

Transcending The Levels Of Consciousness The Stairway To Enlightenment

An accessible exploration of best-selling author's most famous work, *The Map of Consciousness*, that helps readers experience healing and transcendence. We are all born with a level of consciousness, an energetic frequency within the vast field of consciousness. And with *The Map of Consciousness*, we can truly understand the total spectrum of human consciousness. Using a unique muscle-testing method, Dr. David R. Hawkins conducted more than 250,000 calibrations during 20 years of research to define a range of values, attitudes, and emotions that correspond to levels of consciousness. This range of values—along with a logarithmic scale of 1 to 1,000—became the *Map of Consciousness*, which Dr. Hawkins first wrote about in his best-selling book, *Power vs. Force*. With the *Map*, Dr. David R. Hawkins laid out the entire spectrum of consciousness, from the lower levels of Shame, Guilt, Apathy, Fear, Anger, and Pride; to Courage, Acceptance, and Reason; all the way up to the more expanded levels of Love, Ecstasy, Peace, and Enlightenment. These "higher" energy fields are a carrier wave of immense life energy. An essential primer on the late Dr. David R. Hawkins's teachings on human consciousness and their associated energy fields, *The Map of Consciousness Explained* offers readers an introduction and deeper understanding of the *Map*, with visual charts and practical applications to help them heal, recover, and evolve to higher levels of consciousness and energy. This book is a light unto the path of any individual who wants to become more effective in any area of life.

These holistic lectures were first presented to a variety of recovery organizations and clinicians from diverse backgrounds. The emphasis is on recovery in its fullest sense - mental, physical, psychological and spiritual. Hawkins draws from a diverse clinical background of over 50 years as a leader in the field.--

In this accessible overview of current knowledge, an expert team of editors and authors describe experimental approaches to consciousness. These approaches are shedding light on some of the hitherto unknown aspects of the distinct states of human consciousness, including the waking state, different states of sleep and dreaming, meditation and more. The book presents the latest research studies by the contributing authors, whose specialities span neuroscience, neurology, biomedical engineering, clinical psychology and psychophysiology, psychosocial medicine and anthropology. Overall this anthology provides the reader with a clear picture of how different states of consciousness can be defined, experimentally measured and analysed. A future byproduct of this knowledge may be anticipated in the development of systematic corrective treatments for many disorders and pathological problems of consciousness.

This is the seventh book in a progressive series based on the revelations of consciousness research. It describes in detail how to discern not only truth from falsehood but also the illusion of appearance from the actual core of reality. The text explains how to differentiate perception from essence, and thereby enables the reader to resolve the ambiguities and classical riddles that have challenged mankind for centuries and baffled the best minds in history. While modern technologies have provided a plethora of new toys and conveniences, the basic problems of daily existence remain. This book provides the tools to survive and regain fundamental autonomy and inner harmony while living with the complexities of the modern world.

Letting Go describes a simple and effective means by which to let go of the obstacles to Enlightenment and become free of negativity. During the many decades of the author's clinical psychiatric practice, the primary aim was to seek the most effective ways to relieve human suffering in all of its many forms. The inner mechanism of surrender was found to be of great practical benefit and is described in this book. Dr Hawkins's previous books focused on advanced states of awareness and Enlightenment. Over the years, thousands of students had asked for a practical technique by which to remove the inner blocks to happiness, love, joy, success, health and, ultimately, Enlightenment. This book provides a mechanism for letting go of those blocks. The mechanism of surrender that Dr Hawkins describes can be done in the midst of everyday life. The book is equally useful for all dimensions of human life: physical health, creativity, financial success, emotional healing, vocational fulfillment, relationships, sexuality and spiritual growth. It is an invaluable resource for all professionals who work in the areas of mental health, psychology, medicine, self-help, addiction recovery and spiritual development.

In this groundbreaking book you will learn how to get demonstrably true answers to your questions, and know what true success is and how to create it.

A bold reimagining of Maslow's famous hierarchy of needs—and new insights for realizing your full potential and living your most creative, fulfilled, and connected life. When psychologist Scott Barry Kaufman first discovered Maslow's unfinished theory of transcendence, sprinkled throughout a cache of unpublished journals, lectures, and essays, he felt a deep resonance with his own work and life. In this groundbreaking book, Kaufman picks up where Maslow left off, unraveling the mysteries of his unfinished theory, and integrating these ideas with the latest research on attachment, connection, creativity,

love, purpose and other building blocks of a life well lived. Kaufman's new hierarchy of needs provides a roadmap for finding purpose and fulfillment--not by striving for money, success, or "happiness," but by becoming the best version of ourselves, or what Maslow called self-actualization. While self-actualization is often thought of as a purely individual pursuit, Maslow believed that the full realization of potential requires a merging between self and the world. We don't have to choose either self-development or self-sacrifice, but at the highest level of human potential we show a deep integration of both. Transcend reveals this level of human potential that connects us not only to our highest creative potential, but also to one another. With never-before-published insights and new research findings, along with exercises and opportunities to gain insight into your own unique personality, this empowering book is a manual for self-analysis and nurturing a deeper connection not only with our highest potential but also with the rest of humanity.

All human endeavors have the common goal of understanding or influencing human experience. To this end, man has developed numerous descriptive and analytical disciplines: Morality, Philosophy, Psychology, and so on. Regardless of what branch of inquiry one starts from—philosophy, political theory, theology—all avenues of investigation eventually converge at a common meeting point: the quest for an organized understanding of the nature of pure consciousness. To explain that which is simple can be difficult indeed. Much of this book is devoted to the process of making the simple obvious. If we can understand even one simple thing in depth, we will have greatly expanded our capacity for comprehending the nature of the universe and life itself.

David R. Hawkins details how anyone may resolve the most crucial of all human dilemmas: how to instantly determine the truth or falsehood of any statement or supposed fact. Dr. Hawkins, who worked as a "healing psychiatrist" during his long and distinguished career, uses theoretical concepts from particle physics, nonlinear dynamics, and chaos theory to support his study of human behavior. This is a fascinating work that will intrigue readers from all walks of life!

A provocative and balanced examination of our current social and political situation—by a cutting-edge philosopher of our times. The world is in turmoil. As populist waves roil in the UK, Europe, Turkey, Russia, Asia—and most visibly, the U.S., with the election of Donald Trump—nationalist and extremist political forces threaten the progress made over many decades. Democracies are reeling in the face of nihilism and narcissism. How did we get here? And how, with so much antagonism, cynicism, and discord, can we mend the ruptures in our societies? In this provocative work, philosopher Ken Wilber applies his Integral approach to explain how we arrived where we are and why there is cause for hope. He lays much of the blame on a failure at the progressive, leading edge of society. This leading edge is characterized by the desire to be as just and inclusive as possible, and to it we owe the thrust toward women's rights, the civil rights movement, the environmental movement, and the concern for oppression in all its forms. This is all evolutionarily healthy. But what is unhealthy is a creeping postmodernism that is elitist, "politically correct," insistent on an egalitarianism that is itself paradoxically hierarchical, and that looks down on "deplorables." Combine this with the techno-economic demise of many traditional ways of making a living, and you get an explosive mixture. As Wilber says, for some Trump voters: "Everywhere you are told that you are fully equal and deserve immediate and complete empowerment, yet everywhere you are denied the means to actually achieve it. You suffocate, you suffer, and you get very, very mad." It is only when members of society's leading edge can heal themselves that a new, Integral evolutionary force can emerge to move us beyond the social and political turmoil of our current time to offer genuine leadership toward greater wholeness.

This Book of Slides is a comprehensive "atlas" of the vast terrain covered by Dr. David R. Hawkins in his public lectures, 2002-2011. It contains the compendium of his lecture slides, along with a summary of his teaching at each lecture. Widely appreciated for his unusual capacity to illumine the Real in everyday terms, Dr. Hawkins lectured on such vital topics as The Nature of God, Nonduality, Self-Realization, Spirituality in the Modern World, Spiritual Community, Spiritual Teachers, The Way of Devotion, Qualities of the Spiritual Seeker, Love, Success, and Happiness.

Now more than ever, humankind is in need of developing its higher consciousness to heal itself and Earth and to experience life in a much more meaningful way. By expanding our consciousness, we can see the connections and unity that exist in all reality, and we might see objects with sharper colors, hear sounds with greater clarity, or even experience two sensations simultaneously! In this book, you will explore the fascinating multidimensionality that is yours for the taking. "You might think that the mind is in the cells, but in reality, the mind also exists as an energy field located in the aura, meaning the mind exists in a realm that in part is in the third dimension but also exists in other dimensions as well. The mind is naturally multidimensional." — Vywamus Chapters Include The Laws of Consciousness The Next Step for Humanity Thought Fields Superintelligence: A New Consciousness Quantum Cohesiveness Unified Consciousness and Earth's Noosphere The Intersection of the Dimensions Folding the Space-Time Continuum And much, much more!

Reveals a breakthrough in documenting a new era of human knowledge. Only in the last decade has a science of Truth emerged that, for the first time in human history, enables the discernment of truth from falsehood. Presented are discoveries of an enormous amount of crucial and significant information of great importance to mankind. Truth and Reality, Dr. Hawkins states, have no secrets, and everything that exists now or in the past— even a thought— is identifiable and calibratable from the omnipresent field of Consciousness itself.

The now widely known Map of calibrated levels of Consciousness was presented in Power vs. Force in 1995 and has been translated into all the world's major languages. This was followed by The Eye of the I (2001), I: Reality and Subjectivity (2003), and Truth vs. Falsehood (2005), which explored the levels of Truth reflected throughout society. Transcending the Levels of Consciousness returns to the exploration of the ego's expressions and inherent limitations and gives detailed explanations and instructions on how to transcend them. As with the reading of Dr. Hawkins' previous books, the reader's level of consciousness is advanced as a consequence of exposure to the information itself. This opens up avenues to the relief of suffering for oneself and others, which fulfills the purpose of the work and the intention to facilitate the reader's own Enlightenment.

The sixth book in a progressive series by Dr. David R. Hawkins, this work finalizes and further clarifies the true nature and core of the condition termed Enlightenment. It is primarily an instruction manual for the serious spiritual devotee and reveals information only known by those who have transcended the ego to reach Divine Realization. This is the inner route from the self to the Self, and the descriptions of the progressive states are devoted to the reader's own illumination. This work will appeal to those who themselves are dedicated to the spiritual Reality of Truth as the direct pathway to God.

It is often assumed that there are two ways of interpreting the world: a rational scientific way, or an irrational religious way. Spiritual Science offers a third alternative: a spiritual view of reality that transcends both conventional science and religion, and answers many of the riddles that neither can explain. The standard model of science has had little success in explaining such areas as human consciousness, the connection between the mind and the body, altruism and 'anomalous' phenomena such as near-death experiences, psi phenomena (such as telepathy) and spiritual experiences. But from a 'panspiritist' point of view – which sees spirit or consciousness as a fundamental essence of reality – it is possible to make sense of all these things. Steve Taylor puts forward the evidence for a spiritual view of reality, drawing on the insights of philosophers, physicists, mystics, as well as spiritual traditions and indigenous cultures. He systematically shows how a 'panspiritist' view can explain many puzzling aspects of science and the world, including evolution and the origins of life, and a wide range of other phenomena such as quantum physics, the placebo effect, precognition and neuroplasticity. Spiritual Science offers a new vision of the world that is compatible with both modern science and ancient spiritual teachings. It provides a more accurate and holistic account of reality than conventional science or religion, integrating a wide range of phenomena that are excluded from both. After showing how the materialist worldview demeans the world and human life, Spiritual Science offers a brighter alternative – a vision of the world as sacred and interconnected, and of human life as meaningful and purposeful. Spiritual Science explains how the standard materialist model of reality developed, and turned into a belief system. This belief system can only function by denying (or explaining away) a whole range of phenomena that are part of human experience. It is possible to be scientific without adopting this belief system – in fact, it is much more rational

to do so.

Explores the ego's expressions and inherent limitations and gives detailed explanations and instructions on how to transcend them. It expands the understanding of the levels of consciousness as presented in the widely-acclaimed Map of Consciousness. The book focuses on the individual, and studies the experiential subjective blocks to the advancement of awareness, at each level of consciousness. This leads to progressive spiritual awareness and on to higher levels of consciousness, providing specific steps for transcending each level, preparatory to advanced states such as Enlightenment itself. By analyzing the various obstacles and levels to be transcended, certain principles that support spiritual evolution are self-revealing. This book is therefore a practical manual rather than a comprehensive analysis.

Finally, you can simply and effortlessly discover the true meaning behind the symbols in your dreams. Unlike traditional dream dictionaries, this book presents the meanings behind modern-day symbols such as mobile phones, boom boxes, and DVD players. Traditional dictionaries might simply describe spiders as symbols of danger and entrapment. Ultimately, this book will become the benchmark for accurate dream interpretation.

"The Varieties of Religious Experience is certainly the most notable of all books in the field of the psychology of religion and probably destined to be the most influential [one] written on religion in the twentieth century," said Walter Houston Clark in Psychology Today. The book was an immediate bestseller upon its publication in June 1902. Reflecting the pluralistic views of psychologist-turned-philosopher William James, it posits that individual religious experiences, rather than the tenets of organized religions, form the backbone of religious life. James's discussion of conversion, repentance, mysticism, and hope of reward and fears of punishment in the hereafter--as well as his observations on the religious experiences of such diverse thinkers as Voltaire, Whitman, Emerson, Luther, Tolstoy, and others--all support his thesis. "James's characteristic humor, his ability to put down the pretentious and to be unpretentious, and his willingness to take some risks in his choices of anecdotal data or provocative theories are all apparent in the book," noted Professor Martin E. Marty. "A reader will come away with more reasons to raise new questions than to feel that old ones have been resolved."

This is the second volume of a trilogy that began with Power vs. Force and will be completed in the year 2002 by the publication of the third volume entitled I: Reality and Subjectivity. The Eye of the I (which calibrates at 950) is more advanced than Power vs. Force (which calibrates at 850) and brilliantly reveals the very core of the spiritual process critical to the state of Enlightenment. The intrinsic power of the information provided in this startling classic is sufficient of itself to elevate the consciousness of the reader. This likelihood has been anticipated and provided for by preparatory recontextualizations. Included are verbatim dialogues with advanced students, instructions, and explanations that illuminate the spiritual teachings. The Eye of the I is a brilliant work that dissolves the barriers between the known and the unknown, between science and spirituality, and between the Newtonian linear paradigm of the ego and the nonlinear reality of Enlightenment. With the resolution of the self, the Self shines forth and reveals one's true identity.

I: Reality and Subjectivity explains the very essence of consciousness as it evolved from its primordial appearance as life on earth, on up through evolution as the human ego, and hence, the transcendence of the ego as the spiritual Reality of Enlightenment and the Presence of Divinity. The uncommon clarity and lucidity with which the highly evolved subject matter is presented facilitates the reader's understanding and comprehension. The nature of consciousness is described in terms that recontextualize and simplify the spiritual process. The nonlinear reality of the enlightened sage is thereby made comprehensible to the reasoning mind.

Many of us lived previous lives as keepers of sacred knowledge that was taught in the ancient mystery schools. Much of this knowledge was lost through time due to disasters and destruction or death. The knowledge was reserved for a select few who devoted their lives to understanding and teaching it.
