A leading biblical scholar offers a powerful reexamination of the Bible's origins and its connections to human suffering. Human trauma gave birth to the Bible, suggests eminent religious scholar David Carr. The Bible's ability to speak to suffering is a major reason why the sacred texts of Judaism and Christianity have retained their relevance for thousands of years. In his fascinating and provocative reinterpretation of the Bible's origins, the author tells the story of how the Jewish people and Christian community had to adapt to survive multiple catastrophes and how their holy scriptures both reflected and reinforced each religion's resilient nature. Carr's thought-provoking analysis demonstrates how many of the central tenets of biblical religion, including monotheism and the idea of suffering as God's retribution, are factors that provided Judaism and Christianity with the strength and flexibility to endure in the face of disaster. In addition, the author explains how the Jewish Bible was deeply shaped by the Jewish exile in Babylon, an event that it rarely describes, and how the Christian Bible was likewise shaped by the unspeakable shame of having a crucified savior.

Why are human food habits so diverse? Why do Americans recoil at the thought of dog meat? Jews and Moslems, pork? Hindus, beef? Why do Asians abhor milk? In *Good to Eat*, best-selling author Marvin Harris leads readers on an informative detective adventure to solve the world's major food puzzles. He explains the diversity of the world's gastronomic customs, demonstrating that what appear at first glance to be irrational food tastes turn out really to have been shaped by practical, economic, or political necessity. In addition, his smart and spirited treatment sheds wisdom on such topics as why there has been an explosion in fast food, why history indicates that it's bad to eat people but good to

kill them, and why children universally reject spinach. *Good to Eat* is more than an intellectual adventure in food for thought. It is a highly readable, scientifically accurate, and fascinating work that demystifies the causes of myriad human cultural differences.

*Nazi Wives* is a fascinating look at the personal lives, psychological profiles, and marriages of the wives of officers in Hitler's inner circle. Goering, Goebbels, Himmler, Heydrich, Hess, Bormann—names synonymous with power and

influence in the Third Reich. Perhaps less familiar are Carin, Emmy, Magda, Margaret, Lina, Ilse and Gerda... These are the women behind the infamous men—complex individuals with distinctive personalities who were captivated by Hitler and whose everyday lives were governed by Nazi ideology. Throughout the rise and fall of Nazism these women loved and lost, raised families and quarreled with their husbands and each other, all the while jostling for position with the Fuhrer himself. Until now, they have been treated as minor characters, their significance ignored, as if they were unaware of their husbands' murderous acts, despite the evidence that was all around them: the stolen art on their walls, the slave labor in their homes, and the produce grown in concentration camps on their tables. James Wyllie's *Nazi Wives* explores these women in detail for the first time, skillfully interweaving their stories through years of struggle, power, decline and destruction into the post-war twilight of denial and delusion.

Amid cow pastures and waving fields of grain, Moo's campus churns with devious plots, mischievous intrigue, lusty liaisons, and academic one-upmanship, Chairman X of the Horticulture Department harbors a secret fantasy to kill the dean; Mrs. Walker, the provost's right hand and campus information queen, knows where all the bodies are buried; Timothy Monahan, associate professor of English, advocates eavesdropping for his creative writing assignments; and Bob Carlson, a sophomore, feeds and maintains his only friend: a hog named Earl Butz. Wonderfully written and masterfully plotted, *Moo* gives us a wickedly funny slice of life.

Let the Meatballs Rest: And Other Stories About Food and Culture (Arts & Traditions of the Table: Perspectives on Culinary History)

- Ninety-four delicious recipes for Italy's answer to fast food - Chef Alessandro Frassica emphasizes the use of fresh ingredients in imaginative combinations What could be more simple than a pan'ino? Take some bread and butter, slice it through the middle and fill it. Seen in this way, the sandwich is almost an "anti-cuisine", a nomadic shortcut that allows for speed and little thought. But when Alessandro Frassica thinks about his pan'ino, he considers it in a different way, not as a shortcut, but as an instrument for telling stories, creating layers of tales right there between the bread and its butter. Because even if the sandwich is simple, it is not necessarily so easy to create. Alessandro searches for ingredients, and in the raw foods he finds people: producers of pecorino cheese from Benevento, anchovies from Cetara, 'nduja spicy salami from Calabria. Then he studies the combinations, the consistencies and the temperature, because a pan'ino is not just a random object; savoury must be complemented by sweet; tapenade softens and provides moisture; bread should be warmed but not dried; thus the sandwich becomes a simple way of saying many excellent things, including finding a complexity of flavours that can thrill in just one bite.

Emilio Sereni's classic work is now available in an English language edition. History of the Italian Agricultural Landscape is a synthesis of the agricultural history of Italy in its economic, social, and ecological context, from antiquity to the mid-twentieth century. From his perspective in the Italian tradition of cultural Marxism, Sereni guides the reader through the millennial changes that have affected the agriculture and ecology of the regions of Italy, as well as through the successes and failures of farmers and technicians in antiquity, the middle ages, the Renaissance, and the Industrial Revolution. In this sweeping historical survey, he describes attempts by successive generations to adapt Italy's natural environment for the purposes of agriculture and to respond to its changing ecological problems. History of the Italian Agricultural Landscape first appeared in 1961. At the time of its publication it was a pathbreaking work, parallel in its importance for Italy to Marc Bloc's masterwork of 1931, The Original Characteristics of French Rural History. Sereni invented the concept of the historical "agricultural landscape": an interdisciplinary characterization of rural life involving economic and social history, linguistics, archeology, art history, and ecological studies.
