for the economy, says industry expert John Allison, it is our only hope for recovery. As the nation's longest-serving CEO of a top-25 financial institution, Allison has had a unique inside view of the events leading up to the financial crisis. He has seen the direct effect of government incentives on the real estate market. He has seen how government regulations only make matters worse. And now, in this controversial wake-up call of a book, he has given us a solution. The national bestselling *The Financial Crisis and the Free Market Cure* reveals: Why regulation is bad for the market—and for the world What we can do to promote a healthy free market How we can help end unemployment in America The truth about TARP and the bailouts How Washington can help Wall Street build a better future for everyone With shrewd insight, alarming insider details, and practical advice for today's leaders, this electrifying analysis is nothing less than a call to arms for a nation on the brink. You'll learn how government incentives helped blow up the real estate bubble to unsustainable proportions, how financial tools such as derivatives have been wrongly blamed for the crash, and how Congress fails to understand it should not try to control the market—and then completely mismanages it when it tries. In the end, you'll understand why it's so important to put "free" back in free market. It's time for America to accept the truth: the government can't fix the economy because the government wrecked the economy. This book gives us the tools, the inspiration—and the cure.

Mind Right, Life Right: Manifesting Your Dreams Through the Laws of the Universe is a book written to help those who are seeking true enlightenment, learn how to turn their dreams into reality.

Whoever you are, whatever your financial situation, I'm here to give you a wake-up call, my friend. Twenty-five years ago, I set off on my own with nothing but a folding table and a phone. For years, real success eluded me. I told people I was doing well when I was often on the edge of being broke. Millions of people face the same plight—including my beloved brother-in-law, who died tragically before he could fix his money problems. That was MY wake-up call. I knew I needed more money, but I didn't know how to get it. I only turned things around by getting honest with myself, taking responsibility for my situation, and figuring out some practical solutions. Now I'm going to show you how to do the same. In polite society, we don't like to talk about money. But it's too important to tiptoe around. In these pages, you and I are going to cut the BS and get real. For starters, I'll help you understand . . .

- How the money has moved. Stop making decisions based on advice that worked decades ago, but no longer.
- The dangers of living in a "False Positive." It's easy to tell ourselves that we have enough-- until we're hit with medical bills, aging parents, tuition, or early retirement.
- The cheap comfort of the blamer mind-set: It might feel good to blame the government, the economy, or your boss for your troubles, but it won't change anything. Do you want an excuse, or do you want more money?
- The power of "Lifestyle by Design." Visualize your long-term goal and work backward to figure out how to get there.
- The trade-offs of being an employer or employee. You can get rich by starting a business or by rising to the top of an existing organization. Let's figure out what's right for you. It's going to take grit and guts, but if you follow my road map, you'll start accumulating real wealth, the kind that lets you live the life of your dreams and lasts for generations to come.

Our Changing Menu unpacks the increasingly complex relationships between food and climate change. Whether you're a chef, baker, distiller, restaurateur, or someone who simply enjoys a good pizza or drink, it's time to come to terms with how climate change is affecting our diverse and interwoven food system. Michael P. Hoffmann, Carrie Koplinka-Loehr, and Danielle L. Eiseman offer an eye-opening journey through a complete menu of before-dinner drinks and salads; main courses and sides; and coffee and dessert. Along the way they examine the escalating changes occurring to the flavors of spices and teas, the yields of wheat, the vitamins in rice, and the price of vanilla. Their story is rounded out with a primer on the global food system, the causes and impacts of climate change, and what we can all do. *Our Changing Menu* is a celebration of food and a call to action—encouraging readers to join with others from the common ground of food to help tackle the greatest challenge of our time.

A practical plan for the millions of people in their fifties and sixties who find themselves out of work, unable to find a job, and financially incapable of retiring, Elizabeth White shows how to get past any blame or shame, overcome denial, and find a path to a new normal. Elizabeth White has an impressive resume, which includes advanced degrees from Harvard and Johns Hopkins and a distinguished employment history. She started a business that failed and then tried to reenter the work force in her mid-fifties, only to learn that there is little demand for workers her age. For a while Elizabeth lived in denial, but then had to adjust to her new reality, shedding the gym membership, getting a roommate, forgoing restaurant meals, and so on. She soon learned she wasn't alone: there are millions of Americans in her predicament and worse, exhausted from trying to survive and overcome every day. In *55, Underemployed, and Faking Normal*, Elizabeth invites you to look beyond your immediate circumstances to what is possible in the new normal of financial insecurity. You're in your fifties and sixties, and may have saved nothing or not nearly enough to retire. It's too late for blame or shame—and it wouldn't help anyway. What you want to know is what you can do now to have a shot at a decent retirement. "This relevant and well-researched book will appeal not only to those 55 plus, but to the generation coming right behind them who may face similar issues" (Booklist, starred review). *55, Underemployed, and Faking Normal* is a must-have for anyone whose income has suddenly diminished or even disappeared. "Providing practical solutions with a focus on

retirement and maximizing savings, White maintains authority with a realistic, empathetic tone throughout. This deeply useful work will resonate with aging readers of all income levels and situations” (Publishers Weekly). If you’re ready to get serious about feeling good again, this book is for you.

It's Time to Rediscover America. Our nation is deteriorating. Slowly but surely the virtues and values we once celebrated—responsibility, resilience, dignity, respect—have been abandoned. Our work ethic has been replaced by an entitlement ethic. And as we lose the cultural traits that brought us to our leadership position, America's standing in the world will surely fall as well. But there is good news, say David and Andrea R. Reiser. By rediscovering the qualities that made America great, we can start to turn things around. We can teach our young people—not to mention ourselves, our employees, and our fellow Americans of all ages—what truly leads to success, prosperity, and fulfillment. That's what *Letters from Home* is about. Written in the form of letters to the authors' four sons, it explores fifteen basic American virtues that built our country and that foster individual success. Each chapter includes profiles of exceptional "real people"—the authors' wealth management clients, friends, and neighbors—who truly walk the talk. A few examples of what the book teaches: Work hard. Go above and beyond in all that you do. Be resilient and learn from adversity. Seize opportunity when it comes (and it comes every day). Follow your moral compass faithfully and consistently. When you fall, take responsibility for getting back up. Save prudently and spend thoughtfully. Practice gratitude. Know that you're blessed. Part cultural treatise and part kick-in-the-pants, *Letters from Home* is a moving reminder that we live in a land of freedom and opportunity. It should inspire us all—parents, influential leaders, and ordinary citizens alike—to do everything in our power to honor and perpetuate that legacy. The authors are proud to contribute 100% of royalties from the publication of this book to three personally meaningful organizations: Share Our Strength (www.strength.org), Memorial Sloan-Kettering Cancer Center (www.mskcc.org), and FORCE (www.facingourrisk.org).

Drawing on the groundbreaking U.S. Financial Diaries project (<http://www.usfinancialdiaries.org/>), which follows the lives of 235 low- and middle-income families as they navigate through a year, the authors challenge popular assumptions about how Americans earn, spend, borrow, and save-- and they identify the true causes of distress and inequality for many working Americans.

"[An] executive summary of modern political history studded with sweeping assertions and telling anecdotes." -- The New York Times Book Review "Thought-provoking." -- Kirkus Reviews "A shot in the arm...powerful." -- The Financial Times "The Wake-Up Call, refreshingly concise and eminently readable, highlights how the modern crisis of governance compounded the challenges of the pandemic." -- Bloomberg "The Wake-Up Call argues that Covid-19 has exposed not just one president's shortcomings but a much more profound degeneration of governance dating back long before 2016...You will read no more interesting book on the political consequences of the pandemic than this." -- Niall Ferguson, author of *Civilization: The West and the Rest* **NAMED ONE OF THE BEST BOOKS OF 2020 (BLOOMBERG)** An urgent and informed look at the challenges America and world governments will face in a post Covid-19 world. The Covid-19 pandemic has revealed that governments matter again, that competent leadership is the difference between living and dying. A few governments proved adept at handling the crisis while many others failed. Are Western governments healthy and strong enough to keep their citizens safe from another virulent virus—and protect their economies from collapse? Is global leadership passing from the United States to Asia—and particularly China? The Wake-Up Call addresses these urgent questions. Journalists and longtime collaborators John Micklethwait and Adrian Wooldridge identify the problems Western leaders face, and outline a detailed plan to help them become more vigilant, better prepared, and responsive to disruptive future events. The problems that face us are enormous; as The Wake-Up Call makes clear, governments around the world must re-engineer the way they operate to successfully meet the challenges ahead.

A new kind of manifesto for the working woman, with tips on building wealth and finding balance, as well as inspiration for harnessing the freedom and power that comes from a breadwinning mindset. Nearly half of working women in the United States are now their household's main breadwinner. And yet, the majority of women still aren't being brought up to think like breadwinners. In fact, they're actually discouraged--by institutional bias and subconscious beliefs--from building their own wealth, pursuing their full earning potential, and providing for themselves and others financially. The result is that women earn less, owe more, and have significantly less money saved and invested for the future than men do. And if women do end up the main breadwinners, they've been conditioned to feel reluctant and unprepared to manage the role. In *Think Like a Breadwinner*, financial expert Jennifer Barrett reframes what it really means to be a breadwinner. By dismantling the narrative that women don't--and shouldn't--take full financial responsibility to create the lives they want, she reveals not only the importance of women building their own wealth, but also the freedom and power that comes with it. With concrete practical tools, as well as examples from her own journey, Barrett encourages women to reclaim, rejoice in, and aspire to the role of breadwinner like never before. A bold and urgent perspective on how American foreign policy must change in response to the shifting world order of the twenty-first century, from the New York Times bestselling author of *The Limits of Power* and *The Age of Illusions*. The purpose of U.S. foreign policy has, at least theoretically, been to keep Americans safe. Yet as we confront a radically changed world, it has become indisputably clear that the terms of that policy have failed. Washington's insistence that a market economy is compatible with the common good, its faith in the idea of the "West" and its "special relationships," its conviction that global military primacy is the key to a stable and sustainable world order—these have brought endless wars and a succession of moral and material disasters. In a bold reconception of America's place in the world, informed by thinking from across the political spectrum, Andrew J. Bacevich—founder and president of the Quincy Institute for Responsible Statecraft, a bipartisan Washington think tank dedicated to foreign policy—lays down a new approach—one that is based on moral pragmatism, mutual coexistence, and war as a last resort. Confronting the threats of the future—accelerating climate change, a shift in the international balance of power, and the ascendance of information technology over brute weapons of war—his vision calls for nothing less than a profound overhaul of our understanding of national security. Crucial and provocative, *After the Apocalypse* sets out new principles to guide the once-but-no-longer sole superpower as it navigates a transformed world.

Most people have it all wrong about how you become wealthy in America. More often than not, we are taught that wealth is the by-product of hard work, diligent savings, and living below one's means. If that were the case, why is it that 50% of the population are considered financially inept, in a nation that is primarily driven by finance? How is it that one in three people who've worked their entire lives, have nothing saved towards retirement? How is it that 40% of all student borrowers can't afford to make payments on their college loans? Most of us recognize that something is terribly wrong within our economy and financial systems, yet we continue to obey the antiquated financial rhetoric spewed by the experts and media. But at what cost? If you're going to participate in this game and wonder how you build more wealth, then the solution will be easier than what is normally given to the 99 percenters. *Bank On You* explores the financial advice kept from the masses and shares it with you in a way that is compelling and easy to digest. The book includes: How to pursue multiple streams of income How to acquire assets that pay you How not to lose money How to be your own boss How to achieve financial freedom in any market cycle Embrace your new financial awakening and begin to master the game of money.

Divinely guided, inspirational, and groundbreaking, *The Ultimate Book of Wisdom* is an immediate must read for those seeking personal salvation and the power to control one's own harmony. Full of universal laws and practical steps to create the life desired, *The Ultimate Book of Wisdom* will take you on a life-changing journey, which the author describes as the road to consciousness and the spirit within. Regulation by public and private organizations can be hijacked by special interests or small groups of powerful firms, and nowhere is this easier than at the global level. In whose interest is the global economy being regulated? Under what conditions can global regulation be made to serve broader interests? This is the first book to examine systematically how and why such hijacking or "regulatory capture" happens, and how it can be averted. Walter Mattli and Ngaire Woods bring together leading experts to present an analytical framework to explain regulatory outcomes at the global level and offer a series of case studies that illustrate the challenges of a global economy in which many institutions are less transparent and are held much less accountable by the media and public officials than are domestic institutions. They explain when and how global regulation falls prey to regulatory capture, yet also shed light on the positive regulatory changes that have occurred in areas including human rights, shipping safety, and global finance. This book is a wake-up call to proponents of network governance, self-regulation, and the view that technocrats should be left to regulate with as little oversight as possible. In addition to the editors, the contributors are Kenneth W. Abbott, Samuel Barrows, Judith L. Goldstein, Eric Helleiner, Miles Kahler, David A. Lake, Kathryn Sikkink, Duncan Snidal, Richard H. Steinberg, and David Vogel.

A Wall Street Journal Business Bestseller: This "vivid" inside story of WeWork and its CEO tells the remarkable saga of one of the most audacious, and improbable, rises and falls in American business history (Ken Auletta). Christened a potential savior of Silicon Valley's startup culture, Adam Neumann was set to take WeWork, his office share company disrupting the commercial real estate market, public, cash out on the company's forty-seven billion dollar valuation, and break the string of major startups unable to deliver to shareholders. But as employees knew, and investors soon found out, WeWork's capital was built on promises that the company was more than a real estate purveyor, that in fact it was a transformational technology company. Veteran journalist Reeves Weideman dives deep into WeWork and its CEO's astronomical rise, from the marijuana and tequila-filled board rooms to cult-like company summer camps and consciousness-raising with Anthony Kiedis. *Billion Dollar Loser* is a character-driven business narrative that captures, through the fascinating psyche of a billionaire founder and his wife and co-founder, the slippery state of global capitalism. A Wall Street Journal Business Bestseller "Vivid, carefully reported drama that readers will gulp down as if it were a fast-paced novel" (Ken Auletta)

Unsettling Canada is built on a unique collaboration between two First Nations leaders, Arthur Manuel and Grand Chief Ron Derrickson. Both men have served as chiefs of their bands in the B.C. interior and both have gone on to establish important national and international reputations. But the differences between them are in many ways even more interesting. Arthur Manuel is one of the most forceful advocates for Aboriginal title and rights in Canada and comes from the activist wing of the movement. Grand Chief Ron Derrickson is one of the most successful Indigenous businessmen in the country. Together the Secwepemc activist intellectual and the Syilx (Okanagan) businessman bring a fresh perspective and new ideas to Canada's most glaring piece of unfinished business: the place of Indigenous peoples within the country's political and economic space. The story is told through Arthur's voice but he traces both of their individual struggles against the colonialist and often racist structures that have been erected to keep Indigenous peoples in their place in Canada. In the final chapters and in the Grand Chief's afterword, they not only set out a plan for a new sustainable indigenous economy, but lay out a roadmap for getting there.

We are the beacon of hope for the world, and we will remain so as long as we stand up for our principles." In keeping with his no-holds-barred on-air style, conservative radio talk show host Jerry Doyle has the guts to ask the tough questions about the state of our nation today. In this informative, entertaining, and challenging narrative, he urges Americans to take back the things that make our country great, and delivers his hard-hitting and oftentimes humorous spin on: • ECONOMIC FASCISM—the rapid government domination that began with the egregious takedown of GM • BAILOUTS—the missteps, wrong moves, and rules of salary caps, bank buy-ins, and bonuses that changed from day to day • EDUCATION—how our "everybody wins" obsession is destroying teaching and fostering an obnoxious self-entitlement trend • THE OBAMA PRESIDENCY—will American capitalism survive this administration? . . . and much more. If you like your politics straight up, with a commonsense chaser and a shot of dry wit, you'll be galvanized and enlightened by Jerry Doyle—the man, his story, and his insights into America today.
